Matt McCall An Introduction:

Matt McCall C. C. Risenhoover, 1988 The Southeastern Reporter, 1889 History of York County, Pennsylvania
George Reeser Prowell, 1907 **Trouble Rides a Fast Horse** Franklin D. Lincoln, 2013-12-12 The Frontier G Man is back in a new adventure soaring to new heights with high flying danger This time government agent Jack Clayton is investigating a slick counterfeit ring in the southwest He is distracted by a gang of bad boys who have robbed and pillaged the entire area leaving death and destruction in their wake A wild chase leads the Frontier G Man into a fast brewing range war treachery deceit and border bandits **Biographical** George Reeser Prowell, 1907 **North Carolina Reports** North Carolina. Supreme Court, 1889 Cases argued and determined in the Supreme Court of North Carolina **Billy Phelan's Greatest Game** William Kennedy, 2011-12-22 Billy Phelan a slightly tarnished poker player pool hustler and small time bookie moves through the lurid nighttime glare of a tough Depression era town A resourceful man full of Irish pluck Billy works the fringes of Albany sporting life with his own particular style and private code of honor until he finds himself in the dangerous position of potential go between in the kidnapping of a political boss s son In relating Billy s fall from the underworld grace and his storybook redemption Kennedy captures the seamy underside of a brassy sweaty city that would prefer to pretend that the Depression doesn t exist An Albany Trio William Kennedy, 1996-07-01 Kennedy s justly acclaimed Albany Cycle is one of the imperishable products of American literature since the Second World War These books can be read singly or in sequence but read they must be Kennedy is one of our necessary writers GQ Legs inaugurated William Kennedy s celebrated cycle of novels set in Albany New York True to both life and myth Legs evokes the flamboyant career of the legendary gangster Jack Legs Diamond who was finally murdered in Albany and his showgirl mistress as they blaze a trail across the tabloid pages of the 1920s and 1930s The second novel in the Albany cycle depicts Billy Phelan a slightly tarnished poker player pool hustler and small time bookie as he moves through the lurid nighttime glare of a tough Depression era town Full of Irish pluck he works the fringes of Albany sporting life with his own particular style until he falls from underworld grace In the Pulitzer Prize winning novel Ironweed Francis Phelan ex ballplayer part time gravedigger and full time drunk has hit bottom Years ago he left Albany after killing a scab during a workers strike and again after he accidentally and fatally dropped his infant son Now in 1938 Francis is back roaming familiar streets and trying to make peace with ghosts of the past and present William Kennedy s Albany Cycle of novels reflect what he once described as the fusion of his imagination with a single place A native and longtime resident of Albany New York his work moves from the mid nineteenth to the mid twentieth century chronicling family life the city s netherworld and its spheres of power financial ethnic political often among the Irish Americans who dominated the city in this period The novels in his cycle include Legs Billy Phelan s Greatest Game Ironweed Quinn s Book Very Old Bones The Flaming Corsage and Roscoe **Quantitative Assessment and Validation of Network Inference Methods in Bioinformatics** Benjamin Haibe-Kains, Frank Emmert-Streib, 2015-04-14 Scientists today have

access to an unprecedented arsenal of high tech tools that can be used to thoroughly characterize biological systems of interest High throughput omics technologies enable to generate enormous quantities of data at the DNA RNA epigenetic and proteomic levels One of the major challenges of the post genomic era is to extract functional information by integrating such heterogeneous high throughput genomic data This is not a trivial task as we are increasingly coming to understand that it is not individual genes but rather biological pathways and networks that drive an organism s response to environmental factors and the development of its particular phenotype In order to fully understand the way in which these networks interact or fail to do so in specific states disease for instance we must learn both the structure of the underlying networks and the rules that govern their behavior In recent years there has been an increasing interest in methods that aim to infer biological networks These methods enable the opportunity for better understanding the interactions between genomic features and the overall structure and behavior of the underlying networks So far such network models have been mainly used to identify and validate new interactions between genes of interest But ultimately one could use these networks to predict large scale effects of perturbations such as treatment by multiple targeted drugs However currently we are still at an early stage of comprehending methods and approaches providing a robust statistical framework to quantitatively assess the quality of network inference and its predictive potential The scope of this Research Topic in Bioinformatics and Computational Biology aims at addressing these issues by investigating the various complementary approaches to quantify the quality of network models These validation techniques could focus on assessing quality of specific interactions global and local structures and predictive ability of network models These methods could rely exclusively on in silico evaluation procedures or they could be coupled with novel experimental designs to generate the biological data necessary to properly validate inferred networks
