Redesigning Humans Choosing Our Childrens Genes:

Redesigning Humans Gregory Stock,2002 Cloning and genetic engineering are here now and cannot be stopped Far from being terrified we should celebrate these new technologies for making a better future argues Gregory Stock

Redesigning Humans Gregory Stock,2002 Examines potential uses for genetic technology including the ability to identify and manipulate genes and the social and moral consequences of such decisions **Redesigning Humans** Gregory Stock,2003 Writing for the lay reader Stock the director of the Program on Medicine Technology and Society at the School of Public Health at UCLA discusses the science potential impact and many controversies surrounding the development of germline engineering which involves selectively altering human g

Theology and the Body Stephen Garner,2011-12-31 The human body is the primary lens through which we view encounter and engage the world around us It is no surprise then to find a wide range of theological reflection upon the human body from those that affirm the human body as something very good through to other more negative views where the body is something to be marginalised or escaped from The body and theology also meet in conversations over body mind and soul gender disability eschatology race and culture sexuality Christology and medicine and technology to name but a few Each of the authors in this volume pick up the theme of embodiment as the lens through which they look at an aspect of theology and body providing an engaging window onto some of these discussions **Science and Religion in Education** Berry Billingsley,Keith Chappell,Michael J. Reiss,2019-11-06

This book brings together the latest research in education in relation to science and religion Leading international scholars and practitioners provide vital insights into the underlying debates and present a range of practical approaches for teaching Key themes include the origin of the universe the theory of evolution the nature of the human person the nature of science and Artificial Intelligence These are explored in a range of international contexts The book provides a valuable resource for teachers students and researchers in the fields of education science religious education and the growing specialist field of science and religion Science and Religion in Education is a compelling read for current and future generations of academic researchers and teachers who wish to explore the fascinating intersect between science education and religious studies The research findings and insights presented by these international scholars offer new dimensions on contemporary practice Vaille Dawson Professor of Science Education University of Western Australia Science and Religion in Education offers a fascinating and diverse collection of chapters surveying the current state of thinking about how science and religion can be understood in education The book offers a wealth of thought provoking material for anyone interested in the natures of science and religion their relationship s or their representation within the curriculum Professor Keith Taber University of Cambridge Science education and religious education are uncomfortable bedfellows This book written in part as a response to the perhaps too clear accounts of Ian Barbour provides suitably nuanced pictures of how science and religion are dealt with in schools Whatever the views of specialists young people receive an education in both science and religion hearing

their voices is refreshing in such a serious academic account Julian Stern Professor of Education and Religion York St John University Humans have long endeavored to make sense of the world often using science and religion Yet these two great traditions are frequently seen as incompatible This useful volume features thoughtful contributions from experts whose work straddles the divide and provides educators with arguments engaging strategies and historical perspectives to help build a bridge and allow a fruitful discussion in schools William F McComas Distinguished Professor of Science Education University of Arkansas Equal parts critical examination of existing models for the relationship between science and religion scholarly exposition of newer models and insights toward practical application in classrooms this book is an invaluable resource for science and religion educators If you have been thinking it is time we looked beyond Barbour s taxonomy you will want to read this book If you have not I implore you to read this book Jason Wiles Associate Professor of Biology and Science Education Syracuse University

Ferocious Minds Damien Broderick, 2005-01-01 Two centuries ago the first Enlightenment failed when its dream of reason smashed into the passions and fury of stubborn humans Without a deep broad understanding of the world the emerging Enlightenment was left floundering its best impulses perverted into the bloody excess of the French Revolution Arguably its idealism and noble goals led directly and shockingly to the 20th century s totalitarian nightmares Now the 21st century is learning anew the Faustian hunger to know everything that can be known But Enlightenment values of reason and tolerance enriched by new knowledge face a complex world no less eager to embrace medieval terrorism and ancient superstitions a world bizarrely denying itself many of the fresh opportunities and insights availed by science Can we find cures for poverty unhappiness ignorance the ruination of the planet aging and perhaps for death itself If so should we Damien Broderick s own ferocious mind invites you to explore today s unexpected treasure house of understanding and provides enticing glimpses of tomorrow s

Neoliberalism and Technoscience Marja Ylönen, Luigi Pellizzoni, 2016-04-22 This book provides a comprehensive assessment of the connection between processes of neoliberalization and the advancement and transformation of technoscience Drawing on a range of theoretical insights it explores a variety of issues including the digital revolution and the rise of immaterial culture the rationale of psychiatric reforms and biotechnology regulation discourses of social threats and human enhancement and carbon markets and green energy policies A rich exploration of the overall logic of technoscientific innovation within late capitalism and the emergence of a novel view of human agency with regard to the social and natural world this volume reveals the interdependence of technoscience and the neoliberalization of society Presenting the latest research from a leading team of scholars Neoliberalism and Technoscience will be of interest to scholars of sociology politics geography and science and technology studies

The Politics of Life Itself Nikolas Rose, 2009-02-09 For centuries medicine aimed to treat abnormalities But today normality itself is open to medical modification Equipped with a new molecular understanding of bodies and minds and new techniques for manipulating basic life processes at the level of molecules cells and genes medicine

now seeks to manage human vital processes The Politics of Life Itself offers a much needed examination of recent developments in the life sciences and biomedicine that have led to the widespread politicization of medicine human life and biotechnology Avoiding the hype of popular science and the pessimism of most social science Nikolas Rose analyzes contemporary molecular biopolitics examining developments in genomics neuroscience pharmacology and psychopharmacology and the ways they have affected racial politics crime control and psychiatry Rose analyzes the transformation of biomedicine from the practice of healing to the government of life the new emphasis on treating disease susceptibilities rather than disease the shift in our understanding of the patient the emergence of new forms of medical activism the rise of biocapital and the mutations in biopower He concludes that these developments have profound consequences for who we think we are and who we want to be

The Essential Mary Midgley David Midgley, 2004-08-02 This anthology includes carefully chosen selections from her best selling books including Wickedness Beast and Man Science and Poetry and The Myths We Live By An unrivalled introduction to a great philosopher and includes a

Biotechnology, Education and Life Politics Pádraig Murphy, 2014-04-24 What should individuals and society do when genetic screening becomes widely available and with its impact on current and future generations still uncertain How can our education systems around the world respond to these developments Reproductive and genetic technologies RGTs are increasingly controversial and political We are entering an era where we can design future humans firstly by genetic screening of undesirable traits or indeed embryos but perhaps later by more radical genetic engineering This has a profound effect on what we see as normal acceptable and responsible This book argues that these urgent and biopolitical issues should be central to how biology is taught as a subject Debate about life itself has always been at the forefront of connected molecular genetic and social personal identity levels and each of these levels requires processes of communication and debate what Anthony Giddens called in passing life politics In this book P draig Murphy opens the term up with examples from field research in schools student responses to educational films exploring the future of RGTs and science studies of strategic biotechnology and the lab practices of genetic screening Life political debate is thoroughly examined and is identified as a way of connecting mainstream education of biology with future generations Biotechnology Education and Life Politics will appeal to post graduates and academics involved with science education science communication communication studies and the sociology of education
