Reflecting Telescope Optics I

RD Boyd

Reflecting Telescope Optics I:

Reflecting Telescope Optics I Raymond N. Wilson, 2013-03-09 This is the first volume of a monumental work that will provide a complete treatment of all theoretical aspects of reflecting telescope optics. It addresses all specialists in the field both within the astronomical community and in industry and consequently particular emphasis is placed on subjects such as practical alignment test techniques and maintenance aspects. Whereas the second volume will concentrate on technical aspects and modern developments, this one is devoted to the theory of reflecting telescope optics and together with the historical development it will also prove to be useful to students. This book has real classic potential. Reflecting Telescope Optics, 1996

Reflecting Telescope Optics II Raymond N. Wilson, 2001-07-17 This book, written by the designer of the world's largest telescope, the VLT in Chile, covers the essential modern developments in telescope optics. In the last twenty years, modern technology has revolutionized not only manufacturing and test procedures but also the entire area of quality specification. In addition to these topics, the book also covers the alignment of telescope optics, atmospheric optics, adaptive optics, reflective coatings, and ancillary equipment. Richly illustrated, this work covers important modern techniques which makes it one of the most complete references on telescope optics. **Reflecting Telescope Optics**, 1996

Reflecting Telescope Optics I Ray N. Wilson, 1996 **Reflecting Telescope Optics II** Raymond N. Wilson, 2013-04-17 This volume is concerned essentially with the modern developments in reflecting telescope optics. In the last twenty years, modern technology has revolutionized not only manufacturing and test procedures but also the whole area of quality specification with the introduction of active control into the functioning telescope. Other subjects covered here are alignment of telescope optics, atmospheric optics including adaptive optics, reflecting coatings, and ancillary equipment, adapters, and baffles. Although an independent work, Vol II is heavily cross-referenced with Vol I. It is richly illustrated and gives together with Vol I the most complete list of references available; it can also therefore be regarded as a source book. *Reflecting Telescope Optics I* Ray N. Wilson, 1996

This is the first volume of a monumental work that will provide a complete treatment of all theoretical aspects of reflecting telescope optics. It addresses all specialists in the field both within the astronomical community and in industry and consequently particular emphasis is placed on subjects such as practical alignment test techniques and maintenance aspects. Whereas the second volume will concentrate on technical aspects and modern developments, this one is devoted to the theory of reflecting telescope optics and together with the historical development it will also prove to be useful to students. This book has real classic potential. Reflecting Telescope Optics I Raymond N. Wilson, 2007-09-03 Complete compendium on the physics and applications of telescope optics underlying the original and oldest of astronomical instruments. Thoroughly scholarly work that provides both the historical perspective and the state of the art technology such as the 4 lens corrector of Delabre and the LADS corrector. Newly updated edition brings this authoritative work completely up to date. From the reviews, an unequalled reference for those who have interest in the field.
