Law and the Arms Trade Laurence Lustgarten, 2020-09-03 This ground breaking book offers an extensive legal analysis grounded in public EU and international law of arms trade regulation integrated with insights drawn from international relations The sale of weapons and related technologies is globally one of the most politically controversial and ethically contentious forms of commerce Intimately connected with sustaining repressive governments and violations of international human rights and humanitarian law arms exports are also a central element in the economic and strategic policies of the governments of all large industrial states They have also been the source of abundant corruption and of serious challenges to the norms and effectiveness of constitutional accountability in democratic states On paper the arms trade is heavily regulated national legislation and international treaties are in place which purport to prohibit certain transactions and limit others Yet despite its importance legal and international relations scholarship on the subject has been surprisingly limited This book fills this gap in the literature by examining and comparing the export control regimes of eight leading nations USA Russia the UK France Germany Sweden China and India with chapters contributed by leading experts in the field of law and international relations

International Journal of Mainstream Social Science , Phoenix from the Ashes Cameron Scott Mitchell,2009-12-01 The continued existence of the Russian defence and arms industry OPK was called into question following the disintegration of the Soviet Union in 1991 Industry experts cited the lack of a domestic market endemic corruption and excess capacity within the industry as factors underpinning its predicted demise However the industry s export customers in China India and Iran during those early years became the OPK s saving grace Their orders introduced hard currency back into the industry and went a long way to preventing the forecasted OPK collapse Although pessimistic predictions continued to plague the OPK throughout the 1990s the valuable export dollars provided the OPK the breathing space it needed to claw back its competitive advantage as an arms producer That revival has been further underpinned by a new political commitment various research and development initiatives and the restoration of defence industry as a tool of Russian foreign policy The short term future of the Russian OPK looks promising The rising domestic defence order is beginning to challenge the export market as the OPK s most important customer Meanwhile exports will be safeguarded by

continued foreign demand for niche Russian defence products Although the long term future of the OPK is more difficult to predict Russia's solid research and development foundation and successful international joint military ventures suggest that the current thriving trend in exports is likely to continue Russia represents the next generation of affordable and rugged military equipment for the arsenals of the developing world Coupled with Russia's growing ability to rearm itself through higher oil prices and a more streamlined defence industry the future of the OPK looks bright

Russian Policy Towards China and Japan Natasha Kuhrt, 2007-12-24 Drawing on the most up to date sources this book provides an in depth examination of Russia's relations with China and Japan the two Asia Pacific superpowers in waiting For Russia there has always been more than one Asia after the collapse of the Soviet Union there were those in the Russian elite who saw Asia as implying the economic dynamism of the Asia Pacific with Japan as the main player However there were others who saw the chance for Russia to reassert its claim to be a great power based on Russia's geopolitical and geoeconomic position as a Eurasian power For these China was the power to engage with together China and Russia could control both Heartland and Rim both Eurasia and Asia Pacific whereas accepting Japan's conception of Asia implied regional fragmentation and shared sovereignty This book argues that this strand of thinking mainly confined to nationalists in the Eltsin years has now under Putin become the dominant discourse among Russian policymakers Despite opportunities for convergence presented by energy resources even for trilateral cooperation traditional anxiety regarding loss of control over key resource areas in the Russian Far East is now used to inform regional policy leading to a new resource nationalism In light of Russia's new assertiveness in global affairs and its increasing use of the so called energy weapon in foreign policy this book will appeal not only to specialists on Russian politics and foreign policy but also to international relations scholars
