Stull, 1990-01-01 **Mathematical Models in Marketing** Ursula H. Funke, 2013-04-17 Mathematical models can be classified in a number of ways e g static and dynamic deterministic and stochastic linear and nonlinear individual and aggregate descriptive predictive and normative according to the mathematical technique applied or according to the problem area in which they are used In marketing the level of sophistication of the mathematical models varies considerably so that a number of models will be meaningful to a marketing specialist without an extensive mathematical background To make it easier for the nontechnical user we have chosen to classify the models included in this collection according to the major marketing problem areas in which they are applied Since the emphasis lies on mathematical models we shall not as a rule present statistical models flow chart models computer models or the empirical testing aspects of these theories We have also excluded competitive bidding inventory and transportation models since these areas do not form the core of the marketing field *Marketing* Joel R.
