Russia The Banking System During Transition:

Changes in the Russian Banking System Martin P. Kühle, 1997-08-26 Inhaltsangabe Abstract This dissertation analyses the structural changes in the Russian banking system and gives insights into the current market situation Starting with a review of theoretical aspects of banking in Western economies and the rationale for the existence of banks the deficiencies of the former socialist banking system are exposed A large section is dedicated to the special role of the banking system during the process of transition and to an evaluation of how far Russian banks rise to the challenges of these tasks The historical process of reforming the central and commercial banking system is described laying emphasis on the legislative changes and the means of supervision The banking system in Russia has been dominated by rapid growth in the last three years due to high profit expectations However many banks granted credits to dubious industrial companies and now face a large amount of uncollectable assets in their credit portfolios The analysis shows that with rising positive real interest rates and growing competition in the banking market a large number of small and medium sized banks will either have to admit bankruptcy or be acquired by expanding banks The emerging interbank bond and equity markets are illustrated with regard to the influence of banks The deficiencies in settlement processes liquidity trading rules and private and commercial law are examined The next urgently required steps in the reform process are listed The future progress of the Russian banking system however is not only dependent on legal and structural changes in related financial and capital markets but based on the critical assumption of peaceful politically stable and socially balanced developments in Russia

Restructuring, Stabilizing and Modernizing the New Russia Paul J.J. Welfens, Evgeny Gavrilencov, 2012-12-06 Russia has embarked upon a difficult process of systemic transformation and economic opening up While the initial strong GDP decline seemed to have ended in 1997 the real development was facing even more difficult problems as output declined sharply after the Ruble and

banking crisis of August 1998 inflation started to increase again exports and imports were falling capital flight increasing and unemployment rising There is broad disappointment in Russia regarding the transformation failure in 1998 since so many people had hoped that the end of the Soviet command economy would bring democracy prosperity and international integration While Poland has been able to double per capita income in the 1990s it has fallen by 50% in Russia and this despite considerable IMF involvement and some modest support from other international organizations What were the reasons for transformation failure in the 1990s What are the ingredients for long term sustainable transformation What are the internal and international requirements to avoid a second possibly tragic failure of transformation in Russia An international group of researchers has focussed on these problems during a two year research project financed by the Alfred Krupp von Bohlen und Halbach Foundation A series of papers were presented at workshops in Potsdam Bonn and Moscow in 1999 where this book is devoted to four important issues the Russian transformation crisis the topic of restructuring the need for stabilizing Russia and the requirements for modernizing Russia *Real and Financial Economic Dynamics in Russia and Eastern Europe* Timothy Lane,Nina Oding,Paul J.J. Welfens,2012-12-06 Russia and many other transition countries are now facing the challenges of opening up restructuring and modernizing their economies which requires addressing numerous institutional weaknesses and supply side distortions From a regional perspective drawing on the experience of other reforming countries the papers examine these issues Aspects addressed include the implications of trade and capital flows the process of labor market reform financial market development productivity growth and innovation dynamics The dynamics of the reform process are also studied in the context of new political economy models **Russia's Uncertain Economic Future** John Pearce Hardt,2003 The Russian economy is now showing positive GDP growth and a positive balance of payments portending a trend of sustained growth The contributors to this volume analyze the present state of the Russian economy and its future prospects which now seem brighter than ever Russia's Uncertain Economic Future John P. Hardt,Robert F. Bennett,2015-04-15 The contributors to this volume analyze the present state of the Russian economy and its future prospects which now seem brighter than at any previous time in the country s history The Russian economy is now showing positive GDP growth and a positive balance of payments portending a trend of sustained growth The record of the Putin presidency with respect to the establishment of market friendly legal and administrative environments is substantially positive On the other side of the ledger the contributors identify the persistence of monopolies in energy transportation and agriculture distortions resulting from corruption infrastructural inadequacies and the maldistribution of political power and decision making authority demographic decline and the erosion of human capital as manifested in the health education and welfare of the population Russia s successful development as a democratic society with a market economy is of great importance to its neighbors and to the global economy and specifically to the United States which is why the U S Congress commissioned these studies by expert analysts This edition includes a comprehensive subject index making the volume user
