

Types of Viruses

Helical viruses, like the Tobacco Mosaic Virus, which infects a number of different types of plants, have a slinky-shaped capsid that twists around and encloses its genetic material.

Polyhedral viruses, like adenoviruses, which are known to cause a range of illnesses from pink eye to pneumonia, are composed of genetic material surrounded by a many-sided capsid, usually with 20 triangular faces.

Spherical viruses, like the infamous Coronavirus, are essentially helical viruses enclosed in a membrane known as an envelope, which is spiked with sugary proteins that assist in sticking to and entering host cells.

Complex viruses, like bacteriophages, which infect and kill bacteria, resemble a lunar lander, and are composed of a polyhedral "head" and a helical body (or "tail sheath"), and legs (or "tail fibers") that attach to a cell membrane so that it can transfer its genetic material.

PC Viruses Alan Solomon,2012-12-06 PC viruses are not necessarily a major disaster despite what is sometimes written about them But a virus infection is at the very least a nuisance and potentially can lead to loss of data Quite often it is the user s panic reaction to discovering a virus infection that does more than the virus itself This book demystifies PC viruses providing clear accurate information about this relatively new PC problem It enables managers and PC users to formulate an appropriate response adequate for prevention and cure but not over the top Over 100 PC viruses and variants are documented in detail You are told how to recognise each one what it does how it copies itself and how to get rid of it Other useful and relevant technical information is also provided Strategies for dealing with potential and actual virus outbreaks are described for business academic and other environments with the emphasis on sensible but not unreasonable precautions All users of IBM PC or compatible computers from single machines to major LAN s will find this book invaluable All that is required is a working knowledge of DOS Dr Alan Solomon has been conducting primary research into PC viruses since they first appeared and has developed the best selling virus protection software Dr Solomon s Anti Virus Toolkit
