Security In The Boardroom:

Cyber Security in the Boardroom, 2015 Data is a company's greatest asset and as technology changes important data such as customer knowledge and product specifications are intrinsically linked to its IT infrastructure. Recent high profile events have shown that corporate espionage, hacking and internal factors such as employee carelessness with IT and IT infrastructure can quickly destroy a company's reputation and its market value. When Target's credit card and debit card systems were hacked, the personal information of over 70 million of its customers was breached, the company's market value fell, its CEO Gregg Steinhafel resigned, and institutional investors recommended that seven of the company's board members be removed. Boards of directors have a crucial role in setting risk tolerances and approving risk management within an organization. IT governance is one of the most pressing issues facing companies today, yet despite this, there remains a disconnect in knowledge and understanding between IT professionals and board members, hindering their ability to effectively manage cyber risks. Directors need to be thorough in overseeing cyber risk as part of their IT governance oversight. As the number of digital attacks increases, the need for cyber literacy in the boardroom could not be more vital. Unfortunately, many boardrooms today don't have the skills or experience needed in this area. *How to Drive Cyber*

Security from the Boardroom and Get Results Mark de Rijk, 2018-11 **Security in the Boardroom** Mark S. A. Smith, 2005-01-01. Written with the nontechnical manager in mind, this book advises readers on the questions to ask and the issues to examine when their technology teams consider security for their companies. **The Shortest Hour** Lee

Parrish, 2024-07-18. Independent directors of corporate boards understand the importance of cyber security as a business issue. Increased regulatory requirements, the onslaught of breaches, as well as the replacement of the corporate network perimeter with more third party partnerships, have all contributed to cyber security rising to the top of enterprise risks. Yet many directors only receive a few brief cyber security updates during the year. Moreover, many directors have devoted their careers to other important business disciplines and may not fully grasp the technical concepts of cyber security. The challenge is that many publications on board cyber security governance address the topic at such a high level that it removes the important context of the cyber security details or covers the topic too deeply with hard to understand technical language. These resources may often provide lists of security questions for directors to ask of their management team, but they do not provide the answers to the questions so that actionable oversight can be performed. What I would have wanted and why you are probably reading this book summary is a resource that delivers the questions to ask but also provides the answers and in a narrative, easy to understand style. An award winning Chief Information Security Officer with over two decades of working with multiple Fortune 500 boards, Lee Parrish provides an example laden vision to improve cyber security governance in the boardroom. Additionally, Lee deciphers the technical jargon to increase the reader's cyber fluency, not to make you a cyber expert but to help you be able to ask direct questions, understand the answers provided, challenge strategies and advise on

important cyber decisions Pick up your copy of *The Shortest Hour An Applied Approach to Boardroom Governance of Cyber Security* today and start your journey on achieving more effective cyber security oversight Want to learn more Please visit www.novelsecurity.com **The Cyber-Elephant in the Boardroom** Mathieu Gorge,2021-03 We've all read the

cybersecurity horror stories a prominent company exposes the private information of their customers only to scramble after the fact to apologize and safeguard the data Cybersecurity is often an afterthought a much lower priority than profit until a data breach threatens the bottom line anyway In *The Cyber Elephant in the Boardroom* data security expert and CEO Mathieu Gorge along with a host of guests shows why protecting a company's data should be top of mind for C suites and corporate boards With the innovative 5 Pillars of Security Framework any C level executive can understand their organization's cyber risk and the steps they need to take to protect their information There's a cyber elephant in the boardroom and it needs to be addressed **Women in Security** Debra A.
