When You Think About It Cynthia Mitchell, 2015-02-27 At an early age you begin to ask yourself questions Lots of questions Some of these questions you can find answers to but many you tell yourself have no answers so you tuck them away for another day That day came for the author when she lost her only child Breana The pain was immense and the questions unending Where is she Would she see her again Why isn't she here for her son If everything has a purpose what could the purpose of losing her possibly be Is there really a God and what or who is He For Cyndi life had no reason without her daughter in it Is this physical world we live in

the only reality If so what is the point She became obsessed with finding her and with answering those long ago questions When faith is not enough where do you turn The things we learn as children become the facts we base our decisions on Are they true or just accepted and passed down through time She began reading intensely There was an interest in anything written by mediums psychics doctors nurses scientists near death experiencers and hospice workers anyone who had something to say on the subject was where she looked She noticed that early physicists were being quoted in some of the books she was reading Why She wanted to learn more What is this quantum world and how do we fit into it She realized that greater minds than hers had written these books and she wasn't sure if she could understand them The concentration she needed was unavailable to her in the beginning Determination drove her forward however and in time the concentration came She was surprised when she began to see the lines cross between God not religion and science God appeared to be the ultimate scientist and not a god at all In fact He is very different from the human god she had learned of as a child There were many reasons to be afraid of that God She wondered why she had not come across a book that incorporated all of these subjects into one Had no one else seen the correlation Could she write something for her grandson that would help him understand what she now understood so clearly She began taking notes Those notes became When You Think About It

Feeley, Sarah Ann Wells, 2015-10-01 Since the 1927 release of Fritz Lang's pioneer film *Metropolis* science fiction cinema has largely been regarded a Western genre In *Simultaneous Worlds* Jennifer L. Feeley and Sarah Ann Wells showcase authors who challenge this notion by focusing on cinemas and cultures from Cuba to North Korea not traditionally associated with science fiction This collection introduces films about a metal eating monster who helps peasants overthrow an exploitative court an inflatable sex doll who comes to life a desert planet where matchsticks are more valuable than money and more *Simultaneous Worlds* is the first volume to bring a transnational interdisciplinary lens to science fiction cinema Encountering some of the best emerging and established voices in the field readers will become immersed in discussions of well known works such as the *Ghost in the Shell* franchise and Neill Blomkamp's *District 9* alongside lesser known but equally fascinating works by African Asian European and South American filmmakers Divided into five parts that cover theoretical concerns such as new media economies translation the Global South cyborgs and socialist and postsocialist cinema these essays trace cinema's role in imagining global communities and power struggles Considering both individual films and the broader networks of production distribution and exhibition *Simultaneous Worlds* illustrates how film industries across the globe take part in visualizing the perils of globalization and technological modernity Ultimately this book opens new ways of thinking about world cinema and our understanding of the world at large      *Because It Is So Beautiful* Robert Leonard Reid, 2017-06-01 A Finalist for the PEN Diamonstein Spielvogel Award for the Art of the Essay Yes every inch of the globe has been seen mapped photographed and measured but is it known

Robert Leonard Reid doesn't think so. To draw a circle and calculate its diameter is not to know the circle. In this collection Reid distinguishes himself from many science-based nature writers using the natural world as a springboard for speculations and musings on the numinous and the sacred, injustice, homelessness, the treatment of Native Peoples in the United States, and what pushes mountaineers to climb. Ranging in their settings from eastern New Mexico to northern Alaska, Reid's essays illustrate his belief that the American West is worth celebrating and caring for. Taking its title from an affecting speech given by renowned author Barry Lopez, *Because It Is So Beautiful* is a response to desperate questions surrounding America's wildlands. Lopez's words resonated with the young mountaineer, musician, mathematician Robert Leonard Reid, who was struggling to understand his relationship to the world, to find his vision as a writer. What he learned on that long ago evening is knit throughout the nineteen pieces in the collection, which include essays from Reid's previous books *Arctic Circle*, *Mountains of the Great Blue Dream*, and *America New Mexico*, three essays that appear here in print for the first time, as well as revised and expanded versions of essays that appeared in *Touchstone*, *The Progressive*, and elsewhere.

*Frog and The Tree of Spells* Joffre White, 2016-01-25

In this third book of the magical Frog adventure series, young teenager Chris Casey is again pulled through time and space into another dimension to the tropical world of Tropal. But something else has come to this paradise. Something unwanted. Something evil. The darkness that is Lord Maelstrom has taken refuge in the depths of Black Mountain. The first of his abominable creations are sent out to capture and enslave the chameleon people of the forests, to drain them of their colour and turn Tropal into a dead grey wasteland. He searches for the fabled Tree of Spells, which gives absolute power to the holder. Should it come into his possession, every dimension, every world in time and space shall be truly doomed. A Guardian arrives to help Chris, who now in his guise as the indomitable Frog, meets a new companion, Mystra, a girl with extraordinary powers. Frog's quest is to find the Tree of Spells and take it back into his own world for safekeeping. He has to unravel a series of clues which takes him on a perilous journey of encounters with gravity-defying caves, water witches, a swamp of dead souls, the banished Horsemen of Tropal, snow bears, and finally into the heart of Lord Maelstrom's lair. Can he reach the Tree of Spells first? Will the Magic of the Immortals be enough to save the boy in whose blood flows an unseen and ancient secret? Frog's sense of humour and loyalty is always present, but this time will his courage desert him, and will Lord Maelstrom finally triumph? This children's book, aimed at those aged 7 and over, will appeal to fans of adventure, time travel, and exploring other dimensions.
