

The background is an abstract painting by Piet Mondrian, featuring a complex network of black lines on a light, textured ground. The lines intersect to form various geometric shapes, including triangles and rectangles. There are some color accents, such as a small red square and a yellow triangle, scattered throughout the composition. The overall style is characteristic of De Stijl.

Matta Making The Invisible Visible:

Matta Roberto Sebastián Matta Echaurren, Elizabeth T. Goizueta, 2004 Catalog of an exhibition held at the McMullen Museum of Art Boston College Feb 1 May 24 2004 **Severo Sarduy and the Neo-baroque Image of Thought in the Visual Arts** Rolando Perez, 2012 Severo Sarduy never enjoyed the same level of notoriety as did other Latin American writers On the other hand he never lacked for excellent critical interpretations of his work from critics like Roberto González Echevarría René Prieto Gustavo Guerrero and other reputable scholars Missing however from what is otherwise an impressive body of critical commentary is a study of the importance of painting and architecture first to his theory and second to his creative work In order to fill this lacuna in Sarduy studies Rolando Pérez's book undertakes a critical approach to Sarduy's essays *Barroco Escrito sobre un cuerpo Barroco y neobarroco* and *La simulación* from the standpoint of art history In short no book on Sarduy until now has traced the multifaceted art historical background that informed the work of this challenging and exciting writer It will be a book that many a critic of Sarduy and the Latin American baroque will consult in years to come Surrealism and the Gothic Neil Matheson, 2017-08-07 Surrealism and the Gothic is the first book length analysis of the role played by the gothic in both the initial emergence of surrealism and at key moments in its subsequent development as an art and literary movement The book argues the strong and sustained influence not only of the classic gothic novel itself Ann Radcliffe Charles Maturin Matthew Lewis etc but also the determinative impact of closely related phenomena as with the influence of mediumism alchemy and magic The book also traces the later development of the gothic novel as with Bram Stoker's *Dracula* and its mutation into such works of popular fiction as the *Fantomas* series of Marcel Allain and Pierre Souvestre enthusiastically taken up by writers such as Apollinaire and subsequently feeding into the development of surrealism More broadly the book considers a range of motifs strongly associated with gothic writing as with insanity incarceration and the accursed outsider explored in relation to the personal experience and electroshock treatment of Antonin Artaud A recurring motif of the analysis is that of the gothic castle developed in the writings of André Breton Artaud Sade Julien Gracq and other writers as well as in the work of visual artists such as Magritte **Barnett Newman and Heideggerian Philosophy** Claude Cernuschi, 2012-03-22 As a major member of the New York School Barnett Newman is celebrated for his radical explorations of color and scale and as a precursor to the Minimalist movement for his significant contribution to the development of twentieth century American art But if his reputation and place in history have grown progressively more secure the work he produced remains highly resistant to interpretation His paintings are rigorously abstract and his writings full of references to arcane metaphysical concepts Frustrated over their inability to reconcile the works with what the artist said about them some critics have dismissed the paintings as impenetrable The art historian Yve Alain Bois called Newman the most difficult artist he could name and the philosopher Jean-François Lyotard declared that there is almost nothing to consume in his work or if there is I do not know what it is In order to advance interpretation this

book investigates both Newman's writings and paintings in light of ideas articulated by one of Germany's most important and influential philosophers Martin Heidegger. Many of the themes explored in Newman's statements and echoed in the titles of his paintings betray numerous points of intersection with Heidegger's philosophy: the question of origins, the distinctiveness of human presence, a person's sense of place, the sensation of terror, the definition of freedom, the importance of mood to existence, the particularities of art and language, the impact of technology on modern life, the meaning of time and the human being's relationship to others and to the divine. When examined in the context of Heideggerian thought, these issues acquire greater concreteness and in turn their relation to the artist's paintings becomes clearer. It is the contention of this book that at the intersection of art history and philosophy, an interdisciplinary framework emerges wherein the artist's broader motivations and the specific meanings of his paintings prove more amenable to elucidation.

Transmediations Niklas Salmose, Lars Elleström, 2019-11-22. This collection offers a multi-faceted exploration of transmediations: the processes of transfer and transformation that occur when communicative acts in one medium are mediated again through another. While previous research has explored these processes from a broader perspective, Salmose and Elleström argue that a better understanding is needed of the extent to which the outcomes of communicative acts are modified when transferred across multimodal media in order to foster a better understanding of communication more generally. Using this imperative as a point of departure, the book details a variety of transmediations viewed through four different lenses. The first part of the volume looks at narrative transmediations, building on existing work done by Marie-Laure Ryan on transmedia storytelling. The second section focuses on the spatial dynamics involved in media transformation, as well as the role of the human body as a perceptive agent and a medium in its own right. The third part investigates new radical

boundaries and media types in transmediality and hence shows its versatility as a method of analyzing complex and contemporary communicative discourses The fourth and final part explores the challenges involved in transmediating scientific data into the narrative format in the context of environmental issues Taken together these sections highlight a range of case studies of transmediations and in turn the complexity and variety of the process informed by the methodologies of the different disciplines to which they belong This innovative volume will be of particular interest to students and scholars in multimodality communication intermediality semiotics and adaptation studies Transatlantic Encounters Michele Greet, 2018-01-01 Paris was the artistic capital of the world in the 1920s and 30s providing a home and community for the French and international avant garde Latin American artists contributed to and reinterpreted nearly every major modernist movement that took place in the creative center of Paris between World War I and World War II including Cubism Diego Rivera Surrealism Antonio Berni and Roberto Matta and Constructivism Joaquin Torres Garcia Yet their participation in the Paris art scene has remained largely overlooked until now This book examines their collective role surveying the work of both household names and an extraordinary array of lesser known artists Michele Greet illuminates the significant ways in which Latin American expatriates helped establish modernism and conversely how a Parisian environment influenced the development of Latin American artistic identity **Art Journal** ,1960
