Seeing Gardens:

Seeing Gardens Sam Abell, 2008-10 For 30 years Sam Abell has traveled the world paying attention to the beauty of gardens In words and photographs this book chronicles his travels and the discoveries he makes seeing gardens in all settings expected and unexpected it all adds up to an original view of life published here for the first time where all the earth is seen as a garden As befits a book that melds two visual arts *Seeing Gardens* lets its 150 pictures speak for themselves with a spare text that offers context rather than commentary The book is at once thoughtful and elegant and the anecdotes recollections and aesthetic philosophy amount to a brief but telling memoir of Abell s three decades of interpreting gardens

Gardens Robert Pogue Harrison, 2008-11-15 Humans have long turned to gardens both real and imaginary for sanctuary from the frenzy and tumult that surrounds them Those gardens may be as far away from everyday reality as Gilgamesh s garden of the gods or as near as our own backyard but in their very conception and the marks they bear of human care and cultivation gardens stand as restorative nourishing necessary havens With *Gardens* Robert Pogue Harrison graces readers with a thoughtful wide ranging examination of the many ways gardens evoke the human condition Moving from the gardens of ancient philosophers to the gardens of homeless people in contemporary New York he shows how again and again the garden has served as a check against the destruction and losses of history The ancients explains Harrison viewed gardens as both a model and a location for the laborious self cultivation and self improvement that are essential to serenity and enlightenment an association that has continued throughout the ages The Bible and Qur an Plato s Academy and Epicurus s Garden School Zen rock and Islamic carpet gardens Boccaccio Rihaku Capek Cao Xueqin Italo Calvino Ariosto Michel Tournier and Hannah Arendt all come into play as this work explores the ways in which the concept and reality of the garden has informed human thinking about mortality order and power Alive with the echoes and arguments of Western thought *Gardens* is a fitting continuation of the intellectual journeys of Harrison s earlier classics *Forests* and *The Dominion of the Dead* Voltaire famously urged us to cultivate our gardens with this compelling volume Robert Pogue Harrison reminds us of the nature of that responsibility and its enduring importance to humanity I find myself completely besotted by a new book titled *Gardens An Essay on the Human Condition* by Robert Pogue Harrison The author is one of the very best cultural critics at work today He is a man of deep learning immense generosity of spirit passionate curiosity and manifold rhetorical gifts Julia Keller Chicago Tribune This book is about gardens as a metaphor for the human condition Harrison draws freely and with brilliance from 5 000 years of Western literature and criticism including works on philosophy and garden history He is a careful as well as an inspiring scholar Tom Turner Times Higher Education When I was a student my Cambridge supervisor said in the Olympian tone characteristic of his kind that the only living literary critics for whom he would sell his shirt were William Empson and G Wilson Knight Having spent the subsequent 30 years in the febrile world of academic Lit Crit I m not sure that I d sell my shirt for any living critic But if there had to be one it would unquestionably be Robert Pogue

Harrison whose study *Forests The Shadow of Civilization* published in 1992 has the true quality of literature not of criticism it stays with you like an amiable ghost long after you read it Though more modest in scope this new book is similarly destined to become a classic It has two principal heroes the ancient philosopher Epicurus and the wonderfully witty Czech writer Karel Capek apropos of whom it is remarked that whereas most people believe gardening to be a subset of life gardeners including Capek understand that life is a subset of gardening Jonathan Bate *The Spectator* **In Gardens** Udo Weilacher,2005-05-24 The past decade has witnessed new interpretations of the great themes of traditional European garden art in profusion Drawing on his intensive studies of some 30 influential European projects Udo Weilacher presents a panorama of the most significant developments since the publication of his groundbreaking work *Between Landscape Architecture and Land Art* in 1996 Examples of the cooperation between landscape designers and architects are given special attention in case studies taken from the United Kingdom the Netherlands France Spain Denmark Germany and Switzerland In addition US landscape designer Kathryn Gustafson artists such as Dani Karavan and the architectural theorist Charles Jencks are featured along with their European works **Seeing Gardens** CENGAGE Learning,2001-05 *Gardens, Landscape, and Vision in the Palaces of Islamic Spain* ,2000 **The Pleasure Gardens of Virginia** Peter Martin,2017-03-14 Using a rich assortment of illustrations and biographical sketches Peter Martin relates the experiences of colonial gardeners who shaped the natural beauty of Virginia s wilderness into varied displays of elegance He shows that ornamental gardening was a scientific aesthetic and cultural enterprise that thoroughly engaged some of the leading figures of the period including the British governors at Williamsburg and the great plantation owners George Washington Thomas Jefferson William Byrd and John Custis In presenting accounts of their gardening efforts Martin reveals the intricacies of colonial garden design plant searches experimentation and the problems in adapting European landscaping ideas to local climate These writings also bring to life the social and commercial interaction between Williamsburg and the plantations together with early American ideas about cultured living While placing Virginia s gardening in the larger context of the colonial South Martin tells a very human story of how this art both influenced and reflected the quality of colonial life As Virginia grew economically and culturally the garden became a projection of the gardener s personal identity as exemplified by the endeavors of Washington and Jefferson at Mount Vernon and Monticello In order to recapture the gardens as they existed in colonial times Martin brings together paintings drawings and the findings of modern archaeological excavations Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 Healing Gardens Clare Cooper Marcus,Marni

Barnes,1999-06-15 Although the healing qualities of nature have been recognized and relied on for centuries as a valuable part of convalescence recent history has seen nature s therapeutic role virtually eclipsed by the technological dominance of modern medicine As the twentieth century comes to a close and the medical community reacknowledges the importance of the environment to recovery the healing garden is emerging as a supplement to drug or technology based treatments Healing Gardens celebrates this renewed interest in nature as a catalyst for healing and renewal by examining the different therapeutic benefits of healing gardens and offering essential design guidance from experts in the field Unique and comprehensive Healing Gardens provides up to date coverage of research findings relevant design principles and approaches and best practice examples of different types of healing gardens It begins by exploring what current research reveals about the connection between nature human stress reduction and medical outcomes It then presents case studies and design guidelines for outdoor spaces in medical settings that include general psychiatric and children s hospitals as well as hospices nursing homes and Alzheimer s facilities Historical information literature reviews and studies on use are included for each type of outdoor space covered offering important insights into what works in healing gardens and what doesn t Generously supplemented with photographs site plans anecdotes and more Healing Gardens is an invaluable practical guide for landscape architects and others involved in creating and maintaining medical facilities and an extremely useful reference for those responsible for patient care A unique and comprehensive look at the therapeutic effects and design of healing gardens For more and more people the shortest road to recovery is the one that leads through a healing garden Combining up to date information on the therapeutic benefits of healing gardens with practical design guidance from leading experts in the field Healing Gardens is an important resource for landscape architects and others working in this emerging area With the help of site plans photographs and more it presents design guidelines and case studies for outdoor spaces in a range of medical settings including Acute care general hospitals Psychiatric hospitals Children s hospitals Nursing homes Alzheimer s facilities Hospices

Bourgeois and Aristocratic Cultural Encounters in Garden Art, 1550-1850 Michel Conan,2002 Developments in garden art cannot be isolated from the social changes upon which they either depend or have some bearing Bourgeois and Aristocratic Cultural Encounters in Garden Art 1550 1850 offers an

unparalleled opportunity to discover how complex relationships between bourgeois and aristocrats have led to developments in garden art from the Renaissance into the Industrial Revolution irrespective of stylistic differences These essays show how garden creation has contributed to the blurring of social boundaries and to the ongoing redefinition of the bourgeoisie and the aristocracy Also illustrated is the aggressive use of gardens by bourgeois in more or less successful attempts at subverting existing social hierarchies in renaissance Genoa and eighteenth century Bristol England as well as the opposite as demonstrated by the king of France Louis XIV who claimed to rule the arts but imitated the curieux fleuristes a group of amateurs from diverse strata of French society Essays in this volume explore this complex framework of relationships in diverse settings in Britain France Biedermeier Vienna and renaissance Genoa The volume confirms that gardens were objects of conspicuous consumption but also challenges the theories of consumption set forth by Thorstein Veblen and Pierre Bourdieu and explores the contributions of gardens to major cultural changes like the rise of public opinion gender and family relationships and capitalism Garden history then informs many of the debates of contemporary cultural history ranging from rural management practices in early seventeenth century France to the development of a sense of British pride at the expansive Vauxhall Gardens favored equally by the legendary Frederick Prince of Wales and by the teeming London masses This volume amply demonstrates the varied and extensive contributions of garden creation to cultural exchange between 1550 and 1850 Publisher's description
