Ke Shi, 2019-12-06 Liveness is a pivotal issue for performance theorists and artists As live art covers both embodiment and disembodiment many scholars have emphasized the former and interpreted the latter as the opposite side of liveness In this book the author demonstrates that disembodiment is also an inextricable part of liveness and presence in performance from both practical and theoretical perspectives By applying phenomenological theory to live performance the author investigates the possible realisation of aesthetic dynamics in live art via re engagement with the notions of embodiment especially in the sense provided by philosophers such as Gabriel Marcel and Morris Merleau Ponty Creative practices from leading performance artists such as Franko B Ron Athey Manuel Vason and others as well as experimental ensembles such as Goat Island La Pocha Nostra Forced Entertainment and the New Youth are discussed offering a new perspective to re frame human human relationships such as the one between actor and spectator and collaborations in live genres In addition the author presents a new interpretation model for the human material in live genres helping to bridge the aesthetic gaps between performance art and experimental theatre and providing an ecological paradigm for performance art experimental theatre and live art **Eisenman Inside Out** Peter Eisenman, YALE UNIV PR, 2004-01-01 Essais sur l architecture par l architecte Eisenman 'Inside Outside' - Sculpture by 16 Artists Smith College Museum of Art (Northampton, Mass.), 1966

What Is Contemporary Art? Terry E. Smith, 2009-10-15
 Who gets to say what counts as contemporary art Artists critics curators gallerists auctioneers collectors or the public
 Revealing how all of these groups have shaped today's multifaceted definition Terry Smith brilliantly shows that an historical approach offers the best answer to the question What is Contemporary Art Smith argues that the most recognizable kind is characterized by a return to mainstream modernism in the work of such artists as Richard Serra and Gerhard Richter as well as the retro sensationalism of figures like Damien Hirst and Takashi Murakami At the same time Smith reveals postcolonial artists are engaged in a different kind of practice one that builds on local concerns and tackles questions of identity history and globalization A younger generation embodies yet a third approach to contemporaneity by investigating time place mediation and ethics through small scale closely connective art making Inviting readers into these diverse yet overlapping art worlds Smith offers a behind the scenes introduction to the institutions the personalities the biennials and of course the works that together are defining the contemporary The resulting map of where art is now illuminates not only where it has been but also where it is going

Graffiti and Street Art Konstantinos Avramidis, Myrto Tsilimpounidi, 2016-12-08 Graffiti and street art images are ubiquitous and they enjoy a very special place in collective imaginary due to their ambiguous nature Sometimes enigmatic in meaning often stylistically crude and aesthetically aggressive yet always visually arresting they fill our field of vision with texts and images that no one can escape As they take place on surfaces and travel through various channels they provide viewers an entry point to the subtext of the cities we live in while questioning how we read write and represent them This

book is structured around these three distinct albeit by definition interwoven key frames The contributors of this volume critically investigate underexplored urban contexts in which graffiti and street art appear shed light on previously unexamined aspects of these practices and introduce innovative methodologies regarding the treatment of these images Throughout the focus is on the relationship of graffiti and street art with urban space and the various manifestations of these idiosyncratic meetings In this book the emphasis is shifted from what the physical texts say to what these practices and their produced images do in different contexts All chapters are original and come from experts in various fields such as Architecture Urban Studies Sociology Criminology Anthropology and Visual Cultures as well as scholars that transcend traditional disciplinary frameworks This exciting new collection is essential reading for advanced undergraduates as well as postgraduates and academics interested in the subject matter It is also accessible to a non academic audience such as art practitioners and policymakers alike or anyone keen on deepening their knowledge on how graffiti and street art affect the ways urban environments are experienced understood and envisioned
