Supporting Transfer Student Success Peggy L. Nuhn,Karen F. Kaufmann,2020-11-06 This research based book with practical applications teaches academic librarians to support their transfer students effectively at both universities and community colleges even when transfer students information literacy needs differ from those of other students Colleges and universities across the United States serve a large and growing population of transfer students

Current estimates suggest that more than one third of college students transfer from one institution of higher education to another at least once. At some institutions transfer students compose up to fifty to sixty percent of the new incoming class. Academic librarians' understanding of the demographics and potential needs of transfer students is essential to supporting their success and mitigating transfer shock. Just as public libraries often bridge gaps between individuals and services, academic libraries can proactively support the often unique needs of transfer students by spearheading textbook affordability initiatives, developing innovative programming, and making appropriate referrals to non-library student services. In this practical guide to supporting transfer students, authors Peggy L. Nuhn and Karen F. Kaufmann teach academic librarians how to optimize information literacy instruction, support research help, reduce stress, and connect the library to virtual students. They emphasize the importance of establishing partnerships with feeder institutions and other campus departments to best support transfer student success.

Research Mobilities in Primary Literacy Education Cathy Burnett, Gill Adams, Julia Gillen, Terrie Lynn Thompson, Anna Cermakova, David Ben Shannon, Parinita Shetty, 2024-11-15. This book delves into the intriguing question of why certain types of literacy research gain more traction than others in educational settings. It draws upon findings from *Research Mobilities in Primary Literacy Education*, an innovative and interdisciplinary study conducted in England and supported by the Economic and Social Research Council ES/W000571/1. The study investigated the types of literacy research that reach teachers, the ways in which human and non-human actors mobilise research, and the transformation of research as it circulates. The book argues that for teachers to foster genuinely inclusive literacy classrooms, they need to be equipped to draw on understandings associated with a variety of theoretical perspectives and research traditions. It further explores the dynamics of research dissemination and the factors that influence the uptake and application of research findings in educational contexts. This work is an original and groundbreaking contribution to debates about the scope and focus of literacy education, the role of evidence-based teaching, and approaches to professional learning. This book is of vital interest to scholars, researchers, and students with interests in Literacy Education, Professional Development, and the Ethics of Research. It challenges conventional wisdom, provokes thoughtful discussion, and inspires readers to rethink the role and value of research in shaping literacy education that is inclusive, effective, and meaningful.

Global Perspectives on Children's Health Literacy Rosie Nash, Vaughan Cruickshank, Shandell Elmer, 2024-08-27 This book examines global perspectives of health literacy development to explore the intersections between health education and community settings International health literacy experts provide a collection of important insights and recommendations that are urgently required to inform practice and policy The impetus for this book is a growing recognition that a siloed approach to supporting health and health literacy exists in many countries This book addresses a

gap in the international literature by presenting solutions that promote ongoing collaboration across settings to redress inequity and optimize global health. Identifying intersections between the settings is critically important to supporting these collaborations. Health literacy is the ability to find, use, evaluate, and apply information to look after our health. Developing the personal asset of health literacy earlier in life influences adult health behaviours. A Health in All Policies approach has been globally endorsed; however, a health literacy in all settings approach is yet to be realised. As a social determinant of health, health literacy can determine health outcomes, educational attainment, social equity, and productivity. The authors investigate the health literacy development of children and their communities within particular regions, exploring whether health literacy is addressed as a health, education, or community issue. They describe where silos exist between and within settings, aiming to highlight areas where health literacy is present. This helps identify challenges and opportunities for optimizing health literacy development. *Global Perspectives on Children's Health Literacy* is essential reading for public health and health promotion researchers and practitioners, primordial prevention researchers, policy makers, health and education ministers, community service ministers, youth organisations, librarians, school teachers, health and physical education teachers, school nurses, child and parenting services, nurses, paediatricians, and allied health professionals who work with children and families, e.g., social workers, speech pathologists, dietitians.

The Composition Commons
Jessica Yood, 2024-04-26. The Composition Commons delivers a timely take on invigorating higher education, illustrating how college composition courses can be dynamic sites for producing a democratic, just, and generally educated public. Jessica Yood traces the century-long origins of a writing-centered idea of the American university and tracks the resurgence of this idea today. Drawing on archival and classroom evidence from public colleges and universities and written in a lively autoethnographic voice, Yood names genres of the commons: intimate, informal writing activities that create peer-to-

peer knowledge networks She shows how these unique genres create collectivity an academic commons and calls on scholars to invest in composition as a course cultivating reflective emergent shared knowledge Yood departs from movements that divest from the first year composition classroom and details how an increasingly diverse student population composes complex evolving cultural literacies that forge social bonds and forward innovation and intellectual and civic engagement The Composition Commons reclaims the commons as critical idea and writing classroom activities as essential practices for remaking higher education in the United States Reframing the Subject Kelly Ritter, 2016-01-23 Mental hygiene films developed for classroom use touted vigilance correct behavior morality and model citizenship They also became powerful tools for teaching literacy skills and literacy based behaviors to young people following the Second World War In this study Kelly Ritter offers an extensive theoretical analysis of the alliance of the value systems inherent in mental hygiene films class based ideals democracy patriotism with writing education an alliance that continues today by way of the mass digital technologies used in teaching online She further details the larger material and cultural forces at work in the production of these films behind the scenes and their effects on education trends Through her examination of literacy theory instructional films policy documents and textbooks of the late 1940s to mid 1950s Ritter demonstrates a reliance on pedagogies that emphasize institutional ideologies and correctness over epistemic complexity and de emphasize the role of the student in his or her own learning process To Ritter these practices are sustained in today s pedagogies and media that create a false promise of social uplift through formalized education instead often resulting in negative material consequences Studies on the Intersection of Text, Paratext, and Reception , 2021-05-12 Studies on the Intersection of Text Paratext and Reception brings together thirteen contributions from leading scholars in the fields of textual criticism manuscript paratextual research and reception history These fields have tended to operate in isolation but recent years have seen a rise in valuable research being done at their multiple points of intersection The contributors to this volume show the potential of such crossover work through for example exploring how paratextual features of papyri and minuscules give insight into their text probing how scribal behaviors illumine textual transmission restoration and examining how colometry inner biblical references and early church reading cultures may contribute to understanding canon formation These essays reflect the contours of the scholarship of Dr Charles E Hill to whom the volume is dedicated
