Regeln Gegen Den Krieg Die Haager Friedenskonferenzen Von 1899 Und 1907 In Der Internationalen Politik:

Regeln gegen den Krieg? Jost Dülffer, 1981 **The 1899 Hague Peace Conference** Arthur Eyffinger, Pieter H. Kooijmans, 2025-02-10 **An Improbable War?** Holger Afflerbach, David Stevenson, 2012 The focus of this volume is not on the consequences but rather on the connection between the Great War and the long 19th century the short and long term causes of World War I **The Law of Nations and Britain's Quest for Naval Security** Scott Andrew Keefer, 2016-11-13 As the centenary of the Treaty of Versailles approaches this book presents the pre 1914 precursors to the interwar naval arms treaties arising from the peace of 1919 providing a fresh perspective on arms control efforts through an interdisciplinary approach Interweaving historical investigation with legal analysis Scott Keefer traces the British role in the development of naval arms control outlining the pragmatic Foreign Office approaches towards international law By emphasizing what was possible within the existing legal system rather than attempting to create radically powerful international institutions statesmen crafted treaties to exploit the unique pace of naval construction Utilizing previously overlooked archival resources this book investigates how the great powers exploited treaties as elements of national security strategies The result is a fuller analysis of the Hague Peace Conferences Anglo German discussions and lesser known regional agreements from the American Great Lakes to South America and a richer exploration of pre 1914 diplomacy providing insights into how a past generation perceived questions of war and defence *The Justification of War and International Order* Lothar Brock, Hendrik Simon, 2021 In the past few decades the understanding of the relationship between nations has undergone a radical transformation The role of the traditional nation state is diminishing along with many of the traditional vocabularies which were once used to describe what has been called ever since Jeremy Bentham coined the phrase in 1780 international law The older boundaries between states are growing ever more fluid new conceptions and new languages have emerged which are slowly coming to replace the image of a world of sovereign independent nation states which has dominated the study of international relations since the early nineteenth century This redefinition of the international arena demands a new understanding of classical and contemporary questions in international and legal theory It is the editors conviction that the best way to achieve this is by bridging the traditional divide between international legal theory intellectual history and legal and political history The aim of the series therefore is to provide a forum for historical studies from classical antiquity to the twenty first century that are theoretically informed and for philosophical work that is historically conscious in the hope that a new vision of the rapidly evolving international world its past and its possible future may emerge Book jacket **The Hague Conferences and International Politics, 1898-1915** Maartje Abbenhuis, 2018-10-18 Beginning with the extraordinary rescript by Tsar Nicholas II in August 1898 calling the world's governments to a disarmament conference this book charts the history of the two Hague peace conferences of 1899 and 1907 and the third conference of 1915 that was never held using diplomatic correspondence newspaper reports contemporary

publications and the papers of internationalist organizations and peace activists Focusing on the international media frenzy that developed around them Maartje Abbenhuis provides a new angle on the conferences Highlighting the conventions that they brought about she demonstrates how The Hague set the tone for international politics in the years leading up to the First World War permeating media reports and shaping the views and activities of key organizations such as the inter parliamentary union the international council of women and the Institut de droit international Institute of International Law Based on extensive archival research in the Netherlands Great Britain Switzerland and the United States alongside contemporary publications in a range of languages this book considers the history of the Hague conferences in a new way and presents a powerful case for the importance of The Hague conferences in shaping twentieth century international politics

Decentering America Jessica C. E. Gienow-Hecht, 2007-12-01 Decentering has fast become a dynamic approach to the study of American cultural and diplomatic history But what precisely does decentering mean how does it work and why has it risen to such prominence This book addresses the attempt to decenter the United States in the history of culture and international relations both in times when the United States has been assumed to take center place Rather than presenting more theoretical perspectives this collection offers a variety of examples of how one can look at the role of culture in international history without assigning the central role to the United States Topics include cultural violence inverted Americanization the role of NGOs modernity and internationalism and the culture of diplomacy Each subsection includes two case studies dedicated to one particular approach which while not dealing with the same geographical topic or time frame illuminate a similar methodological interest Collectively these essays pragmatically demonstrate how the study of culture and international history can help us to rethink and reconceptualize US history today
