Mathematical Economics Of Multilevel Optimisation Theory And Application:

Mathematical Economics of Multi-Level Optimisation Sardar M.N. Islam, 2012-12-06 Since there exists a multi level policy making system in the market economies choices of decision makers at different levels should be considered explicitly in the formulation of sectoral plans and policies To support the hypothesis a theoretical energy planning approach is developed within the framework of the theory of economic policy planning policy systems analysis and multi level programming The Parametric Programming Search Algorithm has been developed On the basis of this theoretical model an Australian Energy Policy System Optimisation Model AEPSOM has been developed and is used to formulate an Australian multi level energy plan *Integrated Uncertainty in Knowledge Modelling and Decision Making* Hirosato Seki, Canh Hao Nguyen, Van-Nam Huynh, Masahiro Inuiguchi, 2019-03-18 This book constitutes the refereed proceedings of the 7th International Symposium on Integrated Uncertainty in Knowledge Modelling and Decision Making IUKM 2019 held in Nara Japan in March 2019 The 37 revised full papers presented were carefully reviewed and selected from 93 submissions The papers deal with all aspects of uncertainty modelling and management and are organized in topical sections on uncertainty management and decision support econometrics machine learning machine learning applications and statistical methods

James H. Meisel, K. Puttaswamaiah, 2020-10-11 The world is increasingly concerned with bridging the developmental gap between the developed and developing countries With the establishment of a number of institutions for funding the projects including the World Bank Asian Development Bank and many other agencies the need to develop mechanisms to assess economically viable projects is more important than ever The Social Cost Benefit Analysis SCBA is an important technique used in formulating appraising and evaluating projects It is a facet of applied welfare economics which is increasingly being used to identify and assess public projects in both developing and developed countries This volume presents a comprehensive view of cost benefit analysis in its theoretical and applied dimensions Both theory and case studies are presented The theoretical setting for Cost Benefit Analysis is established by the first five chapters Spatial General Equilibrium and Cost

Nonlinear Multiobjective Optimization Kaisa Miettinen, 2012-12-06 Problems with multiple objectives and criteria are generally known as multiple criteria optimization or multiple criteria decision making MCDM problems So far these types of problems have typically been modelled and solved by means of linear programming However many real life phenomena are of a nonlinear nature which is why we need tools for nonlinear programming capable of handling several conflicting or incommensurable objectives In this case methods of traditional single objective optimization and linear programming are not enough we need new ways of thinking new concepts and new methods nonlinear multiobjective optimization Nonlinear Multiobjective Optimization provides an extensive up to date self contained and consistent survey review of the literature and of the state of the art on nonlinear deterministic multiobjective optimization its methods its theory and its background The

amount of literature on multiobjective optimization is immense The treatment in this book is based on approximately 1500 publications in English printed mainly after the year 1980 Problems related to real life applications often contain irregularities and nonsmoothnesses The treatment of nondifferentiable multiobjective optimization in the literature is rather rare For this reason this book contains material about the possibilities background theory and methods of nondifferentiable multiobjective optimization as well This book is intended for both researchers and students in the areas of applied mathematics engineering economics operations research and management science it is meant for both professionals and practitioners in many different fields of application The intention has been to provide a consistent summary that may help in selecting an appropriate method for the problem to be solved It is hoped the extensive bibliography will be of value to researchers
