In *The White Savior Film* Matthew Hughey provides a cogent multipronged analysis of this subgenre of films to investigate the underpinnings of the Hollywood constructed images of idealized and often idealistic white Americans. Hughey considers the production distribution and consumption of white savior films to show how the dominant messages of sacrifice suffering and redemption are perceived by both critics and audiences. Examining the content of fifty films nearly 3 000 reviews and interviews with viewer focus groups he accounts for the popularity of this subgenre and its portrayal of racial progress. *The White Savior Film* shows how we as a society create and understand these films and how they reflect the political and cultural contexts of their time.

Whose Utility? John Ernst, 1994 An in depth analysis of the impact of public utility privatization on ordinary consumers. This text traces the history of energy and water privatization and documents the community and consumer sectors various attempts to influence the structure of privatization and regulation. It provides data on the energy and water utilities over the first period of privatization and shows that the benefits and costs of privatization have not been shared equally. Low income consumers have been particularly adversely affected and the regressive outcomes of privatization have undercut the gains that domestic consumers have made in some areas of service provision. Concluding with an overview of the British experiment of energy and water privatization the author argues that the privatization settlements reached by successive Conservative governments with the privatized utility companies are seriously flawed and that the British model of privatization is inappropriate to the domain of essential public utility service.
