

This is an unusual book. Its title suggests that it is a collection of essays about Donald Davidson's views on truth, meaning, and the mental. But the focus is really much more on Davidson as refracted through the lens of Ernie Lepore and Kirk Ludwig's two volumes, Davidson: Meaning, Truth, Language, and Reality (OUP 2005) and Davidson: Truth-theoretic Semantics (OUP 2007). The Lepore/Ludwig interpretation is, by my count, the direct focus of seven of the twelve papers. Moreover, the editor does not contribute an introduction to the volume, leaving the task instead to Lepore and Ludwig. The overall result is the sense of participating in an ongoing debate whose parameters are never made clear and that is taking place in something of a vacuum. We are told in the brief Preface that Lepore and Ludwig have provided "a new systematization of his philosophy of language, meaning, and thought" (vii), and Lepore and Ludwig themselves provide an overview of Davidson's work, but at no point is it explained just what Lepore and Ludwig are proposing, how it differs from standard interpretations of Davidson, and, most importantly, why getting Davidson right should matter to us.

Donald Davidson: Life and Words Maria Baghramian, 2013-09-13 Donald Davidson 1917 2003 was one of the most prominent philosophers of the second half of the twentieth century His thinking about language mind and epistemology has shaped the views of several generations of philosophers This book brings together articles by a host of prominent philosophers to provide new interpretations of Davidson s key ideas about meaning language and thought The book opens with short commemorative pieces by a wide range of people who knew Davidson well giving us glimpses into the life of a great philosopher a beloved husband and father a colleague teacher and friend The chapter by Lepore and Ludwig and the ensuing heated debate with Frederick Stoutland on how to interpret Davidson demonstrate why Davidson s legacy has become a disputed intellectual territory The chapters by Kathrin Gl er Peter Pagin Barry Smith James Higginbotham and William Child all eminent philosophers of language are prime examples of just one strand of this legacy while the piece by Sophie Gibb gives us an opening to Davidson s enormous contribution to philosophy of mind Donald Davidson *Life and Words* closes with a piece by Davidson himself first published in 1995 in the *International Journal of Philosophical Studies* where he brings together the various strands of his work in a Unified Theory of speech and action This book comprises key articles first published in the *International Journal of Philosophical Studies* and previously unpublished commemorative pieces and serves as a fitting dedication to the work and memory of a great philosopher *Seminar*, 1964 University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Authors & titles University of California (System). The Oxford Handbook of Meaning in Life Iddo Landau, 2022 Presents the first handbook and scholarly companion to meaning in life Discusses a very wide array of topics in meaning in life research some of which have never been discussed in the philosophical literature until this point Explores among numerous other topics meaning in life and achievement forgiveness gratitude death suicide suffering religion psychology and neuroscience Book jacket *The Spiritual Journal of Henry David Thoreau* Malcolm Clemens Young, 2009 Most people who care about nature cannot help but use religious language to describe their experience We can trace many of these conceptions of nature and holiness directly to influential nineteenth century writers especially Henry David Thoreau 1817 1862 In *Walden* he writes that God himself culminates in the present moment and that in nature we encounter the workman whose work we are But what were the sources of his religious convictions about the meaning of nature in human life **The Michel Henry Reader** Michel Henry, 2019-09-15

From beginning to end the philosophy of Michel Henry offers an original and profound reflection on life Henry challenges the conventional understanding of life as a set of natural processes and a general classification of beings Maintaining that our access to the meaning of life has been blocked by naturalism as well as by traditional philosophical assumptions Henry carries out an enterprise that can rightfully be called radical His phenomenology leads back to the original dimension of life to a reality that precedes and conditions the natural sciences and even objectivity as such The Michel Henry Reader is an indispensable resource for those who are approaching Henry for the first time as well as for those who are already familiar with his work It provides broad coverage of the major themes in his philosophy and new translations of Henry's most important essays Sixteen chapters are divided into four parts that demonstrate the profound implications of Henry's philosophy of life for phenomenology for subjectivity for politics art and language and for ethics and religion

Re-Reading the Age of Innovation Louise Kane, 2022-07-28 The period of 1830-1950 was an age of unprecedented innovation From new inventions and scientific discoveries to reconsiderations of religion gender and the human mind the innovations of this era are recorded in a wide range of literary texts Rather than separating these texts into Victorian or modernist camps this collection argues for a new framework that reveals how the concept of innovation generated forms of literary newness that drew novelists poets and other creative figures working across this period into dialogic networks of experiment The 14 chapters in this volume explore how inventions like the rotary print press or hot air balloon and emergent debates about science trade and colonialism evolved new forms and genres Through their examinations of a wide range of texts and writers from well known novelists like Conrad Dickens Hardy and Woolf to less canonical figures like Charlotte Mew Elsie Mar and Walter Francis White the chapters in this collection re-read these texts as part of an age of innovation characterized not by division and divide but by collaboration and community

The Humane Perspective John Cottingham, 2024-07-03 The book brings together fourteen essays from the work of John Cottingham on moral philosophy and the philosophy of religion spanning the past fifteen years The papers are closely related in so far as they all deal with the perennial moral and spiritual challenges of human existence and the search for meaning and value in human life As well as being thematically linked they also share a common style and methodology illustrating the distinctive goal that has increasingly informed the author's work in recent years that of promoting a more humane conception of philosophizing While in no way discarding the technical tools of the professional philosopher such as abstract argumentation and analysis whose value and importance are unquestionable this approach is notable for drawing on the full range of resources available to the human mind including those that depend on literary artistic poetic imaginative aesthetic and emotional modes of awareness In contrast to the model of the philosopher as a kind of detached scrutineer the essays exemplify the belief that there is a distinctive and valuable kind of philosophical understanding that requires a more involved and engaged stance The philosophical questions dealt in the volume all fall broadly within the familiar domains of moral philosophy and the philosophy of religion but the reflections offered on these

areas of human thought and practice always aim to be sensitive to how morality and religion actually operate in the lives of the human beings involved

Pathos and Praxis Scott Davidson, 2025-04
 Pathos and Praxis presents a new and original framework for an integrated phenomenology of life. It provides the first comparative study of two influential French philosophers, Paul Ricoeur and Michel Henry, and shows that their debates over the interpretation of Sigmund Freud and Karl Marx signal two rival approaches to the phenomenology of life. Author Scott Davidson demonstrates that while Henry reveals the phenomenological meaning of life through an inward turn to a pure subjective feeling of being alive, Ricoeur anchors its significance in the reciprocal interaction between the self and the world. But these two alternatives are not necessarily opposed. Pathos and Praxis proposes an integrated phenomenology of life to which both Henry and Ricoeur make an important contribution. To be a self is to suffer the pathos of having a life but also to be capable of engaging in the praxis of leading a life. By thinking the pathos and praxis of life together, the integrated approach preserves human agency against deterministic conceptions of life and at the same time avoids the meritocratic hubris that depicts one's life solely as the result of one's own doing. This integration of having and leading a life reframes our thinking about human capabilities and vulnerabilities in a way that has important implications for biopolitics and the ethics of life.
