Policy And Operations In The Mediterranean 1912 14 Publications Of The Navy Records Society:

The Naval War in the Mediterranean Paul G. Halpern, 2015-10-05 This volume originally published in 1987 fills a gap in a neglected area Looking at the entire war in the Mediterranean the volume examines the war from the viewpoint of all the important participants making full use of archives and manuscript collections in Britain France Italy Germany Austria and the United States A fascinating mosaic of campaigns emerges in the Adriatic Straits of Otranto and the Eastern Aegean The German assistance to the tribes of Libya the threat that Germany would get her hands on the Russian Black Sea Fleet and use it in the Mediterranean and the appearance and influence of the Americans in 1918 all took place against a background of rivalry between the Allies which frustrated the appointment of Jellicoe in 1918 as supreme command at sea in a role similar to that of Foch on land

Policy and Operations in the Mediterranean, 1912-14 Esmond Walter Rawson Lumby, 1970 The documents in this focus on the Mediterranean in the years 1912 to 1914 are grouped in four sections each with an informative Introduction The first covers the debate on British policy in the Mediterranean which occurred soon after Winston Churchill became First Lord of the Admiralty as well as the conversations between Britain and France in the years before the start of the Great War at both naval and diplomatic levels The second section records the movement of the German battle cruiser Goeben and the light cruiser Breslau in the days between July 27 and August 14 1914 The escape of the Goeben and Breslau from the British Mediterranean fleet after the declaration of war was the grounds for a Court of Enquiry and the Court Martial of Rear Admiral E C T Troubridge which are reported in the third section And the fourth part deals with British naval activity with particular reference to Turkey and Turkish waters after these two German ships succeeded in reaching the Dardanelles

Publications of the Navy Records Society, 1984 **The Policy of the Entente** Keith M. Wilson, 1985-01-31 This book presents a realistic assessment of British priorities in the years before 1914 *A Life of Admiral of the Fleet Andrew Cunningham* Michael Simpson, 2020-09-23 This book presents an account of the life of naval commander Andrew Cunningham the best known and most celebrated British admiral of the Second World War It supplements Cunningham's papers by Cabinet and Admiralty records papers of his service contemporaries and of Churchill

Churchill and Sea Power Christopher M. Bell, 2014-05 The first major study of Winston Churchill's record as a naval strategist and his impact as the most prominent guardian of Britain's sea power in the modern era **The Royal Navy in the Mediterranean, 1915-1918** Paul G. Halpern, 1987 This volume needs to be read in conjunction with NRS Volume 115 *Policy and Operations in the Mediterranean 1912 1914* The Mediterranean was a secondary theatre for the Royal Navy and the ships tended to be ageing and retired from fleet duty France assumed the major responsibility along with Italy but the Royal Navy retained a strong presence and performed vital functions Most operations have attracted less attention than Jutland the Falklands or the Battle of the Atlantic but Gibraltar and Malta remained important bases the Suez Canal had to be defended there was a mine barrage in the Otranto Straits and the Navy supported the Army at the Dardanelles Salonika

and in the Middle East while there was latterly much convoy work The sources include the main war history collection of Admiralty papers The National Archive PRO ADM 137 and the private papers of senior commanders such as Howard Kelly Limpus and de Robeck British Naval Intelligence through the Twentieth Century Andrew Boyd,2020-08-30 An acclaimed military historian examines the vital role of British naval intelligence from the mid nineteenth century to the end of the Cold War In this comprehensive account Andrew Boyd brings a critical new dimension to our understanding of British naval intelligence From the capture of Napoleons signal codes to the satellite based systems of the Cold War era he provides a coherent and reliable overview while setting his subject in the larger context of the British state It is a fascinating study of how naval needs and personalities shaped the British intelligence community that exists today Boyd explains why and how intelligence was collected and assesses its real impact on policy and operations Though he confirms that naval intelligence was critical to Britains victory in both World Wars he significantly reappraises its role in each He reveals that coverage of Germany before 1914 and of the three Axis powers in the interwar period was more comprehensive and effective than previously suggested and while British power declined rapidly after 1945 the book shows how intelligence helped the Royal Navy to remain a significant global force for the rest of the twentieth century **Crisis in the Mediterranean** Jon K Hendrickson,2014-04-15 Prior to July 1914 the extensive British grip on the Mediterranean Sea was beginning to weaken leading to a wide open competition between Austria Hungary Italy France and Great Britain This change Jon Hendrickson contends was driven by three largely understudied events the weakening of the British Mediterranean Fleet to provide more ships for the North Sea Austria Hungary s decision to build a navy capable of operating in the Mediterranean and Italy s decision to seek naval security in the Triple Alliance after the Italo Turkish War These three factors radically altered the Mediterranean balance of power forcing Britain and France to come to a mutual accommodation and accelerate ship construction to defend their respective interests in the region However the July Crisis and the ensuing World War obscured these events leading later historians to ignore these events A Liberal Chronicle in Peace and War Joseph Albert Pease Baron Gainford,2023 Jack Pease was at the heart of the British Liberal government from 1908 to 1915 holding the position of Chief Whip through two general elections and a member of the Cabinet confronting domestic tumult international tensions and war Pease s text provides a uniquely comprehensive understanding of Asquith s government in peace and war

Gallipoli Paul Neumann, Shortly and formally the Battle of Gallipoli also known as the Dardanelles Campaign can be described as a failed amphibious operation launched by the Allies in a strategically important region of Turkey in 1915 1916 It was a battle very unusual for the First World War It stood apart from the gruesome picture of bloody and ineffectual battles of the Western front and resembled rather colonial wars of the preceding century The Plans of War John Gooch,2015-10-05 This book s contribution to the discussion on the origin s of the First World War is a pioneering study of both the British General Staff and the evolution of military strategy in the period immediately prior to the war It describes

the development of the General Staff Britain's agency for strategic planning and goes on to give an account of its role in devising strategy Problems are examined as they arose at grass roots level in the War Office and progressed upward towards the Cabinet The complex cross currents involving the Admiralty Foreign Office Treasury and individuals from Edward VII downwards are charted The account covers British military policy up to 1916 interpreting the Gallipoli campaign and explanation for its failure

Anglo-American Naval Relations, 1917-1919 Michael Simpson, 1991 This collection of documents some half of which are from American sources traces the relationship between the Royal Navy and the United States Navy the British Admiralty and the US Department of the Navy and the British and United States governments on naval matters from before America's entry into the Great War in 1917 until the Paris Peace Conference in 1919 The pacific President Wilson's decision to declare war on Germany on 6 April 1917 became inevitable once Germany resumed unrestricted submarine warfare on all neutral and Allied shipping That gamble was based on the belief that Britain would be starved into surrender before America's vast resources could be mobilised It very nearly succeeded When America entered the war U boats were sinking one in every four ocean going vessels clearing British ports and in April 1917 alone almost 900 000 tons of Allied and neutral shipping was lost Britain was down to just a few weeks supply of grain and the Grand Fleet was reduced to steaming at half speed for want of fuel oil Clearly the priority was to counter the U boats but despite ample evidence of its effectiveness in specific cases introduction of a convoy system was opposed by both navies on the grounds that it was a defensive policy which would not result in increased U boat sinkings Once introduced in May 1917 it proved an immediate success both dramatically reducing losses and increasing U boat losses However despite preliminary discussions prior to the US declaration of war driven notably by the then Assistant Secretary of the Navy and future President Franklin D Roosevelt and the Anglophile Ambassador to Britain Walter Hines Page the US Navy was woefully unprepared for war and at least initially more of a drain on allied resources than an asset Moreover while the Admiralty made desperate pleas for the smaller craft needed to counter U boats in the Western Approaches Washington continued to pursue a capital ship building programme and to retain submarine counter measure vessels on America's Eastern seaboard despite little or no evidence of U boat activity in those waters And while a close and successful partnership developed at sea from the outset suspicion and rivalry underlay the wider relationship and rapidly resurfaced once the guns fell silent due in no small part to pronounced Anglophobia at higher levels in the US Navy The papers are divided into nine sections each with its own introduction and cover preliminary discussions before America's declaration of war integration of the two navies activities while staving off defeat by the U boats the gradual development of a harmonious working relationship as America's commitment to the war increased and the last year of the war in which the relationship came to fruition Subsequent sections then deal with more specific topics the submarine war US battleships in European waters the North Sea mine barrier the Mediterranean the Western Atlantic and the Caribbean and finally the naval armistice and the Peace Treaty

The overriding image of the First World War is the bloody stalemate of the Western Front but although much of the action did occur on land the overall shape of the war _ even the inevitability of British participation _ arose out of its maritime character It was essentially a struggle about access to worldwide resources most clearly seen in the desperate German attempts to deal with the American industrial threat which ultimately levered the United States into the war and thus a consequence of British sea control rn This radical new book concentrates on the way in which each side tried to use or deny the sea to the other and in so doing it describes rapid wartime changes not only in ship and weapon technology but also in the way naval warfare was envisaged and fought Combat produced many surprises some like the impact of the mine and torpedo are familiar but this book also brings to light many previously unexplored subjects like creative new tactical practices and improved command and control rn The contrast between expectation and reality had enormous consequences not only for the course of the war but also for the way navies developed afterwards This book melds strategic technical and tactical aspects to reveal the First World War from a fresh perspective but also demonstrates how its perceived lessons dominated the way navies prepared for the Second **Policy and operations in the Mediterranean 1912-14. Grainger, 2022-07-28 The great city of Byzantium Constantinople Istanbul stands on a commanding cape overlooking a busy waterway It has been the target of repeated attempts to capture it for the past two and a half millennia Most of these attacks failed but some did so in spectacular fashion such as the great Arab sieges The inhabitants fought hard in almost every siege with the result that when the city was captured it was also destroyed or at least suffered a hideous sack Almost every nation between the Atlantic and the Steppes of Asia have made attempts to capture the city some repeatedly but only a few a Roman emperor the Crusaders the Turks have succeeded And there is no sign that some have given up the hope of taking it the last sieges were just before and then during the Great War by the Bulgars and then by the Allies who got no closer than Gallipoli but the city had to submit to enemy occupation when the empire it ruled collapsed It is still surrounded by envious neighbours who wish to control it The city has been besieged forty times and has been captured on three or four occasions it cannot be said to be safe yet It is still The City of the World s Desire **The War Plans of the Great Powers (RLE The First World War)** Paul Kennedy, 2014-04-24 The origins of the First World War remain one of the greatest twentieth century historical controversies In this debate the role of military planning in particular and of militarism in general are a key focus of attention Did the military wrest control from the civilians Were the leaders of Europe eager for a conflict What military commitments were made between the various alliance blocks These questions are examined in detail here in eleven essays by

distinguished historians and the editor's introduction provides a focus and draws out the comparative approach to the history of military policies and war plans of the great powers *Affondate il Goeben! La più lunga azione aeronavale della Prima guerra mondiale (20-28 gennaio 1918)* Giancarlo Finizio, 2018-04-23 Inquadrandole nel contesto politico militare della Grande Guerra nel teatro del Medio Oriente e del Mediterraneo orientale il libro racconta ed analizza le vicende della sortita dallo Stretto dei Dardanelli nel Mar Egeo compiuta nel gennaio del 1918 dagli incrociatori tedeschi Goeben e Breslau trasferiti al servizio della Turchia nel 1914 L'attacco portato da queste due unità al dispositivo aeronavale inglese che sorvegliava gli Stretti turchi dette origine ad una lunga azione militare nella quale l'aviazione ebbe la prima vera possibilità di dimostrare la sua capacità di affondare da sola una potente nave da battaglia Con l'ausilio dei documenti d'archivio il volume ricostruisce per la prima volta nel dettaglio la storia dei reiterati attacchi portati contro il Goeben dai velivoli inglesi i quali per il prolungato e massiccio impiego di uomini e mezzi rimasero un caso unico nella Prima guerra mondiale prefigurando piuttosto scenari che sarebbero diventati caratteristici della guerra aeronavale del successivo conflitto mondiale in particolare nel Mediterraneo
