Redefining the Corporation James E. Post, Lee E. Preston, Sybille Sachs, 2022 The modern corporation is an institution of enormous economic power and social impact Corporations have grown in size and numbers all over the world because of their ability to mobilize productive resources and create new wealth The evolution of the corporation has given rise to new opportunities and challenges that require a redefinition of the corporation and its objectives The legitimacy of the corporation as an institution its license to operate within society depends not only on its success in wealth creation but also on its ability to meet the expectations of diverse constituents who contribute to its existence and success These constituencies and interests are the corporation's stakeholders resource providers customers suppliers alliance partners and social and political actors Consequently the corporation must be seen as an institution engaged in mobilizing resources to create wealth and benefits for all its stakeholders This book presents a stakeholder view of the corporation in both theoretical and practical terms Its central proposition is that organizational wealth is created or destroyed through a corporation's interactions with its stakeholders Effective stakeholder management develops and utilizes relationships between a corporation and its stakeholders for mutual benefit thereby accomplishing the fundamental purpose of wealth creation Following the empirical maxim that Corporations are what they do the authors examine the stakeholder management practices of three major corporations Cummins Engine Company Motorola and the Royal Dutch Shell Group These companies are very different and their current stakeholder management policies and practices have evolved in very different ways However they share a common commitment to humanistic values and to continuous learning Their varied experiences illustrate some of the opportunities and challenges of stakeholder management and confirm the appropriateness of the stakeholder view of the corporation as a basis for strategy and policy

Rethinking Capitalism Rogene Buchholz, 2013-02-01 Given the recent financial meltdown and continuing economic problems the country and the world are facing Rethinking Capitalism is particularly relevant With the government having bailed out banks and other financial institutions as well as automobile companies and anger over the compensation and severance packages provided to the managers of failed institutions in light of growing inequalities and continued high unemployment in American society many are wondering if self interest driven free market capitalism is still viable While there is some support for more active government regulation of financial and other institutions there is also significant opposition to such an approach as new political movements gain strength Are there other alternatives to create a more responsible capitalism that serves the entire society Rethinking Capitalism questions the individualistic assumptions of a capitalist society and offers a new way to understand capitalism that entails a new role for business based on community and responsibility Using classical American Pragmatism as a philosophical framework for capitalism Professor Buchholz analyzes the history of capitalistic thought and proposes that we recast management as a profession akin to law and medicine oriented toward serving the public rather than just maximization of shareholder wealth Buchholz challenges the way we understand capitalism with its emphasis on the creation of economic wealth and growth to the exclusion of other important goals and champions a new approach to the creation of a more sustainable and responsible functioning of the capitalistic system the corporate organization and its management
