Possible Worlds in Humanities, Arts and Sciences Allén Sture,2010-11-22 No detailed description available for Possible Worlds in Humanities Arts and Sciences **The Empty Seashell** Nils Bubandt,2015-05-06 The Empty Seashell explores what it is like to live in a world where cannibal witches are undeniably real yet too ephemeral and contradictory to be an object of belief In a book based on more than three years of fieldwork between 1991 and 2011 Nils Bubandt argues that cannibal witches for people in the coastal and predominantly Christian community of Buli in the Indonesian province of North Maluku are both corporeally real and fundamentally unknowable Witches known as gua in the Buli language or as suanggi in regional Malay appear to be ordinary humans but sometimes especially at night they take other forms and attack people in order to kill them and eat their livers They are seemingly everywhere and nowhere at the same time The reality of gua therefore can never be pinned down The title of the book comes from the empty nautilus shells that regularly drift ashore around Buli village Convention has it that if you find a live nautilus you are a gua Like the empty shells witchcraft always seems to recede from experience Bubandt begins the book by recounting his own confusion and frustration in coming to terms with the contradictory and inaccessible nature of witchcraft realities in Buli A detailed ethnography of the encompassing inaccessibility of Buli witchcraft leads him to the conclusion that much of the anthropological literature which views witchcraft as a system of beliefs with genuine explanatory power is off the mark Witchcraft for the Buli people doesn t explain anything In fact it does the opposite it confuses obfuscates and frustrates Drawing upon Jacques Derrida s concept of aporia an interminable experience that remains continuously in doubt Bubandt suggests the need to take seriously people s experiential and epistemological doubts about witchcraft and outlines by extension a novel way of thinking about witchcraft and its relation to modernity **Natural History Collector: Hunt, Discover, Learn!** Michael Sanchez,2017-12-19 Loaded with hands on kid friendly projects Natural History Collector Hunt Discover Learn will teach budding nature collectors techniques for cleaning caring for and displaying discovered treasures Coming home from the beach or a walk in the woods with a fine collection of rocks shells pine cones and seed pods is easy The trick is knowing what to do with them once you get them back to your room The real fun comes from identifying preserving and displaying your treasures Natural History

Moore,Matthias Heilweck,Peter Petros,2022-03-26 This book presents a solutions based approach to reducing and removing CO2 from the atmosphere transforming it into solid crystalline CaCO3 through the ability of marine organisms such as molluscs crustacea corals and coccolithophore algae The overwhelming advantage of this approach is that it promises enhanced climate mitigation in comparison to planting forests industrial engineering carbon capture and storage process It also provides a sustainable food resource Furthermore it would improve the ocean s biodiversity at the same time as the excess atmospheric CO2 released by our use of fossil fuels is returned to the place it belongs as a present day fossil safely out of the atmosphere to the distant future If the level of finance and global effort that are readily foreseen for forest management and flue gas treatments were applied to expansion of global shellfish cultivation curative amounts of carbon dioxide could be permanently removed from the atmosphere within afew decades The concept presented in this book could have a profound influence on the life of the planet The World's Beaches Orrin H.
