artists signwriters and entrepreneurs working in the dawn of the advertising age in the USA helped create entire industries that continue to exist globally today all using screen printing in the production of an unbelievably wide range of products It includes beautiful full color illustrations from the Selectasine Booklet provided to original patent licensees and the main vehicle that spread the process around the world Hundreds of never before seen product photos machine designs and some of the first art prints done in the 1920 s in California are included plus special chapters on fine art printmaking along with the ceramic and textile industries Screen printing was a hybrid process that provided both graphic and manufacturing advantages over other methods and was perfect for the times Industry especially in the USA was transitioning from hand craft into mass production creating a need to decorate products or advertise them with signage Most times a closely guarded industrial secret screen printing bridged gaps between hand production and the more expensive automated printing of the time which included lithography and letterpress It introduced cheap short run color capabilities and virtually created the whole Point of Purchase POP and Specialty Advertising industries along with the billboard and t shirt printing sectors An ability to print directly on a wide variety of materials led to use decorating metal ceramics textiles and plastics spurring record growth better designs and lowered costs in any industry that adopted it from fashion to fine china Experiments prior to WWII led to printed circuits which in turn revolutionized the electronics industries All these and more are legacies of the pioneers of screen printing featured in the book The history of the process is really the history of so many things we take for granted in today s and tomorrow s society      **Silk Screen Printing for Artists and Craftsmen** Mathilda V.
