Juslin, 2019-03-21. Can music really arouse emotions? If so, what emotions and how? Why do listeners respond with different emotions to the same piece of music? Are emotions to music different from other emotions? Why do we respond to fictional events in art as if they were real, even though we know they're not? What is it that makes a performance of music emotionally expressive? Based on ground-breaking research, *Musical Emotions Explained* explores how music expresses and arouses emotions and how it becomes an object of aesthetic judgments. Within the book, Juslin demonstrates how psychological mechanisms from our ancient past engage with meanings in music at multiple levels of the brain to evoke a broad variety of affective states, from startle responses to profound aesthetic emotions. He also explores why these mechanisms respond to music. Written by one of the leading researchers in the field, the book is richly illustrated with music examples from everyday life and explains with clarity and rigour the manifold ways in which music may engage our emotions. Advance praise: *Musical Emotions Explained* is a magnificent publication that has been painstakingly researched to illuminate the many varied ways music can express and arouse emotions. It provides the most authoritative single-authored text on the topic so far. As a highly readable and informative publication, it superbly unlocks the secrets of musical affect for experienced researchers through to lay readers alike. Gary E. McPherson, Ormond Chair of Music and Director, Melbourne Conservatorium of Music, Australia.

"Destined to Fail" Julia Eklund Koza, 2021-08-31 A little known fact about the prominent US psychologist and educator Carl E Seashore 1866 1949 is that he was deeply involved in the American eugenics movement He was among the US academics to support eugenics long before German Nazis embraced it A titan in a host of disciplines and a proponent of radical education reform Seashore used his positional power to promote a constellation of education reforms consistent with central precepts of eugenics Many of these reforms including tracking gifted and talented programs and high stakes standardized testing were adopted and remain standard practice in the United States today He promulgated the idea that musical talent is biologically inheritable and he developed the first standardized tests of musical talent these tests were used by early twentieth century researchers in their attempts to determine whether there are race differences in musical talent Seashore's ideas and work profoundly shaped music education's research trajectory as well as enduring commonsense beliefs about musical ability An intersectional analysis *Destined to Fail* focuses on the relationship between eugenics and Seashore's views on ability race and gender Koza concludes that Seashore promoted eugenics and its companion eutheletics because he was a true believer She also discusses the longstanding silences surrounding Seashore's participation in eugenics As a diagnosis and critique of the present *Destined to Fail* identifies resemblances and connections between past and present that illustrate the continuing influence of eugenics and the systems of reasoning that made early twentieth century eugenics imaginable and seem reasonable on education discourse and practice today It maps out

A Book of Discovery Margaret Synge, 2024-11-24 A BOOK OF DISCOVERY The History of the World's Exploration From the Earliest Times to the Finding of the South Pole A LITTLE OLD WORLD No story is complete unless it begins at the very beginning But where is the beginning Where is the dawn of geography the knowledge of our earth What was it like before the first explorers made their way into distant lands Every day that passes we are gaining fresh knowledge of the dim and silent past Every day men are patiently digging in the old heaps that were once the sites of busy cities and as a result of their unwearying toil they are revealing to us the life stories of those who dwelt therein they are disclosing secrets writ on weather worn stones and tablets bricks and cylinders never before even guessed at Thus we read the wondrous story of ancient days and breathlessly wonder what marvellous discovery will thrill us next For the earliest account of the old world a world made up apparently of a little land and a little water we turn to an old papyrus the oldest in existence which tells us in familiar words unsurpassed

for their exquisite poetry and wondrous simplicity of that great dateless time so full of mystery and awe In the beginning God created the heaven and the earth And the earth was waste and void and darkness was upon the face of the deep and the spirit of God moved upon the face of the waters And God said Let there be a firmament in the midst of the waters and let it divide the waters from the waters And God divided the waters which were under the firmament from the waters which were above the firmament And God said Let the waters under the heaven be gathered into one place and let the dry land appear And God called the dry land Earth and the gathering together of the waters called he Seas Thus beautifully did the children of men express their earliest idea of the world s distribution of land and water
