**Science and Politics** Brent S. Steel, 2014-04-21 Recent partisan squabbles over science in the news are indicative of a larger tendency for scientific research and practice to get entangled in major ideological divisions in the public arena This politicization of science is deepened by the key role government funding plays in scientific research and development the market leading position of U S based science and technology firms and controversial U S exports such as genetically modified foods or hormone injected livestock This groundbreaking one volume A to Z reference features 120 150 entries that explore the nexus of politics and science both in the United States and in U S interactions with other nations The essays each by experts in their fields examine Health environmental and social cultural issues relating to science and politics Concerns relating to government regulation and its impact on the practice of science Key historical and contemporary events that have shaped our contemporary view of how science and politics intersect

**Science and Politics** An A to Z Guide to Issues and Controversies is a must have resource for researchers and students who seek to deepen their understanding of the connection between science and politics

**Trading in Genes** Ricardo Melendez-Ortiz, 2013 Few scientific developments have given rise to as much controversy as biotechnology Numerous groups are united in their opposition expressing concern over environmental and health risks impacts on rural livelihoods the economic dominance of multinational companies and the ethical implications of crossing species boundaries Among the supporters of the technology are those that believe in its potential to enhance food security further economic development

increase productivity and reduce environmental pressures As a result countries and sectors within countries find themselves at odds with each other while potential opportunities for development offered by the use of biotechnology are seized or missed and related risks go unmanaged This book a unique interdisciplinary collection of perspectives from the developing world examines the ongoing debate Writing for the International Centre for Trade and Sustainable Development leading experts address issues such as diffusion of technology intellectual property rights the Cartagena Protocol impacts of international trade capacity building and biotechnology research and regulation With the most recent and relevant examples from around the world Trading in Genes offers the reader a single volume overview of the connections between biotechnology trade and sustainability that is both wide ranging and thorough

**Environmental Decision-Making in Context** Chad J. McGuire, 2017-09-25 Because of the complexity involved in understanding the environment the choices made about environmental issues are often incomplete In a perfect world those who make environmental decisions would be armed with a foundation about the broad range of issues at stake when making such decisions Offering a simple but comprehensive understanding of the critical roles science economics and values play in making informed environmental decisions Environmental Decision Making in Context A Toolbox provides that foundation The author highlights a primary set of intellectual tools from different disciplines and places them into an environmental context through the use of case study examples The case studies are designed to stimulate the analytical reasoning required to employ environmental decision making and ultimately help in establishing a framework for pursuing and solving environmental questions issues and problems They create a framework individuals from various backgrounds can use to both identify and analyze environmental issues in the context of everyday environmental problems The book strikes a balance between being a tightly bound academic text and a loosely defined set of principles It takes you beyond the traditional pillars of academic discipline to supply an understanding of the fundamental aspects of what is actually involved in making environmental decisions and building a set of skills for making those decisions

**Genetically Modified Organisms and Biosafety** Tomme R. Young, 2004 Biosafety and genetically modified organisms GMOs are amongst the most complex of biodiversity issues from species conservation to sustainable livelihoods to socio cultural policy The greatest GMO related need shared by all decision makers governmental civil society and industrial is for unbiased background information and a framework for evaluating new evidence This detailed background analysis aims to enable IUCN and its Members determine how they should advance leadership research analysis and dissemination of knowledge regarding the potential ecological impact of the release of genetically modified organisms into the environment focusing especially on biodiversity socio economic impact and food security

*Saving Seeds* Bonwoo Koo, Philip G. Pardey, Brian Wright, 2003-12-01 The conservation of genetic resources is vital to the maintenance of biodiversity and to the world's ability to feed its growing population There are now more than a thousand genebanks worldwide involved in the ex situ meaning away from the source storage of particular classes of crops Since the 1970s the eleven genebanks maintained by the centres of the Consultative Group on International Agricultural Research CGIAR have become pivotal to the global conservation effort However key policy and management issues usually with economic dimensions have largely been overlooked This provided the impetus for a series of detailed economic studies led by IFPRI in collaboration with five CGIAR centres CIAT based in Colombia CIMMYT Mexico ICARDA Syria ICRISAT India and IRRI Philippines This book reports these studies and discusses their wider implications

*Bioscience Entrepreneurship In Asia: Creating Value With Biology* Paul S Teng, 2008-07-29 When matched with Asian mega trends in culture demographics and economics BioScience products provide huge potential for exploitation and value creation in the coming years This potential will be further enhanced by the declining capacity of the world's oil reserves to provide hydrocarbons for fuel and materials and plants will become more important as bio factories for basic ingredients to sustain human societies Successful business models have been developed to harness the potential of BioScience to meet the demands for food feed and organochemicals based on value creation and value capture mechanisms These mechanisms are described in the book with real world case studies As BioScience applications become more basic in nature product development has increased in its complexity and requires special attention to obtain freedom to operate Controversy about novel gene technologies threatens to derail the BioScience Revolution as public concern about safety issues and bioethics are fuelled by opposition groups to the new biology This book describes communication techniques and messages to address such concerns and shows how early education programs can have high payoffs for companies that invest in novel products
