Forrest, 1996 This book presents a provincial view of the French Revolution and assesses the experience of revolution across a broad swathe of south western France in an area which increasingly looked to Bordeaux as its capital city Here the Revolution was not simply a pale reflection of events in Paris Local conflicts and personal rivalries are vital to our understanding of the shape of events in the region as are contrasting traditions of religious affiliation peasant radicalism and obedience to the state The book examines the Revolution within a thematic framework and discusses such aspects as the growth of a local political culture the incidence of rural insurrection religious responses to the Revolution the chequered appeal of federalism and the uneven experience of Terror and political repression **The French Revolution** Ian Davidson, 2016-12-06 The French Revolution casts a long shadow one that reaches into our own time and influences our debates on freedom equality and authority Yet it remains an elusive perplexing historical event Its significance morphs according to the sympathies of the viewer who may see it as a series of gory tableaux a regrettable slide into uncontrolled anarchy or a radical reshaping of the political landscape In this riveting new book Ian Davidson provides a fresh look at this vital moment in European history He reveals how it was an immensely complicated and multifaceted revolution taking place in different places at different times and in different spheres and how subsequently it became weighted with political social and moral values Stirring and dramatic and filled with the larger than life players of the period and evoking the turbulence of this colorful time this is narrative history at its finest **French Intellectuals Against the Left** Michael Scott Christofferson, 2004 Christofferson argues that French anti totalitarianism was the culmination of direct democratic critiques of communism revisions of the revolutionary project after 1956 He offers an alternative interpretation for the denunciation of communism Marxism by the French intellectual left in the late 1970s *Historicizing the French Revolution* Antonino De Francesco, 2022-03-24 This book provides a critical examination of over 300 historical works about the French Revolution published in Europe in particular in France Great Britain Germany Italy and Russia as well as in the United States between 1789 and 1989 It also goes on to examine recent trends in French Revolution historiography and consider where histories of

this landmark event may go in the future By emphasizing the elements which have been valued or hidden exalted or silenced Historicizing the French Revolution shows how reflections on 1789 are always fundamentally tied to the times in which they are formulated Antonino De Francesco looks at the ways in which these historical accounts can be seen to support and at times contrast with the formation of political modernity both in national and international contexts as it has taken shape in the hundreds of years that have followed this key moment in world history

The History of the French Revolution

Adolphe Thiers, 1838 *Reform and Revolution in France* Peter M. Jones, Peter Jones, 1995-09-21 This textbook has been written to help teachers and students to pilot their way through the enormous and ever expanding literature on the French Revolution The author makes a conscious effort to combine social and political interpretations of the origins of the Revolution and offers a synthesis which takes full account of current debates He also seeks to restore the Revolution to its domestic environment Notwithstanding the powerful contemporary myth of rupture the author argues that the dramatic events of 1789 need to be considered alongside the reform achievements of Bourbon absolute monarchy The result is a new account of the gestation of the Revolution which is both up to date and satisfying in its range of vision
