Reflections On 25 Years Issue 80:

Feminist Periodicals ,2005 **The Metaphysics of Market Power** George Raitt,2019-05-02 Australian competition law has just emerged from a significant period of reform which has seen controversial changes to the legal test to distinguish between normal competitive conduct and conduct that should be condemned The controversy continues arguably because the traditional legal conception of market power does not provide a useful standard in real world markets This important new book offers a radical interpretation of market power based on the power to manipulate Seeing it in this way allows for positive and normative standards within which to frame a legal theory of liability for misuse of that power The book provides suggestions to improve the forensic assessment of conduct that should be condemned as misuse of market power

private finance the Private Finance Initiative and tuition fees to fund former public obligations Changes were made to the system of taxation but public expenditure changed little as a share of national income although the government now built little Difficulties emerged in ensuring adequate housing for a growing population and uncertainty grew as to where future investment in necessities like electricity supply would come from Having narrowed in the Golden Age inequality of income and wealth widened Environmental concerns also grew from the local smogs of the 1950s through the concern with acid rain from the 1960s to the current global concern with climate change The financial crash of 2008 and the decision to Brexit in the referendum of 2016 reduced economic growth and highlighted the extent of economic change since 1951 This is a study of that change
