Selected Bibliography on Urban Climate. Prep. by T(ony) J(ohn) Chandler ,1970 **Selected Bibliography on Urban Climate** Tony John Chandler,1970 **Urban Climates** T. R. Oke,G. Mills,A. Christen,J. A. Voogt,2017-09-14 Urban Climates is the first full synthesis of modern scientific and applied research on urban climates The book begins with an outline of what constitutes an urban ecosystem It develops a comprehensive terminology for the subject using scale and surface classification as key constructs It explains the physical principles governing the creation of distinct urban climates such as airflow around buildings the heat island precipitation modification and air pollution and it then illustrates how this knowledge can be applied to moderate the undesirable consequences of urban development and help create more sustainable and resilient cities With urban climate science now a fully fledged field this timely book fulfills the need to bring together the disparate parts of climate research on cities into a coherent framework It is an ideal resource for students and researchers in fields such as climatology urban hydrology air quality environmental engineering and urban design **EPA-600/5** ,1973-11

Climates and Societies - A Climatological Perspective M. Yoshino,Manfred Domrös,Annick Douguédroit,J. Paszynski,L.C. Nkemdirim,2013-06-29 The impact of climate on human activities and the effect of humans on cli mate are two of the most important areas of inquiry in climatology These interactions conducted through physical chemical and biological process es were described as early as Roman and Greek times Marcus Vitruvius 75 25 B C a famous Roman engineer and architect made the following observation about the climatic conditions necessary for founding a city Land ideal for the health is slightly elevated and there should be neither fog nor frost The direction of the slope and the distance to the swamps lakes and beaches must also be considered The prevailing wind directions observed by a wind tower at the center of the city like Horologium at Athens should be taken into consideration in city planning The main and narrow streets should be placed in

the middle angle of the two prevailing wind directions Then the location of the Pantheons and squares should be decided The influence of humans on climate was a major subject for discussion in the 19th century inspired in part by the rapid industrial growth and expanding deforestation of the time D L Howard wrote brilliant pieces on the climate of London in the 1830s while G P Marsh discussed the effects of forests on precipitation in the U S A in the second half of the 19th century **The Quality of the Urban Environment** Harvey S. Perloff, 2015-06-03 The quality of the environment in which people live work and play influences to no small degree the quality of life itself The environment can be satisfying and attractive and provide scope for individual development or it can be poisonous irritating and stunting The papers in this volume first published in 1969 are concerned with the urban environment in which the majority of Americans live or more accurately with the environment of urbanites for the concern extends to outlying areas where urban dwellers visit and play The chapters aim to provide a better understanding of the natural resource elements in the urban environment and will be of interest to students of environmental studies and human geography
