THIRD LITERARY SUPPLEMENT

THE SEA COAST by J. A. Steers

"As our greatest authority on coastal topography never is better qualified than Professor Steers to write the natural history of our sea coast. This book is a complete study showing the contours, the evolution and origin of the cliffs, rocks, sea stacks, beaches and dunes, together with the plants and animals that support."
NATURALIST CLUB

BIRDS AND MEN by E. M. Nicholson

The Bird Life of British Towns, Villages, Gardens and Farmland "Explores a new subject and reveals themes: what exactly has been the impact of modern civilization upon bird life? A notable blend of high scholarship with graphic writing."
PRAIRIE

THE FULMAR (Special Volume) by James Fisher

"The species of British bird has never been monographed so completely as the Fulmar is in this splendid volume, and none can be a more worthy subject for so exhaustive a study. The author's researches have given us a book that is an example of scientific bird ornithology as no book. He is to be congratulated on successfully accomplishing this monumental work, which will be a standard for many years to come."

Ramos, Leonel Pereira, 2022-06-30 Seabirds are global travellers connecting oceans and seas all over the world and facing multiple threats at local and global scales Seabirds are long lived top predators reflecting changes at lower trophic levels and are good models to assess ecological changes produced by human societies Thus world wide collaborations are needed to understand seabird ecology and to develop effective conservation measures benefitting both humans and seabird populations This book provides a modern overview on seabird biodiversity studies it begins by covering the most up to date techniques to study seabirds and then focus on pragmatic issues related with interactions between seabirds and humans the use of seabirds as ecological indicators and conservation of seabirds It gives an updated insight on all these topics and highlights gaps that need further development for a comprehensive understanding of the relationships between seabirds and human actions This book covers the response of the seabird research community to a biodiversity crisis aiming to contribute towards
