Designing the French Interior Anca I. Lasc, Georgina Downey, Mark Taylor, 2015-10-22 *Designing the French Interior* traces France's central role in the development of the modern domestic interior from the pre-revolutionary period to the 1970s and addresses the importance of various media including drawings, prints, pattern books, illustrated magazines, department store catalogs, photographs, guidebooks, and films in representing and promoting French interior design to a wider audience. Contributors to this original volume identify and historicize the singularity of the modern French domestic interior as a generator of reproducible images, a site for display of both highly crafted and mass-produced objects, and the direct result of widely circulated imagery in its own right. This important volume enables an invaluable new understanding of the relationship between architecture, interior spaces, material cultures, mass media, and modernity. **Your Private Sky** Richard Buckminster Fuller, 2001 This title, which complements the volume *Your Private Sky: The Art of Design Science* (see page 44), gives an authentic insight into the development of Fuller's architectonic, technical, anthropological concepts. Fuller was the epitome of the poet as engineer, the thinker as designer, the artist as researcher. He left behind a voluminous quantity of writing, including texts of visionary importance, penetrating linguistic force, as well as of urgent topicality. The book documents various aspects of Fuller's widely respected texts. These testaments were intended to be shared with the whole world, or as Fuller coined it in 1950 with *Spaceship Earth* 3 7643 6072 0. **The Modern Steel House** Neil Jackson, 2016-03-23 This book provides a comprehensive survey of Modern Movement houses constructed with steel frames. Arranged chronologically and thematically, it traces the development over the last seventy years of steel houses in Europe, Australia, and the United States, with special reference to London, Paris, Sydney, and Los Angeles, and to the work elsewhere of Mies van der Rohe, Philip Johnson, and Jean Prouvé. Examples of steel houses from around the world demonstrate that steel structures can provide a better quality of life within a cleaner, lighter home environment. **Le Monde de Michel Tremblay** André Brochu, 1993 Vingt-cinq collaborateurs G. David, S. L. Pine, L. Mailhot, P. Popovic, etc. *Études de pi ces tudes du cycle romanesque* essais, biobibliographie, p. 447-448. Selon l'auteur, il s'agit de la première exploration en profondeur de l'écriture du prolifiquecrivain montréalais. Une cinquantaine d'illustrations. Recommandé SDM. **La maison suspendue** Paul Nelson, 1939. [Hey Baby! What's Your Name?](#) Shandley McMurray, 2010-01-18 Unique in the marketplace, *Hey Baby! 194X Andrew Michael Shanken,2009 During the Second World War American architecture was in a state of crisis The rationing of building materials and restrictions on nonmilitary construction continued the privations that the profession had endured during the Great Depression At the same time the dramatic events of the 1930s and 1940s led many architects to believe that their profession and society itself would undergo a profound shift once the war ended with private commissions giving way to centrally planned projects The magazine Architectural Forum coined the term 194X to encapsulate this wartime vision of postwar architecture and urbanism In a major study of American architecture during World War II Andrew M Shanken focuses on the culture of anticipation that arose in this period as out of work architects turned their energies from the built to the unbuilt redefining themselves as planners and creating original designs to excite the public about postwar architecture Shanken recasts the wartime era as a crucible for the intermingling of modernist architecture and consumer culture Challenging the pervasive idea that corporate capitalism corrupted the idealism of modernist architecture in the postwar era 194X shows instead that architecture s wartime partnership with corporate American was founded on shared anxieties and ideals Business and architecture were brought together in innovative ways as shown by Shanken s persuasive reading of magazine advertisements for Revere Copper and Brass U S Gypsum General Electric and other companies that prominently featured the work of leading progressive architects including Louis I Kahn Eero Saarinen and Walter Gropius Although the unexpected prosperity of the postwar era made the architecture of 194X obsolete before it could be built and led to its exclusion from the story of twentieth century American architecture Shanken makes clear that its anticipatory rhetoric and designs played a crucial role in the widespread acceptance
