Mating Mind How The Sexual Choice Shaped The Evolution Of Human Nature:

The Mating Mind Geoffrey Miller, 2011-12-21 At once a pioneering study of evolution and an accessible and lively reading experience a book that offers the most convincing and radical explanation for how and why the human mind evolved Consciousness morality creativity language and art these are the traits that make us human Scientists have traditionally explained these qualities as merely a side effect of surplus brain size but Miller argues that they were sexual attractors not side effects He bases his argument on Darwin's theory of sexual selection which until now has played second fiddle to Darwin's theory of natural selection and draws on ideas and research from a wide range of fields including psychology economics history and pop culture Witty powerfully argued and continually thought provoking **The Mating Mind** is a landmark in our understanding of our own species

How Women Got Their Curves and Other Just-So Stories David P. Barash, Judith Eve Lipton, 2009 The authors demonstrate the pleasure of using evolutionary theory to help make sense of some puzzling aspects of the anatomy physiology and behaviour of women

Decoding Love Andrew S. Trees, 2009 Fairy tales and romantic stories have shaped our thinking about relationships for centuries Researchers today are making fascinating and often shocking discoveries about how why and when we choose our partners

Not So Weird After All Rosemary L. Hopcroft, Martin Fieder, Susanne Huber, 2024-03-26 This is the first book to fully examine from an evolutionary point of view the association of social status and fertility in human societies before during and after the demographic transition In most nonhuman social

species social status or relative rank in a social group is positively associated with the number of offspring with high status individuals typically having more offspring than low status individuals. However, humans appear to be different. As societies have gotten richer, fertility has dipped to unprecedented lows, with some developed societies now at or below replacement fertility. Within rich societies, women in higher income families often have fewer children than women in lower income families. Evolutionary theory suggests that the relationship between social status and fertility is likely to be somewhat different for men and women, so it is important to examine this relationship for men and women separately. When this is done, the positive association between individual social status and fertility is often clear in less developed, pre-transitional societies, particularly for men. Once the demographic transition begins, it is elite families, particularly the women of elite families, who lead the way in fertility decline. Post-transition, the evidence from a variety of developed societies in Europe, North America, and East Asia is that high status men, particularly men with high personal income, do have more children on average than lower status men. The reverse is often true of women, although there is evidence that this is changing in Nordic countries. The implications of these observations for evolutionary theory are also discussed. This book will be of interest to students and researchers in the social sciences with an interest in evolutionary sociology, evolutionary anthropology, evolutionary psychology, demography, and fertility.

Cultural Transmission Ute Schönplüg, 2008-11-10. *Cultural Transmission* covers psychological, developmental, social, and methodological research on how cultural information is socially transmitted from one generation to the next within families. Studying processes of cultural transmission may help analyze the continuity or change of cultures, including those that have to cope with migration or the collapse of a political system. An evolutionary perspective is elaborated in the first part of the book; the second takes a cross-cultural perspective by presenting international research on development and intergenerational relations in the family; the third provides intra-cultural analyses of mechanisms and methodological aspects of cultural transmission. Made up of contributions by experts in the field, this source book is intended for anyone with interests in cultural issues, especially researchers and teachers in disciplines such as psychology, social and behavioral sciences, and education, and for applied professionals in culture management and family counseling, as well as professionals dealing with migrants.

Language and Music as Cognitive Systems Patrick Rebuschat, 2012. The past 15 years have witnessed an increasing interest in the comparative study of language and music as cognitive systems. This book presents an interdisciplinary study of language and music, exploring the following core areas: structural comparisons, evolution, learning and processing, and neuroscience.

Evolutionary Psychology, Public Policy and Personal Decisions Charles Crawford, Catherine Salmon, 2004-05-20. This volume's aim is to start the process of using theory and findings of evolutionary psychology to help make the world a better place to live. Taking evolutionary psychology explicitly into applied areas, it includes a reasonable scope of applications from pornography to psychopaths and from morality to sex differences in the workplace.
