organisms in nature *Strange Attractor* Graham St John, 2025-10-07 An intellectual biography of one of the most celebrated and yet least understood figures of the late twentieth century Terence McKenna A stand up philosopher who made a unique contribution to science humanism and the hidden arts Terence McKenna 1946 2000 was the twentieth century's psychedelic Renaissance man Perfecting his rugged philosophy on the role of psychedelics in evolution consciousness and time McKenna was a riotous charmer who stalked the shadows but also sought the iridescence More than twenty years since his untimely passing McKenna has an enduring magnetism across the virtual pop stream in pervasive digitization and within social media networks In *Strange Attractor* the first biography of this enigmatic figure Graham St John detects the signal behind the noise This book is an engaging chronicle of the life works and legacy of this brazen adventurer of the inner and outer dimensions whose weird intelligence has affected multitudes and whose spirit continues to haunt the present It draws on original documents and letters features fifty two rare photographs and artworks and shares previously untold stories from over eighty people Neither glorifying nor disparaging its subject *Strange Attractor* will appeal to those interested in the evolution of a psychedelic intellectual and to those for whom McKenna's wisdom endures *Handbook of Entheogenic Healing* , 2025-07-24 *Entheogenic Healing* describes contemporary psychedelic therapies of indigenous cultures mestizo adaptations and emerging global traditions Analysis of cultural contexts and ritual practices of diverse entheogenic traditions provides an understanding of their individual and common dynamics A common framework situates the practices in cultural context describes training of healers examines preparatory and ritual activities and analyzes the dynamics of healing The chapters examine the roles entheogens play in healing focused on the alterations of consciousness and spirit experiences produced the forms of illness treated the nature of the healing processes and post session integration practices Their commonalities provide guidelines for the Psychedelic Renaissance *Expanding Mindscapes* Erika Dyck, Chris Elcock, 2023-11-21 The first collection of its kind to explore the diverse and global history of psychedelics as they appealed to several generations of researchers and thinkers *Expanding Mindscapes* offers a fascinatingly fluid and diverse history of psychedelics that stretches around the globe While much of the literature to date has focused on the history of these drugs in the United States and Canada editors Erika Dyck and Chris Elcock deliberately move away from these places in this collection to reveal a longer and more global history of psychedelics which chronicles their discovery use and cultural impact in the twentieth century The authors in this collection explore everything from LSD psychotherapy in communist Czechoslovakia to the first applications of LSD 25 in South America to the intersection of modernism and ayahuasca in China Along the way they also consider how psychedelic experiments generated their own cultural expressions where the specter of the United States may have loomed large and where colonial empires exerted influence on the local reception of psychedelics in botanical and pharmaceutical pursuits Breaking new ground by adopting perspectives that are currently lacking in the historiography of psychedelics this collection adds to the burgeoning field by offering important discussions on

underexplored topics such as gender agriculture parapsychology anarchism and technological innovations *A Psychonaut's Guide to the Invisible Landscape* Dan Carpenter,2006-02-14 A bold cartography of the inner landscape visible only to those experiencing altered states Presents the psychedelic experience as an objective landscape that embodies the Other rather than a subjective state of mind Provides corroboration of phenomena encountered by those who venture into this domain Journeying into the invisible world revealed by his use of the dissociative psychedelic DXM dextromethorphan Dan Carpenter found that what he experienced was not simply subjective sensations and psychological states but an objective world of familiar if inordinately odd landmarks and characters The running diary he kept of these voyages recounts impressions of a landscape charted by other travelers into this Inner Space and includes descriptions of many of the same phenomena recorded by such mind travelers as Terence and Dennis McKenna Alexander and Ann Shulgin and others who have experienced the hive mind the pool of all consciousness Into this territory where expression is like chaos theory where oddly symmetrical order manifests out of the seemingly anarchic swirl of images and events the author ventures with the mind set of a naturalist accepting whatever might be rather than what he hopes he might find What emerges is not a location crafted by subjective experience but a landscape that embodies the Other and that represents a conscious state in which the barriers between the self and the not self dissolve **An Encyclopedia of Shamanism Volume 2** Christina Pratt,2007-08-01

Shamanism can be defined as the practice of initiated shamans who are distinguished by their mastery of a range of altered states of consciousness Shamanism arises from the actions the shaman takes in non ordinary reality and the results of those actions in ordinary reality It is not a religion yet it demands spiritual discipline and personal sacrifice from the mature shaman who seeks the highest stages of mystical development Psilocybin Mushroom Legal Defenses William
