Our Virtual World: The Transformation of Work, Play and Life via Technology Chidambaram, Laku,Zigurs, Ilze,2000-07-01 Today s new technologies are dramatically changing the way we work play and live Our Virtual World The Transformation of Work Play and Life via Technology investigates the ubiquity of the virtual environment and our evolving interactions in this changed context **Harnessing Dynamic Knowledge Principles in the Technology-Driven World**

Nissen, Mark,2013-11-30 In a technology driven world it is essential that enterprises develop reliable and rapid flows of knowledge to distribute evenly across organizations time and place and individuals in order to sustain a competitive advantage However most leaders and managers are unacquainted with effective knowledge flow practices Harnessing Dynamic Knowledge Principles in the Technology Driven World provides actionable principles of Knowledge Flow Theory to identify and solve problems for implementing these principles into practice With emerging developments and widespread applicability this book is a practical guide for scholars business managers and enterprise leaders and managers interested in understanding the dynamics of knowledge flows for competitive advantage in a technology driven world *Creating Value with Science and Technology* Eliezer Geisler,2001-08-30 Do science and technology create value for society and the economy and how might one go about measuring it How do we evaluate its benefits Can we even be certain that there are benefits Geisler argues that there are benefits and that they outweigh in value the negative impacts that inevitably accompany them His revolutionary new book goes on to show that they can also be measured and evaluated and in one volume all of the existing knowledge on how to do it is compiled then Geisler s own methods are offered The result is a compelling argument that the value of science and technology in our lives has indeed been positive and that the economic well being of all individuals organizations and nations rests upon them Geisler starts off by describing his conceptual framework for the evaluation of science and technology and the impact and benefits that proceed from them He discusses the nature of evaluation in general terms and then in the specific context of science technology and innovation together He reviews the state of our present knowledge and assesses the nature of value creation itself Throughout Geisler remains fixed on his driving thesis Although there are certainly some negative impacts from science and technology on the whole the results of its outputs are positive He shows how they have contributed to a range of activities and institutions particularly to the improvement of health and human welfare worldwide Finally after discussing the theories of evaluation he gets down to the practice providing readers with a way to assess science and technological innovations for themselves **Online and**
