Teaching Mathematics as to be Meaningful - Foregrounding Play and Children's Perspectives Hanna Palmér, Camilla Björklund, Elin Reikerås, Jessica Elofsson, 2023-10-29 This open access book's theme is Teaching mathematics as to be meaningful foregrounding children's play and perspectives It discusses the relation between teachers children and mathematical content within the context of play with a particular focus on the framing of these relations within

this context which is an important theme in the debate on whether teaching should be integrated with or separated from children's play. The work further addresses meaningfulness in the learning process particularly from the child's perspective. Globally most guidelines and curricula for early childhood education mention play as one of the key features for young children's learning. Still there are quite different views on the definitions of play and in what ways play should become part of children's learning. The chapters of the book mirror the research topics presented at the fifth POEM conference in May 2022 divided into four sub themes: Play and learning; Children's perspectives on mathematics; Teachers' competencies and Theorizing aspects of early mathematics education. *Mathematics Education in the Early Years* Martin Carlsen, Ingvald Erfjord, Per Sigurd Hundeland, 2020-03-13. This book gives insights in the vivid research area of early mathematics learning. The collection of selected chapters mirrors the research topics presented at the fourth POEM conference in May 2018. Thematically the volume reflects the importance of this evolving area of research which has begun to attract attention in the spheres of education and public policy due to increased interest in early years learning. The research foci of the chapters comprise children's mathematical reasoning, early years mathematics teaching and the role of parents for children's mathematical development. The 2018 conference included a wider range of researchers than previous years. *Second Grade Geometry Success (Sylvan Workbooks)* Sylvan Learning, 2011-01-18. A solid foundation of basic geometry skills is essential for early success in math. Children who have a solid understanding of two and three dimensional shapes, symmetry, patterns and location concepts will be ready for the challenges of mathematics as they advance to more complex topics. The activities in this workbook are designed to help your children catch up, keep up and get ahead. Best of all they'll have lots of fun doing it. Some of the great features you'll find inside are: Neighborhood Walk: After practicing shapes, children walk through the house yard or neighborhood finding things shaped like circles, rectangles, triangles and octagons. Later they look for spheres, rectangular prisms, cylinders and cones. Robot Repair: Children draw a line from each robot head to a correct body or from each robot to its missing parts by distinguishing the shapes. Farm Fences: Farmer Green wants to put fences around all of the animal areas of his farm. Children calculate the perimeter of the areas to determine how much fencing material Farmer Green needs to buy. Dance Floor: Robin and Roscoe are looking for a light up dance floor for their dance party. All of the dance floors have the same area so children help determine the one with the largest perimeter. Plus Game Pieces: The workbook includes pentomino pieces, pattern blocks and tangram pieces for children to cut out and use with games, make patterns and solve tangram puzzles. Give your child's confidence in math a boost with 2nd Grade Geometry Success.
