The Reform Impulse, 1825-1850 Walter Edward Hugins, 1972      *"The" Reform Impulse* Walter Hugins, Walter Edward Hugins, 1972      **The Era of the Civil War--1820-1876** US Army Military History Research Collection, 1974      **The Era of the Civil War--1820-1876** Louise A. Arnold-Friend, US Army Military History Institute, 1982      **Empire for Liberty** Wai Chee Dimock, 2021-08-10 Wai Chee Dimock approaches Herman Melville not as a timeless genius but as a historical figure caught in the politics of an imperial nation and an imperial self She challenges our customary view by demonstrating a link between the individualism that enabled Melville to write as a sovereign author and the nationalism that allowed America to grow into what Jefferson hoped would be an empire for liberty      **Americans in Dissent** Steven L. Piott, 2014-10-15

*Americans in Dissent* is designed as a collection of biographical essays written for general readers and undergraduates that focuses on the topic of American dissent during the period from 1830 to 1890 Centered on influential nineteenth century social critics this volume shifts the focus of American reform away from romantic attempts at reforming the individual to more pragmatic efforts aimed at confronting social economic and political problems Coexisting with what seemed to be a preponderance of romantic idealism during much of the period was an undercurrent of genuine realism Instead of looking through the prism of a pre modern society many of these dissenters focused on how society was becoming increasingly acquisitive and entrepreneurial They were among the first to question laissez faire individualism and unrestrained industrial capitalism and anticipated the critiques of later Progressive Era reformers Representing a wide range of interests each of the selections features a fascinating and provocative man or woman who offered a fundamental critique of American society and made a significant contribution to the development of the reform ethos that characterized the period      *Boats Against the Current* Lewis Perry, 2002-08 *Boats Against the Current* provides a fascinating account of how American culture emerged from the sheltered elitist world of the eighteenth century into the dynamic turbulent civilization that reached full bloom after the Civil War The antebellum years were times of flux and change years of a society rushing into the western wilds muscular and ambitious yet haunted by uncertainty about its future and its past Renowned scholar Lewis Perry begins his study with a fresh look at Andrew Jackson vividly recreating a time when Americans feeling their ties to the past disintegrating fostered a new fascination with history Then Perry introduces us to the observations of such articulate foreign travelers as Alexis de Tocqueville and Fredrika Bremer He deftly weaves together these writers perspectives to provide a fascinating look at our emergent nation Here too are the women of the cities and frontier the peddlers preachers and showmen along with such writers as Hawthorne Emerson Whittier and Parker Perry brings these personalities and writings together to show us how early nineteenth century America saw itself in both its promise and its fears Now available for the first time in paperback *Boats Against the Current* offers a brilliant portrait of a society in the midst of change expansion and reflection about its own future and past Written by one of our leading intellectual historians it makes a major contribution to our understanding of the

emergence of modern American culture      **An Emotional History of the United States** Peter N. Stearns, Jan Lewis, 1998  
Emotions lie at our very core as human beings How we process and grapple with our emotions how and what we emote and how we respond to the emotions of others constitute the essence of our social universe In a very real sense we exist only through the prism of our emotions And yet the profound effect of human emotion on history politics religion and culture remains underexamined While the influence of emotion in such realms as American foreign policy has been well documented other emotional aspects of American history have escaped notice What role for instance does emotion have in the practice of African American religion How do shame and self hatred influence American conceptions of identity How does our emotional life change as we age To what degree is American consumerism driven by basic human emotion With this landmark anthology historians Peter N Stearns and Jan Lewis provide a road map of the American emotional landscape From the emotional world of working class Massachusetts to the prayers of evangelical and pentecostal women and the gendered nature of black rage these essays provide a multicultural snapshot of the unique nature and evolution of American emotions
