Arthur Augustus Allen, Ludlow Griscom

Redwing Blackbird:

Red-winged Blackbirds Les D. Beletsky, Gordon H. Orians, 1996 Drawing on detailed data from their sixteen year study of red winged blackbirds in the marshes of Washington's Columbia National Wildlife Refuge Beletsky and Orians analyze the information redwings use to make breeding season decisions and the consequences these decisions have for lifetime reproductive success Because male and female redwings make different and often independent decisions males focus on territory acquisition and maintenance while females must choose when and where to nest and how much energy to invest in reproduction the authors have taken the novel approach of studying the sexes separately Using analyses of observational data combined with field experiments and game theoretical models the authors provide new insights into the complex patterns of reproductive decision making and breeding behavior in redwings This book will be of interest to all who study social animals including behavioral ecologists evolutionary biologists and ornithologists

The Red-winged Blackbird Arthur Augustus Allen, 1914

The Red-winged Blackbird Les Beletsky, 1996 The Red winged Blackbird is not only one of North America's commonest birds but also its best studied It exemplifies the contribution that in depth species studies can make to many of the central issues in behavioral ecology In this book Les Beletsky calls on 20 years experience of redwings to provide an up to date comprehensive summary of all the major work done with these birds These studies on the redwings polygynous breeding system strong territoriality complex vocal communications and broad distribution shed light on many themes of key interest to behaviorists and ecologists interested in the evolution of mate choice and species adaptations to habitats which vary in character in different parts of their range An extra dimension is added in the consideration of redwings as pests a widespread and often serious problem in crops of rice and corn This book is written in an easy style and will serve as an introduction to both student and layperson to redwings and what they can teach us of behavioral ecology The Red winged Blackbird provides the research worker with a balanced summary and comprehensive bibliography of one of ornithology's widest and deepest studies

Key Features Covers perhaps the most studied bird in North America Presents model species for studies in mating systems habitat selection vocal communication and territorial behavior Includes a comprehensive bibliography Presented in an accessible style ideal for student use
