Vincent, Guy Patterson, Karen Wale, 2024-11-01 This title was first published in 2001 Older people have been characterized by two mutually contradictory stereotypes One the one hand they have been portrayed as a powerful lobby growing demographically and able to demand large redistributions of the nation s income in their direction On the other hand they have been typified as a marginalized group at high risk of poverty and exclusion and in a political context largely powerless This book examines using original research conducted by the Older People and Politics Project OPPOL within Exeter University s Sociology Department the reality of the impact of the increasing number of older people on the British political process The project had three main investigative concerns how effective are pressure groups and lobbyists for older people how is the power and influence of older people perceived by older people themselves and the general public and how are politicians responding to older people and their needs

Gerontology and the Construction of Old Age Bryan Green, 2017-09-08 Although attitudes toward the aged and their care are inherent in any society gerontology itself is a relatively recent field of study and practice Gerontology and the Construction of Old Age applies the methods of discourse analysis and textual analysis to texts and documents in this newly evolved and eclectic field Green explores and identifies the literary methods and discursive regularities through which aging and the aged have been made into objects of study and treatment and which together form a mode of knowledge production that will influence future texts in the field Because such formats of representation limit rational diagnoses of problems and rational courses of ameliorative action policy implications in the field of gerontology are a major interest of this study Another interest is methodological Within the broader constructionist approach to social reality Green takes the position of constitutive realism the notion that social reality is linguistically constructed primarily in speech and writing The book s two aims are to describe analytically the field of gerontology The field is important both for its growing academic presence and for its practical effects on discourse and policy concerning old age It also hopes to help develop possibilities of inquiry

associated with the linguistic literary and rhetorical turns of social science in recent years Gerontology and the Construction of Old Age is a substantive investigation at considerable theoretical depth of gerontology itself as well as a methodological treatise with broader implications for social science as it focuses upon the discourse of various professional fields *Journal of the United States Artillery*, 1922
