## Reel Nature:

Reel Nature Gregg Mitman, 2012-09-01 Winner of the History of Science Society's Watson Davis and Helen Miles Davis Prize in the History of Science From the early exploits of Teddy Roosevelt in Africa to blockbuster films such as *March of the Penguins* Gregg Mitman's *Reel Nature* reveals how changing values scientific developments and new technologies have come to shape American encounters with wildlife on and off the big screen Whether crafted to elicit thrills or to educate audiences about the real life drama of threatened wildlife nature films then and now have had an enormous impact on how Americans see think about consume and struggle to protect animals across the globe For more information about the author go to <http://gmitman.com>

*Nature's State* Susan Kollin, 2018-06-15 An engaging blend of environmental theory and literary studies *Nature's State* looks behind the myth of Alaska as America's last frontier a pristine and wild place on the fringes of our geographical imagination Susan Kollin traces how this seemingly marginal space in American culture has in fact functioned to alleviate larger social anxieties about nature ethnicity and national identity Kollin pays special attention to the ways in which concerns for the environment not only shaped understandings of Alaska but also aided U.S. nation building projects in the Far North from the late nineteenth century to the present era Beginning in 1867 the year the United States purchased Alaska a variety of literary and cultural texts helped position the region as a crucial staging ground for territorial struggles between native peoples Russians Canadians and Americans In showing how Alaska has functioned as a contested geography in the nation's spatial imagination Kollin addresses writings by a wide range of figures including early naturalists John Muir and Robert Marshall contemporary nature writers Margaret Murie John McPhee and Barry Lopez adventure writers Jack London and Jon Krakauer and native authors Nora Dauenhauer Robert Davis and Mary TallMountain

**Nature Magazine**, 1927 An illustrated monthly with popular articles about nature

Nature Wars Jim Sterba, 2013-11-12 For four hundred years explorers traders and settlers plundered North American wildlife in an escalating rampage but in the twentieth century an incredible turnaround took place Conservationists created wildlife sanctuaries restored habitats and imposed regulations on hunters and trappers Over decades they nursed many wild populations back to health Then after World War II something happened that conservationists hadn't foreseen sprawl People moved into suburbs and then kept moving outward All the while well meaning efforts to protect animals allowed wild populations to burgeon out of control causing damage costing billions degrading ecosystems and touching off disputes that polarized communities The result is a mix of people and wildlife that should be an animal lover's dream but often turns into a sprawl dweller's nightmare Deeply researched eloquently written and perceptively humorous *Nature Wars* expresses the need for organic reconnection with our natural ecosystem by offering a provocative look at how Americans created an inadvertent mess

*Reel Nature* Gregg Mitman, 1999 Americans have had a long standing love affair with the wilderness As cities grew and frontiers disappeared film emerged to feed an insatiable curiosity about wildlife The camera promised to bring us into contact with the animal world undetected and

unarmed Yet the camera's penetration of this world has inevitably brought human artifice and technology into the picture as well In the first major analysis of American nature films in the twentieth century Gregg Mitman shows how our cultural values scientific needs and new technologies produced the images that have shaped our contemporary view of wildlife Like the museum and the zoo the nature film sought to recreate the experience of unspoiled nature while appealing to a popular audience through a blend of scientific research and commercial promotion education and entertainment authenticity and artifice Travelogue expedition films like Teddy Roosevelt's African safari catered to upper and middle class patrons who were intrigued by the exotic and entertained by the thrill of big game hunting and collecting The proliferation of nature movies and television shows in the 1950s such as Disney's True Life Adventures and Marlin Perkins's Wild Kingdom made nature familiar and accessible to America's baby boom generation fostering the environmental activism of the latter part of the twentieth century Reel Nature reveals the shifting conventions of nature films and their enormous impact on our perceptions of and politics about the environment Whether crafted to elicit thrills or to educate audiences about the real life drama of threatened wildlife nature films then and now reveal much about the yearnings of Americans to be both close to nature and yet distinctly apart

*Screening Nature* Anat Pick,Guinevere Narraway,2013-11-01 Environmentalism and ecology are areas of rapid growth in academia and society at large *Screening Nature* is the first comprehensive work that groups together the wide range of concerns in the field of cinema and the environment and what could be termed posthuman cinema It comprises key readings that highlight the centrality of nature and nonhuman animals to the cinematic medium and to the language and institution of film The book offers a fresh and timely intervention into contemporary film theory through a focus on the nonhuman environment as principal register in many filmic texts *Screening Nature* offers an extensive resource for teachers undergraduate students and more advanced scholars on the intersections between the natural world and the worlds of film It emphasizes the cross cultural and geographically diverse relevance of the topic of cinema ecology

*The Moral Authority of Nature* Lorraine Daston,Fernando Vidal,2010-08-15 For thousands of years people have used nature to justify their political moral and social judgments Such appeals to the moral authority of nature are still very much with us today as heated debates over genetically modified organisms and human cloning testify *The Moral Authority of Nature* offers a wide ranging account of how people have used nature to think about what counts as good beautiful just or valuable The eighteen essays cover a diverse array of topics including the connection of cosmic and human orders in ancient Greece medieval notions of sexual disorder early modern contexts for categorizing individuals and judging acts as against nature race and the origin of humans ecological economics and radical feminism The essays also range widely in time and place from archaic Greece to early twentieth century China medieval Europe to contemporary America Scholars from a wide variety of fields will welcome *The Moral Authority of Nature* which provides the first sustained historical survey of its topic Contributors Danielle Allen Joan Cadden Lorraine Daston Fa ti Fan Eckhardt Fuchs Valentin Groebner Abigail J Lustig Gregg Mitman Michelle

Murphy Katharine Park Matt Price Robert N Proctor Helmut Puff Robert J Richards Londa Schiebinger Laura Slatkin Julia Adeney Thomas Fernando Vidal *Nature's Saviours* Graham Huggan, 2013-08-22 Today's celebrity conservationists many of whom made their reputations through television and other visual media play a major role in drawing public attention to an increasingly threatened world This book one of the first to address this contribution focuses on five key figures the English naturalist David Attenborough the French marine adventurer Jacques Yves Cousteau the American primatologist Dian Fossey the Canadian scientist broadcaster activist David Suzuki and the Australian crocodile hunter Steve Irwin Some of the issues the author addresses include What is the changing relationship between western conservation and celebrity How has the spread of television helped shape and mediate this relationship To what extent can celebrity conservation be seen as part of a global system in which conservation like celebrity is big business The book critically examines the heroic status accorded to the five figures mentioned above taking in the various discourses around nature science nation gender through which they and their work have been presented to us In doing so it fills in the cultural historical and ideological background behind contemporary celebrity conservationism as a popular expression of a chronically endangered world The Nature of College James Farrell, 2010-10-01 Stately oaks ivy covered walls the opposite sex these are the things that likely come to mind for most Americans when they think about the nature of college But the real nature of college is hidden in plain sight it's flowing out of the keg it's woven into the mascots on our T-shirts Engaging in a deep and richly entertaining study of campus ecology The Nature of College explores one day in the life of the average student questioning what natural is and what common sense is really good for and weighing the collective impacts of the everyday In the end this fascinating highly original book rediscovers and repurposes the great and timeless opportunity presented by college to study the American way of life and to develop a more sustainable better way to live **Framing Nature** Yolonda Youngs, 2024-06 Winner of the 2024 John Brinkerhoff Jackson Prize from American Association of Geographers The Grand Canyon of the Colorado River is an internationally known feature of the North American landscape attracting more than five million visitors each year A deep cultural visual and social history has shaped the Grand Canyon's environment into one of America's most significant representations of nature Yet the canyon is more than a vacation destination a movie backdrop or a scenic viewpoint it is a real place as well as an abstraction easily summoned in the minds of Americans The Grand Canyon or the idea of it is woven into the fabric of American cultural identity and serves as a cultural reference point an icon In Framing Nature Yolonda Youngs traces the idea of the Grand Canyon as an icon and the ways people came to know it through popular imagery and visual media She analyzes and interprets more than fourteen hundred visual artifacts including postcards maps magazine illustrations and photographs of the Grand Canyon supplemented with the words and ideas of writers artists explorers and other media makers from 1869 to 2022 Youngs considers the manipulation and commodification of visual representations and shifting ideas values and meanings of nature exploring the interplay between humans and their environments and how visual

representations shape popular ideas and meanings about national parks and the American West Framing Nature provides a novel interpretation of how places especially national parks are transformed into national and environmental symbols
