Security Communities:

Security Communities Emanuel Adler, Michael Barnett, 1998-10-28 This book argues that community can exist at the international level and that security politics is profoundly shaped by it with states dwelling within an international community having the capacity to develop a pacific disposition By investigating the relationship between international community and the possibility for peaceful change this book revisits the concept first pioneered by Karl Deutsch security communities Leading scholars examine security communities in various historical and regional contexts in places where they exist where they are emerging and where they are hardly detectable Building on constructivist theory the volume is an important contribution to international relations theory and security studies attempting to understand the conjunction of transnational forces state power and international organizations that can produce a security community Security Communities and

their Neighbours A. Bellamy, 2004-08-31 Does the proliferation of security communities around the world presage a new era of competition between regions or an era of intensified global integration This important new study assesses the relationship between security communities and their neighbours and asks whether processes of regional integration will contribute to a global clash of civilizations Drawing on four detailed case studies Western Europe Southeast Asia the Persian Gulf and North America Alex J Bellamy argues that the more mature a security community becomes the less likely it is to become a regional fortress **Reimagining Security Communities** Francis Onditi, Gilad Ben-Nun, Edmond M. Case of the Trilateral Strategic Dialogue Hauke Kleivinghaus, 2012-11-27 Diploma Thesis from the year 2010 in the subject South Asian Studies South Eastern Asian Studies grade 1 3 University of Duisburg Essen Institut f r Ostasienwissenschaften language English abstract This study is an exploration and analysis of the ideational drivers of the Trilateral Strategic Dialogue TSD that was concluded in March 2006 between Japan Australia and the United States Turning away from materialist explanations of security cooperation the questions of this study are Can the conclusion of the TSD and its subsequent evolution be accounted for by a perceived collective identity between the three countries And what is the Japanese Government's motivation to expand its alliances architecture The last decade provides the timeframe for a qualitative analysis The findings of this study show that the agreement and its following deepening is the result of a strong collective identity constituted by shared norms and democratic values Moreover Japan targets with the United States and
