Science Fiction: A Critical Guide Patrick Parrinder, 2021-05-18 This book first published in 1979 presents a portrait of science fiction as a distinct form of serious and creative literature. Contributors are drawn from Britain, America, and Europe and range from well-known academic critics to young novelists. The essays establish the common properties of science fiction writing and assess the history and significance of a field in which critical judgements have often been unreliable. The material ranges from the earliest imaginative journeys to the moon to later developments of British, American, and European science fiction.

Around the World in Eighty Days Jules Verne, 2007-05-01 After making an audacious wager, the wealthy and eccentric Phileas Fogg attempts a seemingly impossible feat to circumnavigate the globe in eighty days. Upon making a bet with his colleagues at the Reform Club, the otherwise mechanically predictable Phileas Fogg sets off on a race to travel around the world in no more than eighty days. With 20,000 on the line, every hour is crucial. Accompanied by his emotional French manservant Passepartout, Fogg travels east from London, making stops in Suez, Bombay, Hong Kong, San Francisco, and New York, traveling by rail, steamship, elephant, sailboat, and sledge. The two are followed all the while by Detective Fix of the London Police, who is convinced that Fogg is the man suspected in a robbery of the Bank of England that occurred shortly before the start of this curious journey. The wild adventures of Phileas Fogg and Passepartout as they race across continents and oceans have entertained readers since the book's first publication in 1873. This edition includes a concise introduction that gives the reader important background information, a chronology of the author's life and work, a timeline of significant events that provides the book's historical context, an outline of key themes and plot points to guide the reader's own interpretations, detailed explanatory notes, critical analysis including contemporary and modern perspectives on the work, discussion questions to promote lively classroom and book group interaction, a list of recommended related books and films to broaden the reader's experience. Enriched Classics offer readers affordable editions of great works of literature enhanced by helpful notes and insightful commentary. The scholarship provided in Enriched Classics enables readers to appreciate, understand, and enjoy the world's finest books to their full potential.

The Dawn of Political Nihilism Professor David Ohana, 2008-12-04 In the turbulent period between 1870 and 1930, the contours of modernity were taking shape, especially the connections between technology, politics, and aesthetics. The trilogy *The Nihilist Order* traces the genealogy of the nihilist totalitarian syndrome. Until now, nihilism and totalitarianism were considered opposites: one an orderless state of affairs, the other a strict regimented order. On closer scrutiny, however, a surprising affinity can be found between these two concepts that dominated the history of the first half of the twentieth century. Starting with Nietzsche's philosophy, this book traces the

development of an intellectual school characterised by the paradoxical dual purpose of a wish to destroy coupled with a strong desire to create imposing structures This explosive combination of nihilist leanings together with a craving for totalitarianism was an ideal of philosophers cultural critics political theorists engineers architects and aesthetes long before it materialised in flesh and blood not only in technology but also in fascism Nazism bolshevism and radical European political movements Friedrich Nietzsche Georges Sorel the Italian Futurists led by Filippo Tommaso Marinetti and Ernst J nger were all well known intellectual and cultural figures Here they are seen and understood in a different light as creators of a modern political mythology that became a source of inspiration for belligerent ideological camps Among the ideas propagated by this school and later adopted by totalitarian regimes were historical nihilism a revolt against the rationalistic and universalistic pretensions of the Enlightenment an affirmation of the dynamism of modern life and the replacement of the traditional Judeo Christian values of good and evil by other dualities such as authenticity and decadence Concurrently there took place affirmation of the technological era the creation of a new man and a violent order and the birth of a new political style in place of traditional world views When channelled into the political sphere these aesthetic nihilist ideas paved the way for the rise of totalitarianism

Interpretative Archaeology Christopher Tilley, 2020-05-26 This fascinating volume integrates recent developments in anthropological and sociological theory with a series of detailed studies of prehistoric material culture The authors explore the manner in which semiotic hermeneutic Marxist and post structuralist approaches radically alter our understanding of the past and provide a series of innovative studies of key areas of interest to archaeologists and anthropologists [The Triumph of Human Empire](#) Rosalind Williams, 2022-12-22 In the early 1600s in a haunting tale titled New Atlantis Sir Francis Bacon imagined the discovery of an uncharted island This island was home to the descendants of the lost realm of Atlantis who had organized themselves to seek the knowledge of Causes and secret motions of things and the enlarging of the bounds of Human Empire to the effecting of all things possible Bacon's make believe island was not an empire in the usual sense marked by territorial control instead it was the center of a vast general expansion of human knowledge and power Rosalind Williams uses Bacon's island as a jumping off point to explore the overarching historical event of our time the rise and triumph of human empire the apotheosis of the modern ambition to increase knowledge and power in order to achieve world domination Confronting an intensely humanized world was a singular event of consciousness which Williams explores through the lives and works of three writers of the late nineteenth century Jules Verne William Morris and Robert Louis Stevenson As the century drew to a close these writers were unhappy with the direction in which their world seemed to be headed and worried that organized humanity would use knowledge and power for unworthy ends In response Williams shows each engaged in a lifelong quest to make a home in the midst of human empire to transcend it and most of all to understand it They accomplished this first by taking to the water in life and in art the transition from land to water offered them release from the condition of human domination At the same time each writer transformed his world by exploring the literary boundary between realism and romance Williams shows how Verne Morris and Stevenson experimented with romance and fantasy and how these traditions allowed them to express their growing awareness of the need for a new relationship between humans and Earth The Triumph of Human Empire shows that for these writers and their readers romance was an exceptionally powerful way of grappling with the political technical and environmental situations of modernity As environmental consciousness rises in our time along with evidence that our seeming control over nature is pathological and unpredictable Williams's history is one that speaks very much to the present

Children's Lit in China, A history of children's literature in China set in the framework of China's revolution and modernization Lu Xun and his brother Zhou Zhuren were the founding fathers of the idea of the political importance of children and how that connected with literature tailored for them in the 20s and 30s

Children's Literature in China: From Lu Xun to Mao Zedong Mary Ann Farquhar, 2015-04-22 This book introduces the major works and debates in Chinese children's literature within the framework of China's revolution and modernization It demonstrates that the guiding rationale in children's literature was the

political importance of children as the nation's future Fuel Karen Pinkus, 2016-11-01 Fuel is an idiosyncratic speculative dictionary of fuels real and imagined historical and futuristic hopeless and utopian Drawing on literature film and scientific treatises most produced long before climate change was in circulation Fuel argues for a distinction between energy a system of power and fuel a substance which can be thought of as potentiality as it endeavors to undo the dream that we can simply switch to renewables and all will be golden From Air to Zyklon B entries in this unusual dictionary include Algae Clathrates Dilithium Fleece Goats Theology Whale Oil and many many more The tone of the entries ranges as widely as the topics from historical anecdotes the Ford Fiesta boozemobile to eccentric readings of the classics of energy lit Germinal and Oil from literary observations a high octane Odyssey to excursions into literary theory The dictionary draws from an eccentric canon including works by Jules Verne George Eliot's Silas Marner Paolo Bacigalupi's Windup Girl and the Tom Cruise vehicle Oblivion among others A message from this ambitious project is that energy can be understood as a heterogeneous set of self mystifying systems or machines that block access to thought as they fascinate us Fuels emerge as more primal elements that the audience can grasp at various points along the way to consumption combustion This dictionary can help scramble our thinking about fuel not in order to demonize energy and not in order to create a new hierarchy in which certain renewables take over from fossil fuels but instead to open up potential ways of interacting with real and imaginary substances by wrenching them out of narrative and placing them into an idiosyncratic dictionary to be applied by readers into new narratives
