The Sign & Its Masters Thomas Albert Sebeok, 1989 NOTE Series number is not an integer n a **On Verse, Its Masters and Explorers** Stephen Rudy, Martha Taylor, 2011-06-15 No detailed description available for On Verse Its Masters and Explorers *The Master of Signs* Alexander Hollmann, 2011 In Herodotus s Histories almost anything is capable of being invested with meaning human speech gifts markings and even the human body This book represents an unprecedented examination of signs and their interpreters as well as the terminology Herodotus uses to describe sign transmission reception and decoding *Global Semiotics* Thomas A. Sebeok, 2001 The study of semiotics underwent a gradual but radical paradigm shift during the past century from a glottocentric language centered enterprise to one that encompasses the whole terrestrial biosphere In this collection of 17 essays Thomas A Sebeok one of the seminal thinkers in the field shows how this progression took place His wide ranging discussion of the evolution of the field covers many facets including discussions of biosemiotics semiotics as a bridge between the humanities and natural sciences semiosis nonverbal communication cat and horse behavior the semiotic self and women in semiotics This thorough account will appeal to seasoned scholars and neophytes alike **Sign Studies and Semioethics** Susan Petrilli, 2014-10-09 This book examines the issues surrounding the problematic perpetuation of dominant sign systems through the framework of semioethics Semioethics is concerned with using semiotics as a powerful tool to critique the status quo and move beyond the reproduction of the dominant order of communication The aim is to present semioethics as a method to engage semiotics in an active rethink of our ability as humans to affect change **Semiotics Unbounded** Susan Petrilli, Augusto Ponzio, 2005-12-15 The more human knowledge increases the more signs grow and with this expansion the more the boundaries of the science that studies signs also grows In *Semiotics Unbounded* Susan Petrilli and Augusto Ponzio explain the explosion of the sign network in the era of global communication and discuss the important theoretical responses offered by semiotics Providing a much needed introductory guide to the subject Petrilli and Ponzio explore the ever growing frontiers of semiotics through the thought of prominent sign scholars such as Charles Peirce Victoria Welby Mikhail Bakhtin Charles Morris and Thomas Sebeok In an era of global communication a global approach is necessary and what may seem to be the whole is only a part a view being at once globalizing and open Each and every sign is never self sufficient and closed but exists always in a relation of otherness This is true of the signs forming animals and human beings individuals and communities and involves the implication of all living beings in the life of all others *Semiotics Unbounded* offers a new and original survey of the science of signs evaluating it in relation to the problems of our time not only of a scientific order but also the problems concerning everyday social life *Jakob von Uexküll* Carlo Brentari, 2015-02-18 The book is a comprehensive introduction to the work of the Estonian German biologist Jakob von Uexküll After a first introductory chapter by Morten T nnessen and a second chapter on Uexküll s life and philosophical background it contains four chapters devoted to the analysis of his main works They are followed by a

vast eighth chapter which deals with the influence Uexküll had on other philosophers and scientists Finally the author discloses his conclusions focused on the possibility of updating Uexküll's work As far as the key issue is concerned the Uexküllian Umwelt is the perceptive and operative world which surrounds animal species it is a subjective species specific construction which provides living organisms with great security and behaviour stability The relationship that the animal carries out with its environment is a complex system of semiotic interactions its behaviour is not a set of mechanical reactions but a spontaneous attribution of meaning to the outside world

Signs in Use Jørgen Dines Johansen, Svend Erik Larsen, 2005-07-26 Signs in Use is an accessible introduction to the study of semiotics All organisms from bees to computer networks create signs communicate and exchange information The field of semiotics explores the ways in which we use these signs to make inferences about the nature of the world Signs in Use cuts across different semiotic schools to introduce six basic concepts which present semiotics as a theory and a set of analytical tools code sign discourse action text and culture Moving from the most simple to the most complex concept the book gradually widens the semiotic perspective to show how and why semiotics works as it does Each chapter covers a problem encountered in semiotics and explores the key concepts and relevant notions found in the various theories of semiotics Chapters build gradually on knowledge gained and can also be used as self contained units for study when supported by the extensive glossary The book is illustrated with numerous examples from traffic systems to urban parks and offers useful biographies of key twentieth century semioticians

The Routledge Companion to Semiotics and Linguistics Paul Copley, 2005-11-30 The Routledge Companion to Semiotics and Linguistics opens up the world of semiotics and linguistics for newcomers to the discipline and provides a useful ready reference for the more advanced student
