Reflections On United States Policy:

Moral Reflections on Foreign Policy in a Religious War Ronald H. Stone, 2008-01-01 Stone argues that religion must be understood in its connections with world politics for the successful conduct of foreign policy Without peace among religions there can be no peace and without understanding the role of religion in politics there can be neither peace nor successful foreign policy

Reflections on Conservative Politics in the United Kingdom and the United States Mark McNaught, 2012-07-12 This collective work examines the different conservatisms displayed in the UK and US particularly in the areas of the meaning of rights their foreign policy mission the role of religious activism within their respective party politics and the impact of the current economic crisis on free market economic orthodoxy Drawn from both political scientists and civilizationists each of these four areas is explored in this work from both the US and the UK perspective During the 1980 s United Kingdom Prime Minister Margaret Thatcher and the United States President Ronald Reagan shared a close relationship both on a personal level and also politically in the areas of anticommunism and free market economics Thirty years later can we still say that UK and US conservatism continue to share this ideological alignment This question was explored at a conference held in Rennes France in November 2010 held in the wake of the Conservative victory in the 2010 general election followed by the attainment of a Republican majority in the House of Representatives in the US November elections This will add to the scholarly mosaic of understanding of what constitutes conservatism and help clarify the common strands of thought which unite them

Reflections on Latin American Development Roberto de Olivera Campos, 2014-11-11 Economic development has been an challenge facing the countries of Latin America Because the United States from the very nature of its geographic and economic relationship with its southern neighbors must inevitably exercise a strong influence on the course which that

development takes it is important that North Americans understand conditions in Latin America and the attitudes of its peoples Roberto de Oliveira Campos former Brazilian Minister of Economic Planning is in a unique position to evaluate both past accomplishments and future problems In this group of essays Campos gives a comprehensive analysis of many aspects of Latin American development in the mid twentieth century He examines relations between the United States and Latin America from a variety of angles and he outlines the basic problems of economic development of governmental policy and of public and private administration He gives particular attention in several essays to the relationship of foreign trade and foreign aid to economic development and he presents a long discussion of the Alliance for Progress its history its purposes its accomplishments and its failures Campos s philosophy regarding the role of the state in economic development and other questions emerges clearly from these pithy essays The valid distinction I see on the basis of my analysis of men and things is between pragmatic or functional nationalists and romantic or temperamental nationalists he writes The latter confuse intention with results They start with enthusiasm and end in fanaticism this being according to Santayana the art of redoubling efforts after losing sight of objectives Many romantic nationalists though they do not confess it favor the dangerous purgery of revolution The pragmatic nationalist seeks to operate within the frame of democratic institutions and prefers reform to revolution As to myself I shall continue considering myself a pragmatic nationalist I renounce the temptation of mobilizing resentment in order to gain the authority to plan development I would rather strengthen the national entrepreneur than merely antagonize the foreigner I would want the state not to do what it cannot do in order to do what it should do I prefer to love my own country rather than to hate the others *Reflections on the Law of War* Frits Kalshoven, 2007 The papers collected in this volume span a 35 year period of active involvement in the reaffirmation and development of international humanitarian law A process under that name started in 1971 and ended in 1977 with the adoption of two Protocols Additional to the Geneva Conventions of 1949 one for international and one for internal armed conflicts Subsequent developments brought a narrowing of this gap between international and internal armed conflicts as well as growing recognition of the interplay between the law of armed conflict and human rights the rediscovery of individual criminal liability for violations of international humanitarian law the introduction of further prohibitions or restrictions on the use of specified weapons and so on In contrast with these positive developments the period was negatively characterised by increasing disrespect not only for some or other minor rule such as what to do with cash taken from a prisoner of war at the time of his capture but for the very principles underlying the entire body of the law of armed conflict respect for the other as a human being and hence humane treatment of prisoners of war and other detainees protection of civilians Throughout the period the author s activities ranged from participation in lawmaking and law interpreting exercises through attempts at explaining the law of armed conflict in its historical context and making propaganda for its faithful implementation to critical or even bewildered observance of actual events The papers brought together here reflect these diverse angles

Reflections of a Veteran Pessimist Walter Laqueur, 2017-09-29 Having been exposed early in life to the dangers of extreme nationalism journalist and historian Walter Laqueur chose to align his thinking with Victor Hugo's ideal of a European Brotherhood where the European nations would merge into a superior unit overcoming war and strife. However as time wore on and consolidating national solidarities seemed ever more impossible Laqueur became more of a pessimist. Today he still hopes for unity but doubts that it will ever come to pass. This volume represents the culmination of thought of a most noteworthy contemporary historian. *Reflections of a Veteran Pessimist* is divided into four sections: Europe in Decline, Jews in the Twentieth Century, Russia after the Soviet Union, and Observations. Having lived under the Nazi regime Laqueur is keenly aware of the dangers posed by strident nationalism in Europe and rampant religious zealotry in the Middle East. Reflecting on the lingering financial crisis in Europe Laqueur observes its serious consequences: populist movements and growing opposition to European integration. He notes that the influx of refugees resulting from Middle Eastern instability have sharpened the challenges facing Europe and weakened its unity. Laqueur also examines the growth of authoritarian nationalism in Russia and the de facto renewal of the Cold War with the West. Offering fascinating insights into a range of themes across the period, this book is valuable reading for all those interested in twentieth century European, Russian, and Jewish history.

Reflections on Progress Kemal Dervis, 2016-08-30 Now more than ever the world needs growth oriented and socially inclusive policymaking. Is the world giving up on the promise of ever greater prosperity for all on functioning democratic institutions and on long term peace? Is the special set of circumstances that led to the recent rapid growth in emerging markets unlikely to be present in the future? Will the second decade of the twenty first century end with secular stagnation? Does the rise of authoritarianism, populism, and fanatic nihilism all experienced over the last few years threaten to unravel what has been built painstakingly since the catastrophe of World War II? Kemal Dervis addresses these and similar questions in this thought provoking series of essays written for Project Syndicate from 2011 to 2015. The essays are organized in three sections: global economic interdependence, inequality, and the political economy of reform; and the specific challenge of Europe. The common theme is the need for growth oriented and socially inclusive policymaking in an interdependent world. These kinds of policies offer the potential for another wave of unprecedented human progress aided by breathtaking new technologies. However a huge and destabilizing disruption is possible if policymaking is not globally cooperative and is not focused on inclusion and greater equity. These essays synthesize the experience and analysis of a scholar and policymaker with national, regional, and international experience at the highest levels. Dervis exhibits a passion for combining strongly held values with political feasibility.
