peculiar to myself I think he will be mistaken That science has long been neglected and declining in England is not an opinion originating with me but is shared by many and has been expressed by higher authority than mine I shall offer a few notices on this subject which from their scattered position are unlikely to have met the reader s attention and which when combined with the facts I have detailed in subsequent pages will be admitted to deserve considerable attention The following extract from the article Chemistry in the Encyclopaedia Metropolitana is from the pen of a gentleman equally qualified by his extensive reading and from his acquaintance with foreign nations to form an opinion entitled to respect Differing from him widely as to the cause I may be permitted to cite him as high authority for the fact
