Nuclear Disarmament in International Law Haralambos Athanasopulos, 2000-02-01 When German physicists Otto Hahn and Fritz Strassman first split the uranium atom in 1938 they might have little imagined the potential power their experiments had unleashed Since the United States successfully detonated the first atomic weapons in 1945 the entire world has lived in fear of annihilation Technological advances in weaponry and importantly their delivery systems have only heightened the sense of dread Yet since the end of World War II world governments have been unable to agree on a strategy for nuclear disarmament This led first to the Cold War and ultimately to the proliferation of nuclear weapons throughout the world This work examines the nuclear question within the framework of international law The advent of the nuclear age and its impact on postwar peace and law is first covered This is followed by analyses of the initial United Nations disarmament initiatives and the reasons they were doomed from the start The globalization of the Cold War the expansion of the nuclear arms race and the START treaties and the legacy of 1970s era detente efforts in the years leading up to the end of the Cold War are then detailed How the United Nations reacted to the end of the Cold War and the prospects for disarmament in the 21st century are the subjects of the concluding section **Efficacy and Efficiency in Multilateral Policy Formation**

Rudolf Th. Jurrjens, Jan Sizoo, 2023-09-29 This new work examines three important case studies of international conference diplomacy concerning military security as presented at the semi universal Geneva negotiations on the Chemical Weapons Convention 1992 the regional Stockholm conference on Confidence and Security Building Measures CSBMs 1986 and the Vienna bloc to bloc talks between East and West on Mutual and Balanced Force Reductions MBFR 1989 The authors describe in great detail the course and results of these conferences and make a comparison of the negotiating processes before and after the abolition of the Warsaw Treaty Organization after the political events of 1989 in Eastern Europe The central terms underlying this study are defined within a newly developed comprehensive theoretical framework that is used to analyze the three negotiating processes In the final chapter a number of concrete recommendations are made which aim to increase the efficacy and efficiency of future multilateral negotiations *Disarmament*, 1986 *The Evolution of International Security*

Defense's Nuclear Agency 1947-1997 traces the development of the Armed Forces Special Weapons Project AFSWP and its descendant government organizations from its original founding in 1947 to 1997. After the disestablishment of the Manhattan Engineering District MED in 1947, AFSWP was formed to provide military training in nuclear weapons operations. Over the years, its sequential descendant organizations have been the Defense Atomic Support Agency DASA from 1959 to 1971, the Defense Nuclear Agency DNA from 1971 to 1996, and the Defense Special Weapons Agency DSWA from 1996 to 1998. In 1998, DSWA, the On Site Inspection Agency, the Defense Technology Security Administration, and selected elements of the Office of Secretary of Defense were combined to form the Defense Threat Reduction Agency DTRA.
