Mrs Dalloway To The Lighthouse New Cas:

The Supporting Cast David Galef, 2010-11 For every Hamlet there is a supporting cast for every Mrs Dalloway an entire realm of subordinate portraits Yet if literary criticism cares at all about significant detail emergent patterns and the subtleties in narrative flat and minor characters are crucial to an understanding of the fictional process itself Beginning with E M Forster's landmark study of flat and round characters this book is both a critical and writerly examination of the species Why are certain minor characters so salient in readers' minds and why are flat characters often so comic Is a name enough to create a character and if so what is the vanishing point of characterization The walking allegory the narrator the disrupter the doppelgänger how are they used and to what effect The Supporting Cast first explores the theoretical limits of character from structuralist taxonomies to reader response concerns with examples culled from a wide range of literature The author then applies these concepts in chapters of sustained analysis to works of Conrad Forster and Woolf The work also provides comments on flat and minor characters in other media and a full scale character index of Woolf's *Jacob's Room* **The Case**

millions of pages Still hopefully turning the pages oh here is Jacob s room Who is Jacob Flanders Virginia Woolf s third novel published in 1922 alongside James Joyce s Ulysses and T S Eliot s The Waste Land follows this elusive title character from a sunlit childhood on the Cornwall coast to adventures in Cambridge London and Athens Women fall in love with Jacob young men desire his company and conversation But Woolf keeps her scornful charming protagonist at a distance enveloping Jacob in mystery as he enters adulthood and the Great War thunders across Europe A daring work that reimagines every element of the traditional novel Jacob s Room tells a new story for a new century In 1922 Lytton Strachey pronounced Jacob s Room a most wonderful achievement more like poetry it seems to me than anything else and as such I prophesy immortal One hundred years after its publication Woolf s first full length work of experimental fiction pulls us into the inexhaustible mysteries of intimacy and mortality

The Solitary Vice Mikita Brottman,2008-02-12 Mikita Brottman wonders just why is reading so great It s a solitary practice one that takes away from time that could be spent developing important social networking skills Reading s not required for health happiness or a loving family And if reading is so important why are catchy slogans like Reading Changes Lives and Champions Read needed to hammer the point home Fearlessly tackling the notion that nonreaders are doomed to lives of despair and mental decay Brottman makes the case that the value of reading lies not in its ability to ward off Alzheimer s or that it s a pleasant hobby Rather she argues that like that other well known solitary vice masturbation reading is ultimately not an act of pleasure but a tool for self exploration one that allows people to see the world through the eyes of others and lets them travel deep into the darkness of the human condition

Proust Was a Neuroscientist Jonah Lehrer,2008-09-01 The New York Times bestselling author provides an entertaining look at how artists enlighten us about the workings of the brain New York magazine In this book the author of How We Decide and Imagine How Creativity Works writes skillfully and coherently about both art and science and about the connections between the two Entertainment Weekly In this technology driven age it s tempting to believe that science can solve every mystery After all it s cured countless diseases and sent humans into space But as Jonah Lehrer explains science is not the only path to knowledge In fact when it comes to understanding the brain art got there first Taking a group of artists a painter a poet a chef a composer and a handful of novelists Lehrer shows how each one discovered an essential truth about the mind that science is only now rediscovering We learn for example how Proust first revealed the fallibility of memory how George Eliot discovered the brain s malleability how the French chef Escoffier discovered umami the fifth taste how C zanne worked out the subtleties of vision and how Gertrude Stein exposed the deep structure of language a full half century before the work of Noam Chomsky and other linguists More broadly Lehrer shows that there s a cost to reducing everything to atoms and acronyms and genes Measurement is not the same as understanding and art knows this better than science does An ingenious blend of biography criticism and first rate science writing Proust Was a Neuroscientist urges science and art to listen more closely to each other for willing minds can combine the best of both to brilliant effect His book marks the arrival

Virginia Woolf's Unwritten Histories Anne Besnault, 2021-11-04 Virginia Woolf's Unwritten Histories explores the interrelatedness of Woolf's modernism feminism and her understanding of history as a site of knowledge and a writing practice that enabled her to negotiate her heritage to find her place among the moderns as a female artist and intellectual and to elaborate her poetics of the new not as radical rupture but as the result of a process of unwriting and rewriting traditional historiographical orthodoxies Its central argument is that unless we comprehend the genealogy of Woolf's historical thought and the complexity of its lineage we cannot fully grasp the innovative thrust of her attempt to think back through our mothers Bringing together canonical texts such as Orlando 1928 A Room of One's Own 1929 Three Guineas 1938 or Between the Acts 1941 and under researched ones among which stand Woolf's essays on historians and reviews of history books and her pieces on literary history and nineteenth century women's literature this book argues that Woolf's textual conversations with nineteenth century writers historians and critics many of which remain unexplored are interwoven with her historiographical poesis and constitute the groundwork for her alternative histories and literary histories unwritten open textured unacademic and polemical counter narratives that keep track of the past and engage politically with the future

How Does it Feel? Charlotte Bosseaux, 2007 Narratology is concerned with the study of narratives but surprisingly it does not usually distinguish between original and translated texts This lack of distinction is regrettable In recent years the visibility of translations and translators has become a widely discussed topic in Translation Studies yet the issue of translating a novel's point of view has remained relatively unexplored It seems crucial to ask how far a translator's choices affect the novel's point of view and whether characters or narrators come across similarly in originals and translations This book addresses exactly these questions It proposes a method by which it becomes possible to investigate how the point of view of a work of fiction is created in an original and adapted in translation It shows that there are potential problems involved in the translation of linguistic features that constitute point of view and that this has an impact on the way works are translated
