Sacred Landscape:

Sacred Landscapes in Antiquity Ralph Haussler, Gian Franco Chiai, 2020-07-31 From generation to generation people experience their landscapes differently Humans depend on their natural environment it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities such as droughts famines floods and landslides need to be appeased We presume that in many societies lakes rivers rocks mountains caves and groves were considered sacred Individual sites and entire landscapes are often associated with divine actions mythical heroes and etiological myths Throughout human history people have also felt the need to monumentalize their sacred landscape But this is where the similarities end as different societies had very different understandings believes and practices The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi disciplinary approach More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it We see the role of performance ritual orality textuality and memory in people s sacred landscapes A diachronic view allows us to study how landscapes were rewritten adapted and redefined in the course of time to suit new cultural political and religious understandings not to mention the impact of urbanism on people s understandings A key question is how was the landscape manipulated transformed and monumentalized especially the colossal investments in monumental architecture we see in certain socio historic contexts or the creation of an alternative humanmade seemingly non natural landscape with perfectly astronomically aligned buildings that define a cosmological order Sacred Landscapes therefore aims to analyze the complex links between landscape religiosity and society developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic holistic contextual and historical perspective [Celtic Sacred Landscapes](#) Nigel Pennick, 2000 This book aims to show us the holy sites of Britain Ireland and mainland Europe through Celtic eyes which means that it inevitably takes a somewhat spiritual mind body and spirit tone That said it offers a fascinating introduction to oral traditions of celtic religion and its ties to the landscape **Creating the Sacred Landscape** Darius

Houk, Barbara Arroyo, Terry G. Powis, 2019-12-11 This volume brings together a wide spectrum of new approaches to ancient Maya studies in an innovative exploration of how the Preclassic and Classic Maya shaped their world Moving beyond the towering temples and palaces typically associated with the Maya civilization contributors present unconventional examples of monumental Maya landscapes Featuring studies from across the central Maya lowlands Belize and the northern and central Maya highlands and spanning over 10 000 years of human occupation in the region these chapters show how the word monumental can be used to describe natural and constructed landscapes political and economic landscapes and ritual and sacred landscapes Examples include a massive system of aqueducts and canals at the Kaminaljuyu site a vast arena designed for public spectacle at Chan Chich and even the complex realms of Maya cosmology as represented by the ritual cave at Las Cuevas By including physical conceptual and symbolic ways monumentality pervaded ancient Maya culture this volume broadens traditional understandings of how the Maya interacted with their environment and provides exciting analytical perspectives to guide future study A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase *Pre-Columbian Landscapes of Creation and Origin* John Staller, 2008-03-12 Pre-Columbian Andean and Mesoamerican cultures have inspired a special fascination among historians anthropologists archaeologists as well as the general public As two of the earliest known and studied civilizations their origin and creation mythologies hold a special interest The existing and Pre-Columbian cultures

from these regions are particularly known for having a strong connection with the natural landscape and weaving it into their mythologies A landscape approach to archaeology in these areas is uniquely useful shedding insight into their cultural beliefs practices and values The ways in which these cultures imbued their landscape with symbolic significance influenced the settlement of the population the construction of monuments as well as their rituals and practices This edited volume combines research on Pre Columbian cultures throughout Mesoamerica and South America examining their constructed monuments and ritual practices It explores the foundations of these cultures through both the creation mythologies of ancient societies as well as the tangible results of those beliefs It offers insight on specific case studies combining evidence from the archaeological record with sacred texts and ethnohistoric accounts The patterns developed throughout this work shed insight on the effect that perceived sacredness can have on the development of culture and society This comprehensive and much needed work will be of interest to archaeologists and anthropologists focused on Pre Columbian studies as well as those in the fields of cultural or religious studies with a broader geographic focus

elements of the historical texts composed by scholars and bureaucrats on the peripheries of Islamic empires between the tenth and fifteenth centuries But how are historians to interpret such narratives And what can these more literary histories tell us about the people who wrote them and the times in which they lived In this book Mimi Hanaoka offers an innovative interdisciplinary method of approaching these sorts of local histories from the Persianate world By paying attention to the purpose and intention behind a text s creation her book highlights the preoccupation with authority to rule and legitimacy within disparate regional provincial ethnic sectarian ideological and professional communities By reading these texts in such a way Hanaoka transforms the literary patterns of these fantastic histories into rich sources of information about identity rhetoric authority legitimacy and centre periphery relations

Central Places and Un-Central Landscapes

Giorgos Papantoniou,Athanasios Vionis,2019-04-01 This volume examines the applicability of central place theory in contemporary archaeological practice and thought in light of ongoing developments in landscape archaeology by bringing together central places and un central landscapes and by grasping diachronically the complex relation between town and country as shaped by political economies and the availability of natural resources Moving away from model bounded approaches central place theory is used more flexibly to include all the places that may have functioned as loci of economic or ideological centrality even in a local context in the past Fourteen chapters examine centrality and un central landscapes from Prehistory to the late Middle Ages in different geographical contexts from Cyprus and the Levant through Greece and the Balkans to Italy France and Germany

Spiritual Landscapes

Noah Martin,AI,2025-02-26 *Spiritual Landscapes* explores how diverse landscapes become sacred spaces across various religions and spiritual traditions It reveals that mountains rivers and forests are not merely backdrops but potent symbols that embody divine presence and spiritual experiences The book argues that these landscapes actively shape our spiritual understanding functioning as conduits to the divine Understanding these connections requires a sensitivity to both the theological underpinnings of each tradition and the cultural contexts in which these beliefs developed The book examines landscapes as mirrors of the soul reflecting inner psychological states and

as divine texts where natural features communicate divine will It also explores how journeys through specific terrains become transformative pilgrimages Drawing from religious texts like the Bible and the Quran archaeological findings and ethnographic studies the book presents evidence from traditions such as Judaism Mount Sinai and Hinduism the Ganges River The analysis is enriched through interdisciplinary connections with religious studies environmental history and cultural geography Spiritual Landscapes adopts a comparative approach revealing universal patterns of environmental symbolism across world religions The book begins by introducing foundational concepts and then delves into specific examples of mountains deserts rivers and forests It culminates by exploring contemporary issues of environmental stewardship highlighting the potential for sacred geography to inspire ecological responsibility This perspective fosters a deeper appreciation for the role of the environment in shaping religious beliefs and practices

Continuity and Change in Cultural Adaptation to Mountain Environments Ludomir R Lozny, 2013-03-12 Up until now mountain ecosystems have not been closely studied by social scientists as they do not offer a readily defined set of problems for human exploitation as do for instance tropical forests or arctic habitats But the archaeological evidence had shown that humans have been living in this type of habitat for thousands of years From this evidence we can also see that mountainous regions are often frontier zones of competing polities and form refuge areas for dissident communities as they often are inherently difficult to control by centralized authorities As a consequence they fuel or contribute disproportionately to political violence But we are now witnessing changes and increasing vulnerability of mountain ecosystems caused by human activities Human adaptability to mountain ecosystems This volume presents an international and interdisciplinary account of the exploitation of and human adaptation to mountainous regions over time The contributions discuss human cultural responses to key physical and cultural stressors associated with mountain ecosystems such as aridity quality of soils steep slopes low productivity as well as transient phenomena such as changing weather patterns deforestation and erosion and the possible effects of climate change This volume will be of interest to anthropologists ecologists and geologists as mountainous landscapes change fast and cultures disappear and they need to be recorded and mountain regions are of interest for studies on environmental change and cultural responses of mountain populations provide clues for us all Critical to understanding mountain adaptations is our comprehension of human decision making and how people view short and long term outcomes
