Redefining Student Learning Roots Of Educational Change:

Redefining Student Learning Hermine H. Marshall, 1992 Presenting an alternative view of where educational reform must begin the contributors contend that we must begin with rethinking the nature of learning and with newer knowledge about how students learn Only then can the conditions that support the type of learning that will create productive citizens for the 21st century be considered The book begins with the need to redefine learning by increasing awareness of the relationship between how students learn and efforts to improve schools The next seven chapters present examples of classroom research to provide a glimpse of what happens when teachers implement newer views of learning based on how students actively construct knowledge in meaningful and multi connected networks These examples serve to provide clues about what learning may look like in classrooms with these goals and to raise questions about factors that support and or constrain teachers in providing opportunities for students to extend understanding to solve complex problems

Perceiving, Behaving, Becoming H. Jerome Freiberg, 1999 In 1962 ASCD's *Perceiving Behaving Becoming A New Focus for Education* provided bold insights on the psychological foundation of education Some of the most compelling questions in education today were first asked in this groundbreaking work which included chapters by preeminent scholars Arthur Combs Earl Kelley Abraham Maslow and Carl Rogers Although we cannot predict what current information future generations will need to know the book's Introduction states creating schools that encourage the development of persons with adequate fully functioning personalities is the best way to contribute some degree of stability to an uncertain future Decades later in preparing *Perceiving Behaving Becoming Lessons Learned* editor H Jerome Freiberg invited distinguished scholars in the field of affective humanistic education and psychology to review these four chapters from the 1962 book to provide a context for lessons learned for future generations of educators Each author in *Lessons Learned* works with teachers administrators and schools and offers a distinct perspective on the human side of teaching and learning Their analyses raise significant issues such as whether an emphasis on academic standards ignores the education of the whole student and what schools that are committed to an environment of trust and respect look like *Lessons Learned* promises to further the cause of education that focuses on the person By understanding the evolution of our educational past says

Freiberg perhaps we can shape a future that will better meet the needs of generations that come after us **Engaging Environmental Education**, 2010-01-01 As more attention is devoted to the increasing and complex socio ecological issues facing the planet new insights and new ways of thinking are being sought about the learning and agency of children and adults in relation to these environmental concerns The contributors to this book address the critically important dual challenge of making environmental education engaging while engaging individuals institutions and communities Rather than treating students and citizens as passive recipients of other people's knowledge the book highlights the importance of engaging learners as active agents in thinking about and constructing a more sustainable and equitable quality of life The

case studies emphasize socio cultural approaches to environmental learning within and outside formal education in a diverse range of international contexts including Canada Denmark Korea the Netherlands South Africa Sweden the United Kingdom and the United States The authors not only illuminate the challenges and complexity of engaging youth and adults in meaningful learning as well as informed action on complex environmental issues but also document and offer important insights into promising ways in which these challenges might be addressed In addition to the many stimulating ideas and strategies for building the learning capacities of individuals and organizations for creating ecologically sustainable communities and societies further important questions are raised that educators policymakers and researchers might consider

Understanding the Language Classroom S. Gieve, I. Miller, 2005-11-30 The starting point for this collection is a chapter by Dick Allwright on the language learning and teaching classroom experience entitled Six Promising Directions in Applied Linguistics The other distinguished contributors respond to this discussion with their own interpretations and from their own experience The collection problematizes prescription efficiency and technical solutions as orientations to classroom language learning Complexity and idiosyncrasy on the other hand are recognized as central concepts in a move towards centralizing teachers and learners own understanding of classroom life in the contexts of language learning adult literacy

education and language teacher education Learning, Social Interaction and Diversity – Exploring Identities in School Practices Eva Hjörne, Geerdina van der Aalsvoort, Guida de Abreu, 2012-09-05 The main idea of the book is to contribute to a broader understanding of learning identity and diversity by presenting actual research findings that were retrieved from classroom settings and related social practices Learning is to a large extent an ongoing social process as both students and their teachers learn by being part of shared social practices through social interactions that facilitate learning gains Sociocultural research shows that the organization of schooling promotes or restricts learning and is a crucial factor to understand how children from a diversity of backgrounds profit from instruction This is a first urgent issue to be considered by teachers and teacher education in our socio and culturally diverse society A second issue is the on going debate about learning as a process that involves the construction of identities in schools and classrooms and in the transitions between school and home practices Last but not least since school practices can be addressed from the perspective of diversity and special educational needs an on going discussion about optimizing pedagogical approaches is of main importance to allow maximum educational effectiveness Our potential audience for this book are researchers post graduate students in education and psychology teachers teacher education other academics and policy makers Writing Portfolios in the Classroom Robert Calfee, Pamela Perfumo, 2012-10-12 This volume presents chapters by researchers practitioners and policymakers who study the impact of classroom portfolios in the assessment of writing achievement by elementary and middle grade students The focus throughout the volume is on the tension between classroom assessment and externally mandated testing It presents the efforts of researchers practitioners and policymakers to understand the impact of classroom portfolios for the assessment of writing achievement by elementary and middle grade students Under the auspices of the Center for the Study of Writing the editors conducted a national survey of exemplary portfolio projects arranged for a series of video visits and held several working conferences The result of this work is a broad ranging tale the aspirations of teachers and administrators to move the machinery of schooling in the direction of more authentic and engaging tasks the puzzlement of students when they realize that the assignments are real and that the teacher may not have a right answer in mind and the tensions between ivory tower ideas and everyday classroom practice Divided into four sections this research volume provides a historical perspective develops the conceptual framework that serves as a background for many activities described throughout and discusses numerous practical issues that confront today s researchers and practitioners views the phenomenon of writing portfolios through a variety of broadview lenses such as teacher enthusiasm student reflection assessment tension the portfolio as metaphor and the locus of control conveys important conceptual issues with a balance toward pragmatics and offers unique insights from the perspective of one individual who serves as scholar researcher and teacher Discourse Analysis of Language and Literacy Events in Educational Settings David Bloome, Stephanie Power-Carter, W.
