Louise Bøttcher, Jesper Dammeyer, 2016-06-29 This book introduces current theories and research on disability and builds on the premise that disability has to be understood from the dialectical dynamics of biology psychology and culture over time Based on the newest empirical research on children with disabilities the book overcomes the limitations of the medical and social models of disability by arguing for a dialectical biopsychosocial model The proposed model builds on Vygotsky's cultural historical ideas of developmental incongruence implying that the disability emerges from the misfit between individual abilities and the cultural historical activity settings in which the child with impairments participates The book is a theoretical contribution to an updated understanding of disability from a psychological and educational perspective It focuses on the first years of the life of the child with impairment and travels through infancy toddler preschool and early school age to track the developmental trajectories of disability through the dialectical processes of cultural social individual and biological processes It discusses a number of themes that are relevant for the early development and support for children with various types and degrees of disability through the lens of Vygotsky's cultural historical developmental theories Some of the themes discussed are inclusion mental health communication aids and family life **Cumulated Index Medicus**, 1993

Every Right for Every Child Enakshi Ganguly Thukral, 2020-11-29 Despite some acknowledgement over the years of the significance of seeing children as rights holders children's concerns continue to run the risk of not being considered political and mainstream they continue to be viewed as extensions of adults or simply as members of families and communities This when the reality is that children are citizens the minute they are born and entitled to as much attention if not more than adults given their age and vulnerability Concerned with the mainstreaming of children's interests in policy making this book raises such questions as What is good governance vis vis children What are the standards and indicators Can there be one answer for this question that is applicable to all countries In order to arrive at a better understanding of what good governance for children means and how the realization of the political cultural social and civil rights of children may be achieved the book draws on the diverse and yet comprehensive body of knowledge that has developed over the years from

initiatives taken by organisations across the world who work with policy makers to make governance systems more accountable and responsive to the well being of children as citizens in themselves simultaneously empowering children to take part in decision making processes that impact their lives

The Oxford Handbook of Children's Rights Law
Jonathan Todres, Shani M. King, 2020-02-19 Children's rights law is a relatively young but rapidly developing discipline The UN Convention on the Rights of the Child the field's core legal instrument is the most widely ratified human rights treaty in history Yet like children themselves children's rights are often relegated to the margins in mainstream legal political and other discourses despite their application to approximately one third of the world's population and every human being's first stages of life Now thirty years old the Convention on the Rights of the Child CRC signalled a definitive shift in the way that children are viewed and understood from passive objects subsumed within the family to full human beings with a distinct set of rights Although the CRC and other children's rights law have spurred positive changes in law policies and attitudes toward children in numerous countries implementation remains a work in progress We have reached a state in the evolution of children's rights in which we need more critical evaluation and assessment of the CRC and the large body of children's rights law and policy that this treaty has inspired We have moved from conceptualizing and adopting legislation to focusing on implementation and making the content of children's rights meaningful in the lives of all children This book provides a critical evaluation and assessment of children's rights law including the CRC With contributions from leading scholars and practitioners from around the world it aims to elucidate the content of children's rights law explore the complexities of implementation and identify critical challenges and opportunities for children's rights law

Disabled Childhoods Janice McLaughlin, Edmund Coleman-Fountain, Emma Clavering, 2016-02-05 A crucial contemporary dynamic around children and young people in the Global North is the multiple ways that have emerged to monitor their development behaviour and character In particular disabled children or children with unusual developmental patterns can find themselves surrounded by multiple practices through which they are examined This rich book draws on a wide range of qualitative research to look at how disabled children have been cared for treated and categorised Narrative and longitudinal interviews with children and their families along with stories and images they have produced and notes from observations of different spaces in their lives medical consultation rooms cafes and leisure centres homes classrooms and playgrounds amongst others all make a contribution Bringing this wealth of empirical data together with conceptual ideas from disability studies sociology of the body childhood studies symbolic interactionism and feminist critical theory the authors explore the multiple ways in which monitoring occurs within childhood disability and its social effects Their discussion includes examining the dynamics of differentiation via medicine social interaction and embodiment and the multiple actors including children and young people themselves involved The book also investigates the practices that differentiate children into different categories and what this means for notions of normality integration belonging and citizenship Scrutinising the multiple forms of monitoring

around disabled children and the consequences they generate for how we think about childhood and what is normal this volume sits at the intersection of disability studies and childhood studies *Optimizing school readiness for children with developmental disabilities* Bolajoko O.
