Moving Horizons:

Online Optimization of Large Scale Systems Martin Grötschel, Sven O. Krumke, Joerg Rambau, 2013-03-14 In its thousands of years of history mathematics has made an extraordinary career. It started from rules for bookkeeping and computation of areas to become the language of science. Its potential for decision support was fully recognized in the twentieth century only vitally aided by the evolution of computing and communication technology. Mathematical optimization in particular has developed into a powerful machinery to help planners. Whether costs are to be reduced, profits to be maximized or scarce resources to be used wisely, optimization methods are available to guide decision making. Optimization is particularly strong if precise models of real phenomena and data of high quality are at hand, often yielding reliable automated control and decision procedures. But what if the models are soft and not all data are around? Can mathematics help as well? This book addresses such issues, e.g. problems of the following type: An elevator cannot know all transportation requests in advance. In which order should it serve the passengers? Wing profiles of aircrafts influence the fuel consumption. Is it possible to continuously adapt the shape of a wing during the flight under rapidly changing conditions? Robots are designed to accomplish specific tasks as efficiently as possible. But what if a robot navigates in an unknown environment? Energy demand changes quickly and is not easily predictable over time. Some types of power plants can only react slowly. *Hans-Georg Gadamer*

Karl Simms, 2015-03-24 Hans Georg Gadamer's theory of hermeneutics is one of the most important modern theories of interpretation and understanding, and at its heart is the experience of reading literature. In this clear and comprehensive guide to Gadamer's thought, Karl Simms presents an overview of Gadamer's life and works, outlining his importance to hermeneutic theory and its place in literary studies. Explains and puts into context his key ideas, including dialogue, phronesis, play, tradition and horizon. Shows how Gadamer's ideas have been influential in the interpretation of literary texts. Explains Gadamer's debates with key contemporaries and successors such as Habermas, Ricoeur and Derrida. Provides detailed suggestions for further reading. With a significance that crosses disciplinary boundaries from cultural studies, literary theory and philosophy through to history, music and fine arts, Gadamer's pioneering work on hermeneutic theory remains of crucial importance to the study of texts in the humanities. **Media Consumption in Malaysia**

Tony Wilson, 2015-01-09 How do visitors immersing themselves in material places such as shopping malls or video sites online make sense of the experience, enabling criticizing or consenting to content? How is this evident in behaviour? Reflecting on accounts by Chinese, Indian, Malay and Indigenous members of Malaysian society, this book addresses these questions from a practices perspective increasingly adopted by scholars in marketing and media studies. The volume provides an account of practices theory from its origins in critical hermeneutics such as Heidegger, Gadamer and Ricoeur, as reflecting on the processes of embodied understanding developing alongside interpretive and reception theory. Part I draws upon authors as diverse as Heidegger and Henry Jenkins with a practices perspective on media and mall consuming shown as developing from forty years of theorizing about audience

activity An empirical study of Malaysian blogging and branding on YouTube exemplifies this approach Part II considers Malaysians absorbed in social media sites as everyday visitors and the subjects of consumer research The book then returns to the material world exploring the horizons of understanding from which Malaysians enter their mediated malls and concludes by positioning media practices theory within a spectrum of philosophical ideas Recognizing the current re turn in Consumer and Media Studies to employing hermeneutics as an account of our embodied human understanding this book presents its major philosophical proponents showing how close attention to their writing can now inform and shape research on ubiquitous screen users As such it will be of particular interest to students and scholars of Media Studies Asian Studies and Marketing Studies Guns and Government J. Darby, Roger Mac Ginty, 2001-12-17 The book is part of a wider study of the management of contemporary peace processes and has a strong comparative theme It draws heavily on interviews with key players politicians and policymakers in the peace process Darby and Mac Ginty identify six key strands in the Northern Ireland peace process and assess how factors in each facilitated or obstructed political movement Chapters are devoted to political change violence and security economic factors external influences popular responses and the role of images and symbols Extensional Tectonics Ibrahim Çemen, Elizabeth J. Island in the Stream introduces an original genre of ethnographic history as it follows a community on Mayotte an East African island in the Mozambique Channel through eleven periods of fieldwork between 1975 and 2015 Over this 40 year span Mayotte shifted from a declining and neglected colonial backwater to a full d partement of the French state In a highly unusual postcolonial trajectory citizens of Mayotte demanded this incorporation within France rather than joining the independent republic of the Comoros The Malagasy speaking Muslim villagers Michael Lambek encountered in 1975 practiced subsistence cultivation and lived without roads schools electricity or running water today they are educated citizens of the EU who travel regularly to metropolitan France and beyond Offering a series of ethnographic slices of life across time Island in the Stream highlights community members ethical engagement in their own history as they looked to the future acknowledged the past and engaged and transformed local forms of sociality exchange and ritual performance This is a unique account of the changing horizons and historical consciousness of an African community and an intimate portrait of the inhabitants and their concerns as well as a glimpse into the changing perspective of the ethnographer

Nonparametric Finance Jussi Klemelä, 2018-02-23 An Introduction to Machine Learning in Finance With Mathematical Background Data Visualization and R Nonparametric function estimation is an important part of machine learning which is becoming increasingly important in quantitative finance Nonparametric Finance provides graduate students and finance professionals with a foundation in nonparametric function estimation and the underlying mathematics Combining practical applications mathematically rigorous presentation and statistical data analysis into a single volume this book presents detailed instruction in discrete chapters that allow readers to dip in as needed without reading from beginning to end Coverage includes statistical finance risk management portfolio management and securities pricing to provide a practical knowledge base and the introductory chapter introduces basic finance concepts for readers with a strictly mathematical background Economic significance is emphasized over statistical significance throughout and R code is provided to help readers reproduce the research computations and figures being discussed Strong graphical content clarifies the methods and demonstrates essential visualization techniques while deep mathematical and statistical insight backs up practical applications Written for the leading edge of finance Nonparametric Finance Introduces basic statistical finance concepts including univariate and multivariate data analysis time series analysis and prediction Provides risk management guidance through volatility prediction quantiles and value at risk Examines portfolio theory performance measurement Markowitz portfolios dynamic portfolio selection and more Discusses fundamental theorems of asset pricing Black Scholes pricing and hedging quadratic pricing and hedging option portfolios interest rate derivatives and other asset pricing principles Provides supplementary R code and numerous graphics to reinforce complex content Nonparametric function estimation has received little attention in the context of risk management and option pricing despite its useful applications and benefits This book provides the essential background and practical knowledge needed to take full advantage of these little used methods and

turn them into real world advantage Jussi Klemel PhD is Adjunct Professor at the University of Oulu His research interests include nonparametric function estimation density estimation and data visualization He is the author of Smoothing of Multivariate Data Density Estimation and Visualization and Multivariate Nonparametric Regression and Visualization With R and Applications to Finance

17th European Symposium on Computed Aided Process Engineering Valentin Plesu, Paul Serban Agachi, 2007-05-24 The 17th European Symposium on Computed Aided Process Engineering contains papers presented at the 17th European Symposium of Computer Aided Process Engineering ESCAPE 17 held in Bucharest Romania from 27-30 May 2007 The ESCAPE series serves as a forum for scientists and engineers from academia and industry to discuss progress achieved in the area of Computer Aided Process Engineering CAPE The main goal was to emphasize the continuity in research of innovative concepts and systematic design methods as well the diversity of applications emerged from the demands of sustainable development ESCAPE 17 highlights the progress software technology needed for implementing simulation based tools The symposium is based on 5 themes and 27 topics following the main trends in CAPE area Modelling Process and Products Design Optimisation and Optimal Control and Operation System Biology and Biological Processes Process Integration and Sustainable Development Participants from 50 countries attended and invited speakers presented 5 plenary lectures tackling broad subjects and 10 keynote lectures Satellite events added a plus to the scientific dimension to this symposium All contributions are included on the CD ROM attached to the book Attendance from 50 countries with invited speakers presenting 5 plenary lectures tackling broad subjects and 10 keynote lectures

Economic Model Predictive Control Matthew Ellis, Jinfeng Liu, Panagiotis D. Christofides, 2016-07-27 This book presents general methods for the design of economic model predictive control EMPC systems for broad classes of nonlinear systems that address key theoretical and practical considerations including recursive feasibility closed loop stability closed loop performance and computational efficiency Specifically the book proposes Lyapunov based EMPC methods for nonlinear systems two tier EMPC architectures that are highly computationally efficient and EMPC schemes handling explicitly uncertainty time varying cost functions time delays and multiple time scale dynamics The proposed methods employ a variety of tools ranging from nonlinear systems analysis through Lyapunov based control techniques to nonlinear dynamic optimization The applicability and performance of the proposed methods are demonstrated through a number of chemical process examples The book presents state of the art methods for the design of economic model predictive control systems for chemical processes In addition to being mathematically rigorous these methods accommodate key practical issues for example direct optimization of process economics time varying economic cost functions and computational efficiency Numerous comments and remarks providing fundamental understanding of the merging of process economics and feedback control into a single framework are included A control engineer can easily tailor the many detailed examples of industrial relevance given within the text to a specific application The authors present a rich collection of new research topics and

references to significant recent work making Economic Model Predictive Control an important source of information and inspiration for academics and graduate students researching the area and for process engineers interested in applying its ideas

Land-Use Management, 2024-04-10 In Land Use Management Recent Advances New Perspectives and Applications acclaimed experts from diverse fields converge to present a comprehensive exploration of the latest developments in land use practices This groundbreaking book delves into the dynamic interplay between human activities and the environment offering a nuanced understanding of how land use decisions shape our world From cutting edge technologies to innovative policy frameworks this book showcases the forefront of land use management Readers will gain insights into sustainable urban planning agricultural practices conservation strategies and the integration of smart technologies Each chapter is a testament to the multidisciplinary nature of effective land use management emphasizing the need for collaborative approaches in tackling the challenges of our rapidly changing global landscape Land Use Management Recent Advances New Perspectives and Applications is an indispensable resource for scholars policymakers and practitioners seeking to navigate the complexities of contemporary land use challenges Whether you are involved in urban planning environmental science or policy formulation this book offers a comprehensive guide to understanding managing and optimizing land use for a sustainable and resilient future

Problem-Based Learning in Higher Education: Untold Stories Maggi Savin-Baden, 2000-04-16 Problem based learning is becoming increasingly popular in higher education because it is seen to take account of pedagogical and societal trends such as flexibility adaptability problem solving and critique in ways which many traditional methods of learning do not There is little known about what actually occurs inside problem based curricula in terms of staff and student lived experience This book discloses ways in which learners and teachers manage complex and diverse learning in the context of their lives in a fragile and often incoherent world These are the untold stories The central argument of the book is that the potential and influence of problem based learning is yet to be realized personally

pedagogically and professionally in the context of higher education It explores both the theory and the practice of problem based learning and considers the implications of implementing problem based learning organizationally Problem based learning is contested and murky ground in higher education In her study Maggi Savin Baden clears the thickets offering a bold ambitious framework and in the process gives us a compelling argument for placing problem based learning in the centre of higher education as an educational project It is a story not to be missed Professor Ronald Barnett This is a challenging and very worthwhile read for anyone concerned with the future of higher education and issues of teaching and learning The metaphor of untold stories is powerfully explored at the level of staff and student experience of problem based learning Professor Susan Weil

The Aesthetic Hermeneutics of Hans-Georg Gadamer and Hans Urs Von Balthasar Jason Paul Bourgeois, 2007 Through a comparison of their aesthetics and hermeneutics this book reveals that both Gadamer and Balthasar reject an autonomous neutral distanced starting point for interpretation Instead they advocate a dialogical model in which interpreters allow themselves to be engaged by the truth of the text or artwork at hand Both thinkers use aesthetic categories to describe this model of interpretation such as the neo Platonic category of radiance and both reflect a disclosure concealment theory of truth In recognizing that interpreters are part of an unfolding history and that the examination of historical texts cannot be done from a neutral standpoint they both acknowledge that textual interpretation must contain the dimension of dialogue with the past truths Significantly Balthasar incorporates these aesthetic and hermeneutical categories into an explicitly Trinitarian salvation history framework which is absent in Gadamer's thought This book concludes with the implications of an aesthetic hermeneutics for contemporary Roman Catholic theology and its dialogue with various schools of thought philosophical and religious arguing that the concrete particular forms of Christianity as expressed in Roman Catholicism cannot be bracketed or evacuated by Catholic theologians in the interest of achieving consensus in religious matters To the contrary it is precisely in these forms that we believe that God's revelation takes place

Descriptions Don Ihde, Hugh J. Silverman, 1985-09-30 Phenomenology in America has developed in unique directions with respect to descriptive analysis and in relation to interdisciplinary fields Descriptions examines current trends in phenomenology It begins by reflecting on phenomenological description itself then takes phenomenology into such areas as time science and the arts the social and into the universities Ranging from the development of theory by such well known philosophers as Maurice Natanson and Robert Sokolowski this collection addresses the topics of pregnant subjectivity nostalgia the ethical function of architecture computer science and academic freedom

John Dewey's Theory of Art, Experience, and Nature Thomas M. Alexander, 2012-02-16 Thomas Alexander shows that the primary guiding concern of Dewey's philosophy is his theory of aesthetic experience He directly challenges those critics most notably Stephen Pepper and Benedetto Croce who argued that this area is the least consistent part of Dewey's thought The author demonstrates that the fundamental concept in Dewey's system is that of experience and that paradigmatic treatment of experience is to be

found in Dewey's analysis of aesthetics and art. The confusions resulting from the neglect of this orientation have led to prolonged misunderstandings, eventual neglect, and unwarranted popularity for ideas at odds with the genuine thrust of Dewey's philosophical concerns. By exposing the underlying aesthetic foundations of Dewey's philosophy, Alexander aims to rectify many of these errors, generating a fruitful new interest in Dewey.

New Geographies of the Globalized World
 Marcin Wojciech Solarz, 2018-01-29 Globalization has essentially come to an end. It is already a victorious revolution. It has profoundly restructured the relationships between people and the world, often recreating them in a new geographical image. This book discovers and describes these relationships of new geographies, providing a comprehensive spatial guide to the globalized world of the 21st century. It considers a number of timely and important themes and insights for the present and future world, exploring topics such as population trends and migration, development, the urban transportation religion, our endangered planet, wars, conflicts, and terrorism, and disease. As such, it offers a cross-cutting synthesis of the modern world. It will be of interest to students and researchers in humanities and social sciences, including geographers, economists, political scientists, and IR specialists.

Exploring Diversity through Multimodality, Narrative, and Dialogue Mary B. McVee, Fenice B. Boyd, 2015-09-16 *Exploring Diversity through Multimodality, Narrative, and Dialogue* awakens educators to the ways in which values, beliefs, language, use, culture, identity, social class, race, and other factors filter approaches to teaching and expectations for students. Designed as a guide to help educators engage in dialogic interactions, the text articulates a theoretically grounded and research-based framework related to the use of personal narratives as learning tools. Educators are encouraged to consider their own positions, explore topics of diversity and social justice, and identify ways to better address student needs. Drawing on theories from multiliteracies, multimodality, embodiment, and narrative, chapters are framed around book discussions and the use of personal narrative to define and provide examples of dialogic interactions. Unique to this book is its focus on embodied learning and multimodality, as well as myriad artifacts produced by educators listening, not just dialogic talk, writing both traditional print texts and multimodal composition that supports dialogic interaction and not merely responding to literature, but developing empathic responses to texts, students, and others whose

opinions may differ from one's own viewpoints. The specific techniques and approaches presented can be used within educational and professional development settings to help readers enhance their journey toward greater awareness of others and of their own beliefs and experiences that lead toward social justice for all.
