Reformers Sport Modernizers:

Reformers, Sport, Modernizers J A Mangan, 2013-10-11 A record of the role of selected middle class individuals across Europe who made notable contributions to the early evolution of modern sport and who saw success in modern sport as an expression of human qualities to be admired applauded and encouraged They viewed sport sometimes self interestedly but not always self interestedly as a medium of personal collective and national virtue It is the first general consideration of a selection of these innovatory pioneers and proselytisers who placed Europe at the forefront of major developments in contemporary world sport now a phenomenon of global significance Gender, Sport, Science J. A. Mangan, Patricia Vertinsky, 2013-10-18 Roberta J Park has been throughout her distinguished career a scholar with a mission to win academic recognition of the significance of the body in culture and cultures Her scholarship has earned her global esteem in the disciplines of Physical Education and Sports Studies for its penetrating insights This selection of her writings is a well deserved tribute to her interpretive originality her intellectual acuity and her ability to inspire colleagues and students To explore unexplored patterns has been her extraordinary strength The result has been continual originality of insight These writings are thus a unique compilation of scholastic creativity of major interest to scholars and students in Sports Studies Physical Education Health Studies Sociology and Social Psychology This book was published as a special issue of the International Journal of the History of Sport Serious Sport J. A. Mangan, 2004 Trial blazer and mentor Professor J A Mangan is a distinguished scholar in the fields of sports history whose work has inspired a generation of historians and social scientists across the globe His seminal book on athleticism and imperialism commanded attention and applause from a broad range of historians and social scientists across the globe His seminal work on athleticism and imperialism commanded attention and applause from a broad range of historians It opened new horizons of inquiry providing the field with a richly perceptive study of hegemony and patronage of cultural assimilation and adaptation and of the ways that power elites used sport for socialization acculturation and social control His later works continued to pose critical sometimes controversial questions providing new and provocative insights into the complex social issues involved in the development and diffusion of sporting activity The geographical horizons of his work now span the globe This volume is a fitting tribute to the scholarship and lasting accomplishments of a pioneer who has mentored and continues to mentor numerous young scholars internationally simultaneously developing and maintaining high quality channels through which to disseminate sport history research In appraising his scholarship the contributors to this collection demonstrate their debt to his vision and achievements This volume was previously published as a special issue of The International Journal of the History of Sport The Politics of the Male Body in Global Sport Hans Bonde, 2013-10-18 Danish sport has been associated with Europe and the World not least through I P Muller and Niels Bukh and the Danish Gymnastics revolution with its emphasis on male aesthetics and hygiene in the first half of the twentieth century At the same time Denmark has stood apart from Europe in

the early moments of its history of sport with the rural revolution of the farming communities as a statement of political independence and assertion. However, during the German occupation of Denmark, Danish sport was part of a European collaboration which characterized a number of the occupied countries, not least in the Nordic area. After the Second World War, Denmark embraced international body cultures with other European nations, in particular Eastern martial arts. Denmark too, as part of trends in the European region and the world, became caught up in sport as a powerful contemporary political statement. This book was previously published as a special issue of the *International Journal of the History of Sport*.

American Sports Alan Klein, 2013-09-13 This collection illustrates the expansiveness of an interdisciplinary approach to the study of sport. While rooted in anthropology, these essays consider American sports in their social, economic, cultural, and political aspects, charting their evolution. The book draws from history, sociology, and political science, as well as considering the relationship between the developed and developing world and culture and masculinity. The first part of the book considers the local and global interplay of professional baseball, covering Major League Baseball's impact on the Dominican Republic, nationalism and baseball on the Mexican-US border, the globalizing forces of baseball as an industry. The second part of the book is concerned with the cultural examination of the responsiveness of masculinity to social and cultural forces, examining the exaggerated world of bodybuilders in Southern California, the cross-cultural comparisons of male behaviour on a bi-national baseball team in Mexico, the historical examination of Jews in American sport. This book was previously published as a special issue of *Sport in Society*. *Sport and Ireland* Paul Rouse, 2015 The first history of sport in Ireland, locating the history of sport within Irish political, social, and cultural history, and within the global history of sport. It studies the relationship between sport and national identity, how sport influences policy making in modern states, and the ways in which sport has been colonized by the media.

The Making of Sporting Cultures John Hughson, 2013-09-13 The Making of Sporting Cultures presents an analysis of western sport by examining how the collective passions and feelings of people have contributed to the making of sport as a way of life. The popularity of sport is so pronounced in some cases that we speak of certain sports as national pastimes. Baseball in the United States, soccer in Britain, and cricket in the Caribbean are among the relevant examples discussed. Rather than regarding the historical development of sport as the outcome of passive spectator reception, this work is interested in how sporting cultures have been made and developed over time through the active engagement of its enthusiasts. This is to study the history of sport not only from below but also from within, as a means to understanding the deep relationship between sport and people within class contexts, the middle class as well as the working class. Contestation over the making of sport along axes of race, gender, and class are discussed where relevant. A range of cultural writers and theorists are examined in regard to both how their writing can help us understand the making of sport and as to how sport might be located within an overall cultural context in different places and times. The book will appeal to students and academics within humanities disciplines such as cultural studies, history, and sociology, and to those in sport.
