Value Engineering Surender Kumar, R. K. Singh, S. K. Jha, 2004-11 The first decade of 21st century witnessed several changes world wide in technology management restructuring and down sizing global trade and competition international quality standards information exchange lean manufacturing and virtual enterprises etc In this age of globalization the survival of any industry mainly depends on its cost of production and quality of its products With the rapid growth of competition and shrinking product life cycle value engineering has become an essential tool for attaining a

competitive edge This volume provides a logistic view of value engineering The chapters written by experts in their respective fields are organized into different sections covering Basic concepts of value engineering Information Technology and Value Engineering Systems Situational Case Studies Industrial Examples Role of value engineering in profit improvement and effectiveness *Ontology-Based Multi-Agent Systems* Maja Hadzic, Elizabeth J. Chang, Pornpit Wongthongtham, 2009-07-07 During the last two decades the idea of Semantic Web has received a great deal of attention An extensive body of knowledge has emerged to describe technologies that seek to help us create and use aspects of the Semantic Web Ontology and agent based technologies are understood to be the two important technologies here A large number of articles and a number of books exist to describe the use individually of the two technologies and the design of systems that use each of these technologies individually but little focus has been given on how one can sign systems that carryout integrated use of the two different technologies In this book we describe ontology and agent based systems individually and highlight advantages of integration of the two different and complementary technologies We also present a methodology that will guide us in the design of the integrated ontology based multi agent systems and illustrate this methodology on two use cases from the health and software engineering domain This book is organized as follows Chapter I Current issues and the need for ontologies and agents describes existing problems associated with uncontrollable information overload and explains how ontologies and agent based systems can help address these issues Chapter II Introduction to multi agent systems defines agents and their main characteristics and features including mobility communications and collaboration between different agents It also presents different types of agents on the basis of classifications done by different authors New Trends in System Reliability Evaluation K.B. Misra, 2012-12-02 The subject of system reliability evaluation has never been so extensively and incisively discussed as in the present volume The book fills a gap in the existing literature on the subject by highlighting the shortcomings of the current state of the art and focusing on on going efforts aimed at seeking better models improved solutions and alternative approaches to the problem of system reliability evaluation The book's foremost objective is to provide an insight into developments that are likely to revolutionize the art and science in the near future At the same time it will help serve as a benchmark for the reader not only to understand and appreciate the newer developments but to profitably guide him in reorienting his efforts This book will be valuable for people working in various industries research organizations particularly in electrical and electronics defence nuclear chemical space and communication systems It will also be useful for serious minded students teachers and for the laboratories of educational institutions **Management Information Systems** Raymond McLeod, 1998 This text enjoys a strong loyalty among instructors who adopt it Focusing on the role of managers within an organization the text emphasizes the development of computer based information systems to support an organization's objectives and strategic plans The General Systems Model is introduced in Chapter 6 and implemented throughout the rest of the text *ICT in Education*,
