Work Lou Turner, Helen Neville, 2019-12-06 Recognizing Frantz Fanon's remarkable legacy to applied mental health and therapeutic practices which decolonize, humanize and empower marginalized populations, this text serves as a timely call for research, education and clinical work to establish and further develop Fanonian approaches and practices. As the first collection to focus on contemporary clinical applications of Fanon's research and practice, this volume adopts a transnational lens through which to capture the global reach of Fanon's work. Contributors from Africa, Australia, Europe and North America offer nuanced insight into historical and theoretical methods, clinical case studies and community-based innovations to place Fanon's research and practice in context. Organized into four key areas including the Historical Significance of Fanon's Clinical Work, Theory and Fanonian Praxis, Psychotherapeutic and Community Applications and Action Research, each section of the book reflects an impressive diversity of practices around the world and considers the role of political and socioeconomic context, structures of gender oppression, racial identities and their intersection within those practices. A unique manifesto to the ground-breaking and immensely relevant work of Frantz Fanon, this book will be of great interest to graduate and post-graduate students, researchers, academics and professionals in counselling psychology, mental health research and psychotherapy.

The Recovery of Philosophy in America Thomas P. Kasulis, Robert Cummings Neville, 1997-05-01 Philosophy in America enjoyed a golden age at the end of the nineteenth and beginning of the twentieth centuries with the flourishing of distinctive and original schools of pragmatism, idealism and naturalism. These American philosophies shared a family of conceptions of human experience far richer than their contemporary European schools of empiricism and phenomenology. The American conceptions of experience embrace critical and speculative conceptions of reason, presenting decisive alternatives to the Kantian foundationalist project that expressed itself in positivism, analytic philosophy and phenomenology. During the middle part of the twentieth century, these American philosophies were eclipsed by the European schools; however, philosophy was reduced from the public intellectual roles given it by the likes of William James and John Dewey to a narrow academic practice interesting to few other than academic philosophers. John Edwin Smith, through a long publishing and teaching career at Yale, has championed the rich American conceptions of experience and speculative reason, and it seems that at the end of this century they are returning in triumph. This book celebrates the recovery and new growth of American philosophy in a stunning variety of connected and vital intellectual projects represented by its contributors: George Allan Douglas, R. Anderson Lewis, S. Ford Errol Harris, Richard Hocking, Thomas P. Kasulis, George R. Lucas Jr., Robert Cummings Neville, Donald W. Sherburne, Merold Westphal, Kuang-ming Wu and Carl G. Vaught. Displaying philosophy's recovery in America, this book also honors John Edwin Smith, who has kept the history and trajectory of philosophy in America in sight and who contributes a prophetic commentary on the other essays.
